The Planet Had No Name! When the exploratory starship from Earth PolarStar crashed in the ice-covered mountains of the nameless planet the few survivors who made it to the warmer lowlands had no idea just how hostile this world could be. The plants were poisonous or actively hunted them, the animals were not all that friendly either. Most of them died. Some had children. Twenty years have passed and the small settlement between the endless forest and the ice-covered mountains is set for a major change. They have started to dream of rescue, of rejoining the human race, of going back to the stars. But to do that, they will have to risk everything, the lives of their children, and their loves.

Too Black, Too Strong

Book VIII of the Aeneid presents a crucial turning point in the mythological foundation of Rome, with clear political resonances for the future Augustan regime. Set on the verge of war between the Latins and Aeneas' Trojan forces, it describes Aeneas' visit to the future site of Rome, where he enlists the help of the Arcadian King Evander for the forthcoming war. In confirmation of the gods' support for Aeneas, his mother Venus presents her son with new armour, including a shield depicting key events in the future history of Rome. Their climax is Augustus' victory at Actium over the forces of Mark Antony and Cleopatra. This new edition makes the Latin text accessible to students, with commentary notes providing ample linguistic help, explanation of difficult words and phrases, a glossary of grammatical and literary terminology, and a full list of vocabulary and proper names. The in-depth introduction sets the work in its literary and historical context, and provides an overview of Virgil's metrical and stylistic points.

The master of ancient Greek comic drama, Aristophanes combined slapstick, humour and cheerful vulgarity with acute political observations. In *The Frogs*, written during the Peloponnesian War, Dionysus descends to the Underworld to bring back a poet who can help Athens in its darkest hour, and stages a great debate to help him decide between the traditional wisdom of Aeschylus and the brilliant modernity of Euripides. The clash of generations and values is also the object of Aristophanes' satire in *The Wasps*, in which an old-fashioned father and his loose-living son come to blows and end up in court. And in *The Poet and the Women*, Euripides, accused of misogyny, persuades a relative to infiltrate an all-women festival to find out whether revenge is being

Small Business Management: Entrepreneurship and Beyond

This is the OCR-endorsed publication from Bloomsbury for the Latin AS and A-Level (Group 1) prescription of Annals Book I sections 16–30 and the A-Level (Group 2) prescription of Annals Book I sections 3–7, 11–14 and 46–49, giving full Latin text, commentary and vocabulary, with a detailed introduction that also covers the prescribed text to be read in English for A Level. Annals I starts with the death of Augustus and the beginning of Tiberius' principate. Tacitus chronicles the uneasy and unprecedented transition from one to the other, in the context of a political elite shaken by years of civil war and unsure as to how best to protect their own interests and the stability Augustus had brought to Rome. With damning references to the servile nature of the new regime, Tacitus vividly paints scenes of confused senatorial debates, and Tiberius' own uncertainty over his own position and the best decisions to make. Opportunistic rebellions in the army are described with dramatic brilliance.

Good Derivatives

Through the eyes of an inventor of new markets, *Good Derivatives: A Story of Financial and Environmental Innovation* tells the story of how financial innovation – a concept that is misunderstood and under attack – has been a positive force in the last four decades. If properly designed and regulated, these “good derivatives” can open vast possibilities to address a variety of global problems. Filled with provocative ideas, fascinating stories, and valuable lessons, it will provide both an insightful interpretation of the last forty years in capital and environmental markets and a vision of world finance for the next forty years. As a young economist at the Chicago Board of Trade, Richard Sandor helped create interest rate futures, a development that revolutionized worldwide finance. Later, he pioneered the use of emissions trading to reduce acid rain, one of the most successful environmental programs ever. He will provide unique insights into the process of creating these new financial products. Covering successes and failures, the story describes the tireless process of inventing, educating and creating support

for these new inventions in places like Chicago, New York, London, Paris and how it is unfolding today in Mumbai, Shanghai and Beijing. The book will tell the story of the creation of the Chicago Climate Exchange and its affiliated exchanges (European Climate Exchange, Chicago Climate Futures Exchange and Tianjin Climate Exchange, located in China). The lessons learned in these markets can play a critical role in effectively addressing global climate change and other pressing environmental issues. The author argues that market-based trading systems are a far more effective means of reducing pollutants than “command-and-control”. Environmental markets may ultimately help to find solutions to issues such as rainforest destruction, water problems and biodiversity threats. Written in an engaging, narrative style, *Good Derivatives* will be of interest to both practitioners and general readers who want to better understand the creative process of financial innovation. In the middle of so much distrust of markets, it is also a recipe of how transparent, well-regulated markets can be a force for good in the environmental, health, and social areas.
