This book provides developers, engineers, researchers and students with detailed knowledge about the High Efficiency Video Coding (HEVC) standard. HEVC is the successor to the widely successful H.264/AVC video compression standard, and it provides around twice as much compression as H.264/AVC for the same level of quality. The applications for HEVC will not only cover the space of the well-known current uses and capabilities of digital video – they will also include the deployment of new services and the delivery of enhanced video quality, such as

ultra-high-definition television (UHDTV) and video with higher dynamic range, wider range of representable color, and greater representation precision than what is typically found today. HEVC is the next major generation of video coding design – a flexible, reliable and robust solution that will support the next decade of video applications and ease the burden of video on world-wide network traffic. This book provides a detailed explanation of the various parts of the standard, insight into how it was developed, and in-depth discussion of algorithms and architectures for its implementation.

En esta “novela de no ficción”, Camila Fabbri busca la manera de narrar una tragedia que irrumpió en la vida de una ciudad, pero sobre todo en la de miles de adolescentes para quienes Cromañón representó el fin de la inocencia. Fabbri estuvo en el recital de Callejeros la noche previa a ese fatídico 30 de diciembre de 2004. Enseguida supo del incendio que arrasó con tantos chicos, envenenados por el humo negro en el momento preciso del pogo, de la exaltación, de la felicidad compartida. Quince años después, la escritora posa la mirada sobre la chica rolinga y claustrofóbica que era entonces y entrevista a amigos, amigas, padres, madres y testigos, para indagar en la forma que toma un drama colectivo en el tiempo y en ese dolor, a la vez personal e identitario. El día que apagaron la luz es una ficción verdadera sobre los sueños y las pesadillas que poblaron las cabezas de esos jóvenes, una crónica fragmentada sobre los modos de construirse adulto y un relato emocionante sobre la confusión de vivir. Fabbri escribe una novela de voces múltiples, pero siempre cerca de la adolescente que fue. Y con la literatura como posibilidad, vuelve a preguntarse por ese día en que su generación se topó con la muerte.

### **Statistical Abstract of Ireland**

This book focuses on participatory capacity-building in ways that address the practical needs and strategic interests of the disadvantaged and disempowered - it examines how differences in class, ethnicity, race, caste, religion, age and gender lead to the 'politics of exclusion'. It offers innovative, accessible tools to enable facilitators from both inside and outside communities to empower those who are

frequently omitted from decision-making processes. The style and approach are interactive, stimulating reflection and involvement by all parties. Power, Process and Participation aims to enable facilitators from inside and outside communities to involve and empower those commonly excluded in decision making processes. It provides a balanced overview of how 'participation' has been used in this context and raises the questions that all those involved in this type of activity should ask themselves. There are three distinct sections: Part 1: Definitions, history and issues - which provides an overview of some of the broad issues underlying the themes addressed in this book. A useful brief history is given of well known participatory methodologies and key questions are asked on the use and misuse of 'participation': whose ends does it serve, who is involved and what are the power relations, appropriate time frames and scale and how should it proceed in order to best serve the interests of the people involved? Part 2: Methods and ethics in our research and our use of the mediaN251pp - Whose expertise counts? How is it acknowledged? These are explored in the context of contributors' experience of undertaking research with women in Zimbabwe. Questions of ownership and consent as well as other issues are discussed further in the context of the use of video in participatory communication. Part 3: Tools for environmental and social change - The longest section in the book gives 35 tools and how to use them in facilitating participation. An introductory session explains how to use the section. Tools are cross referenced and for each the purpose, materials, process and estimated time is provided. For a number of the tools, examples of how they have been used in practice are included. Power, Process and Participation describes itself as a manual and although it does not immediately look like one, it is readable, logically arranged and combines instructions on how tools can be used with examples of how they have been used in practice. There are notes on how to use the book and how to choose from the tools offered. This book would be useful to anyone looking for both an overview of participation and how it can be used and misused; and guidance on facilitating the process.

With the increase of globalization of business and industry, IT products and services are often produced and marketed across geographical cultural boundaries without adequate consideration of culture. There is a high probability that IT products and services developed in one country may not be effectively used in another country, which may hinder their market penetration, sales, and use. Based on research and practice, *Cross-Cultural Design for IT Products and Services* provides a resource for human factors engineers, designers, and marketing professionals who define and develop IT products and services for the global market. With its extensive review of cross-cultural theory and cross-cultural design literature, it is also a resource for those who are interested in research on cross-cultural design. The book presents an overview of the dimensions of culture that have implications for human information processing and affective response. It examines a set of user interface design guidelines grouped into five areas: language, use of color, icons and images, navigation, and information architecture. Also, it addresses physical ergonomics and anthropometry issues. The text translates theory and guidelines into a practical methodology and discusses how to integrate methods of cross-cultural design into a standard engineering process for product development. The authors review and reappraise theories, models, principles, and techniques for design of IT products and services that will be marketed globally. They provide guidelines for user interface design across North American, Asian, and other cultures. Applying the guidelines within the methodological framework provided will enhance the usability and effectiveness of the IT product or service, and contribute to greater user satisfaction, increased productivity, higher sales, and lower product support costs.
