This is a lively, practical guide that provides a fascinating linguistic description of six familiar text and discourse types, showing how language works in everyday life to perform its particular purpose. Through original examples, students are introduced to a wide-ranging repertoire of analytical concepts and techniques, described in basic, clear terms, and drawn from a broad range of areas of linguistics and language study. The aim of the book is to enable students to discover for themselves what is interesting about different language situations, and to begin to interrogate the relationship between language, society, and ideology. The Language of Everyday Life includes: topics for discussion; exercises, and; further readings; extensive glossary of technical terms; a practical guide to project work.

The definitive resource for information on air pollution emission sources and the technology available to control them. The Air Pollution Engineering Manual has long been recognized as an important source of information on air pollution control issues for industries affected by the Clean Air Act and regulations in other countries. Thoroughly updated to reflect the latest emission factors and control measures for reducing air pollutants, this new edition provides industry and government professionals with the fundamental, technological, and regulatory information they need for compliance with the most recent air pollution standards. Contributing experts from diverse fields discuss the different processes that generate air pollution, equipment used with all types of gases and particulate matter, and emissions control for areas ranging from graphic arts and chemical processes to the metallurgical industry. More than 500 detailed flowcharts and photographs as well as an extensive listing of Internet resources accompany coverage of: \* Biological air pollution control, including biofilters and bioscrubbers \* Emissions from wood processing, brick and ceramic product manufacturing, pharmaceutical manufacturing, numerous other industrial processes, fugitive
