Chevrolet's inline 6-cylinder, affectionately known as the "Stovebolt," was produced and applied to Chevrolet-powered automobiles from 1929 through 1962. Its effectiveness and simplicity greatly contributed to the lengthy duration of its life span, with the engine still being created in some capacity into 2009.

Deve Krehbiel of devestech.net has taken his decades of knowledge on the inline-6 and created the ultimate resource on rebuilding the Stovebolt Chevrolet powerplant. Using color photography with step-by-step sequencing, Deve takes you through the disassembly, rebuild, and reassembly of these engines, including rebuilding the carburetor, distributor, and intake/exhaust systems. Tech Tips highlight areas that can be overlooked, such as proper cleaning and determining if a part is reusable, and an appendix provides information on decoding casting numbers. With millions of Chevrolets built with an inline-6 engine, there's no shortage of candidates for a rebuild. With *Chevrolet Inline-6 Engine: How to Rebuild*, you will now have the perfect complementary tool to walk you through the entire engine-rebuilding process. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial}

In Egypt Islamists clash with secularists over religious and national identity, while in Turkey secularist ruling elites have chosen to accommodate Islamists in the name of democracy and reconciliation. As Islam spreads throughout the world, Muslims living in their traditional homelands and in the Western world are grappling with shifting identities. In all cases, understanding the dynamics of identity-based politics is critical to the future of Muslims and their neighbors across the globe. In *Muslims in Global Politics*, Mahmood Monshipouri examines the role identity plays in political conflicts in six Muslim nations—Egypt, Iraq, the United Arab Emirates, Turkey, Iran, and Indonesia—as well as in Muslim diaspora communities in Europe and North America. In each instance, he describes how

conservatives, neofundamentalists, reformists, and secularists construct identity in different ways and how these identities play out in the political arena. With globalization, the demand for human rights continues to grow in the Muslim world, and struggles over modernity, authenticity, legitimacy, and rationality become increasingly important. Muslims in Global Politics deepens our understanding of how modern ideas and norms interact with the traditions of the Islamic world and, in turn, shows how human rights advocates can provide an alternative to militant Islamist movements.

Designed to challenge Boeing's monopoly in the large-aircraft market, it made its first flight in April 2005, entering commercial service two years later with Singapore Airlines. This jet has become so popular that every four minutes--24 hours a day, seven days a week--an A380 is taking off or landing somewhere in the world. There is no other development in recent aviation history to rival this remarkable aircraft.
