In this classic work, the eminent Catholic philosopher Étienne Gilson deals with one of the most important and perplexing metaphysical problems: the relation between our notion of God and demonstrations of his existence. Gilson examines Greek, Christian, and modern philosophy as well as the thinking that has grown out of our age of science in this fundamental analysis of the problem of God. "[I] commend to another generation of seekers and students this deeply earnest and yet wistfully gentle little essay on the most important (and often, at least nowadays, the most neglected) of all metaphysical--and existential--questions. . . . The historical sweep is breathtaking, the one-liners arresting, and the style, both intellectual and literary, altogether engaging." --Jaroslav Pelikan, from the foreword "We have come to expect from the pen of M. Gilson not only an accurate exposition of the thought of the great philosophers, ancient and modern, but what is of much more importance and of greater interest, a keen and sympathetic insight into the reasons for that thought. The present volume does not fail to fulfill our expectations. It should be read by every Christian thinker." --Ralph O. Dates, America

The Legend of Briggs & Stratton

By 1540, piracy, with some encouragement from the English and French governments, was thriving in the Caribbean. Much has been written about the pirates who infested that bubbling cauldron, but very little about the hardiest of them all: the ones who crossed the jungles of Central America and sailed through the perilous Straits of Magellan or around Cape Horn to sack the ports of New Spain and capture the Spanish galleons loaded with riches. At least twenty-five expeditions of foreigners reached the Pacific shores of Central America or Mexico during the period covered by Peter Gerhard's book?from 1575, when John Oxenham left England for those waters, to 1742, when Commodore George Anson sailed against the Spanish fleet in the War of Jenkins' Ear. Pirates of the Pacific brings to life Francis Drake and less civilized English privateers and smugglers, sea-roving Dutchmen like Black Anthony, buccaneers like Henry Morgan, and unnamed but no less vigorous pirates who suffered all manner of hardship for riches and generally died young and poor.
