Fisherman Mark Spitzer takes readers on an action-packed investigation of the most fierce and fearsome freshwater grotesques of the American West ever to inspire both hatred and fascination. Through the lenses of history, folklore, biology, ecology, and politics, Beautifully Grotesque Fish of the American West depicts the environmental destruction plaguing the most maligned creatures in our midst while subtly interweaving Spitzer's experiences of personal tragedy and self-discovery. Join Spitzer as he noodles for flathead catfish in Oklahoma, snags paddlefish in Missouri, trotline- and electro-fishes American eels in Arkansas, studies razorback suckers in Arizona, bounty hunts for pikeminnows in Washington State, attends a burbot festival in Utah, stirs up Asian carp in Kansas, and breaks the state record for the largest yellow bullhead ever caught in Nebraska. By examining freakish links in a vital chain and working with specialists in the field, Spitzer portrays a planet in environmental crisis and dispels the illusion that our actions don't result in long-term, toxic consequences. Spitzer offers models for fisheries and provides other sources of hope in this informative epic of redemption that ultimately celebrates the wild and resilient beauty and remaining possibilities of the American West. James Chavers Jr.'s new book OJIBWE HUNTER is a collection of his true wildlife hunting, fishing and trapping stories that took place on Vince Shute's property before his Black Bear Sanctuary opened near the Bois Forte reservation in Nett Lake, Minnesota. Chavers' best friend of 40 years was Vince Shute whose land bordered the Bois Forte reservation in northern Minnesota. Shute became famous for his daily black bear visitors who were wild, not tame. There is a black bear sanctuary on Shute's former home-site in Orr, Minnesota today. This is where most of the stories take place in Ojibwe Hunter. "Over 30 years on Shute's land, I hunted moose, deer, timber wolves, lynx, bobcats, wolverine, and even shot a few wild dogs. I trapped fisher, rabbit, beaver, otter, muskrat, mink, weasel, raccoon and fox every winter. These true stories happen after I met Vince Shute in 1968 when I am 12 years old," according to Chavers. Charles Grolla, his nephew, contributed different chapters on animals, Traditional Ojibwe Hunting, and a glossary of Ojibwe words for all the animals on their Nett Lake-Bois Fort reservation.

Robert A. Slade, after collecting old fishing tackle since 1958 and contributing articles on old fishing lures for a collector magazine for several years started researching and writing books in the 1990's. He published the HISTORY & COLLECTIBLE FISHING TACKLE OF WISCONSIN in 1999 which sold 4,500 copies. Bob realized that even though there have been many books published on the subject of old fishing lures that few books covered any detailed history on the old lure makers. His latest book writing project was nine years in the making and covers over 100 years of lure making history starting in 1875 and covers over 2,500 lures makers throughout all of North America. THE ENCYCLOPEDIA OF OLD FISHING LURES MADE IN NORTH AMERICA is the first publication with extensive history and patent information on old lure makers and the first to include extensive coverage on Canadian lure makers. The author traveled to 11 states and 3 Canadian Provinces visiting collectors homes, newspaper archives, museums and other sources and has taken over 10,000 pictures in preparing the historical stories for these books. The set of books arranges for the individual and company lures makers to appear in alphabetical order. People purchasing these books can buy any one single book, a whole set, or even a book a month if they desire as the books will be printed and shipped on demand. Each book has over 400 pages of text, pictures and collector values with each book containing a table of contents and index as well as a master index for the complete set of books.

The Penobscot, Penns Creek, the Little River, Guadalupe, Firehole, Copper River--these streams and ninety-four others like them provide the best trout fishing in America say members of Trout Unlimited (TU). With a dozen or more streams in each of eight regions, one of America's one hundred best trout streams flows within a few hours' drive of most of the nation's anglers. These are the rivers that anglers dream of visiting. Describing species, hatches, the flies and lures, and when to fish, each profile contains information and maps that boosts angler success. Profiles present, as well, the environmental challenges facing each stream and the role that TU and others play in protecting the fishery. Extensive interviews with anglers for whom each stream is "home water," add depth to personal observations formed when award-winning writer and angler, John Ross, fished many of these streams himself. Many who buy the book set out to fish all the streams. For others, the guide is an essential ingredient in the planning of fishing and family vacations. It's a book that's as at home next to a fly tyer's bench as it is tucked in the console between the seats of a pickup truck. A portion of the sale of each book goes to Trout Unlimited to help protect and sustain coldwater fisheries.
