A newly updated edition for the fast-changing real estate market in Canada! Over the last two decades Canadians have become convinced that real estate is the “safe haven” investment. This widely held belief and obsession with real estate led millions of Canadians to take on massive amounts of debt — tripling their collective financial burden — ensuring that Canada is one of the most indebted nations on the planet. Drawing on dozens of interviews and even more conversations with individual Canadians and couples, this second edition also tackles the economic conditions and regulatory rules that allowed such a dangerous situation to develop in Canada, formerly a nation of conservative and prudent citizens. Hilliard MacBeth argues that Canada is in the midst of an unprecedented real estate bubble and that there will soon be a crash in house prices, triggering a financial crisis. Individual Canadians and families can still take action to protect themselves from the fallout of the bubble bursting — if they act quickly.

Basic Mechanical Engineering

This volume offers insights into ongoing, global socio-economic transformations by directing attention to the significance of labour, work, craft, community, social institutions, social movements and, emergent subjectivities in different parts of the world. This is in contrast to theories that project globalisation as a process driven exclusively by global capital and technology, a scheme in which some parts of the world forever will be ‘peripheries’ supplying labor and natural resources, the lives and work of those people purged of originality, meaning and value by the very construct that describes them. Together the chapters in the book present a non-essentialist and non-linear reading of global transformations by examining the relations and adaptations between economy, polity and society, which remains a fundamentally unresolved question in the social sciences. Combining a wealth of conceptual and empirical investigations, this book will be of interest to scholars and researchers of sociology, globalisation studies, anthropology, economics, development studies, and Area studies.

Performance with Economy

The photos in this edition are black and white. Acclaimed automotive technical writer David Vizard examines the finer points of carburetors and intake manifolds, looking for the smallest of modifications and upgrades which often result in large performance gains. How to Build Horsepower: Volume 2 includes Carter, Holley, Predator, Weber, Dellorto, and Mikuni carbs, dozens of factory and aftermarket manifolds, tunnel ram intakes, etc. Also covers carb calibration methods, analysis of different designs, mixture ration, test results of various carb and intake combinations.

Krause Publications' Standard Catalog series is available by specific marque, in individual volumes or a set. Each book contains in-depth profiles of specific makes by model, factory photos, and up-to-date vehicle pricing. The I-to-conditional pricing system assures readers of accurate values, whether a vehicle is a #1 low-mileage, rust-free beauty or a #6 parts-only heap. "Techs & specs", original factory prices, production and serial numbers, and engine/chassis codes are noted by model, thus helping you determine authenticity accuracy. Historical, technical and pricing information are combined from hundreds of sources. James Flammang values each model according to the popular 1-6 grading system invented by Old Cars magazine.

Chilton's Truck and Van Repair Manual, 1979-86

Originally published in 1955 and based on research of public records and other contemporary sources, this book builds up an excellent picture of England before the Civil War. Through a series of case studies, it examines the type of person who emigrated to New England and their motivation for doing so. The wealth of evidence from original documents is clearly arranged and provides a refreshing reassessment of the period, showing that although religious conviction was a clear motive for emigration, the Puritan were also seeking security from hardships of other kinds.
