Urban and Community Forestry in the Northeast

Under the banner of the Fourth, Fifth and Sixth Amendments, the Supreme Court of America has constitutionalized vast areas of criminal procedure law in ways that often reward the guilty whilst hurting the innocent. This book reconceptualizes the basic foundations of the criminal procedure field.

Cummings Otolaryngology - Head and Neck Surgery E-Book

The only book of its kind to cover both the Achaemenid period and the thousand years following Alexander's conquest, *The Persians* explores the period from the seventh century BC, to the seventh century AD, and presents a comprehensive introduction to ancient Persia. Incorporating recent research, and translated sources from a wide range of corpus material, Maria Brosius explores the history of Persia, and brings a new understanding of Persian society and culture and the structures on which these empires were built: the king and his court; religion and culture; art and architecture. From the lands of Egypt to the Indus River, from the Russian Steppes to the Indian Ocean, Brosius has provided an up-to-date account of the three empires of pre-Islamic Iran, and discussing key topics such as women, religion and art and architecture, she presents a clear survey of the history of these empires. Providing additional reading references along with frequent source citations, students of ancient Persia will find this an invaluable addition to their course studies.

Fear of the Animal Planet

A dazzling story about marriage, forgiveness, and chances not taken, by the bestselling author of *Body Surfing* and *A Wedding in December*. At a literary festival a poet named Linda Fallon meets for the first time in years a fellow poet, Thomas Janes, whose fame has grown during a decade of seclusion. This is no chance meeting. Thomas saw that Linda was scheduled to appear, and chose this moment to re-establish contact with a woman he had passionately pursued years earlier. Their affair was disastrous for them both, a turning point in their lives, and the damage they did in those years still haunts them both. *THE LAST TIME THEY MET* moves backward in time from Linda at age 52 to explore her life years earlier, at age 26, and still earlier, at 17. Anita Shreve examines the extraordinary resonance a single choice, even a single word, can have over the course of a lifetime.

Private Prisons and Police

The mainland and islands of Greece were extensively settled by peoples moving from Asia Minor in c.5000 BC, while a further wave in c.5000 BC introduced bronze-working to the region. It is from this point on that it is possible to discern a distinct Cycladic or Aegean civilisation, developing at roughly the same time as the Egyptian and Persian civilisations. Further to the south, the Minoan civilisation based on Crete held sway, and this power – along with the Helladic Achaeans to the north gradually swamped the Cycladic civilisation in between. In common with most Bronze Age societies, the culture of the Aegean world was dominated by warfare, with the inhabitants living in organized settlements and small citadels with fortification walls and bulwarks, towers and gates to provide protection against invaders from the sea or internecine conflicts. Using the latest archaeological evidence, this title recreates the world of these peoples through a detailed examination of their material culture.

The increased use of private policing has led to a growing awareness that policing can no longer be thought of as just being about crime, but as the enforcement of order and the way it can be both established and maintained. *Private Policing* charts the development of social control mechanisms -- both public and private -- from historical, legal, ethical and managerial perspectives.

The Voice Book

In this wickedly funny first novel-think Legally Blonde in Oxford-a young New York woman exchanges her corporate job for a year of books, blokes, beers, and new best friends in graduate school in England. Alexandra Brennan is fed up with her dead end New York City job-and even more fed up of running into her smug ex-boyfriend. So when he crosses the line by telling her that she'll never get into graduate school in the United Kingdom, that's precisely what she does. Armed with imported cigarettes and extra strength coffee, Alex leaves home and crosses the Atlantic to face all that Great Britain and grad school have to offer, including ill-considered romantic interludes, a red-headed nemesis with intellectual pretensions and ulterior motives, a preponderance of eighties music, and more books than she can possibly read in a year. What she discovers, however, is that instead of running away from home - she may have actually found it. With a cheeky sense of humor and terrific cast of characters, ENGLISH AS A SECOND LANGUAGE is a funny and irreverent novel about a young woman's misadventures on the path to adulthood.

Medical Terminology

A collection of contributions by prominent Ciceronian scholars on Cicero's forensic speeches as examples of advocacy designed to secure a verdict, setting the speeches in the context of the Roman court system and of ancient rhetoric, discussing the nature of advocacy ancient and modern, analysing Cicero's various techniques of persuasion, and examining a number of speeches in detail as case studies.

The Last Time They Met

Privatization--the transfer of responsibility for public services from the public to the private sector--currently evokes intense interest from policy makers. To its advocates, privatization conjures up visions of a lean, streamlined public sector reliant upon the private marketplace for the delivery of public services. To opponents, it conjures up visions of a beleaguered government bureaucracy ceding vital public services to unreliable entrepreneurs. At best, privatization can reduce the costs

of government and introduce new possibilities for the better delivery of services. At worst, it may undermine equity, quality, and accountability. In *Privatization and Its Alternatives* distinguished scholars from several social science disciplines evaluate privatization efforts in the United States and abroad, and at different levels of government: federal, state, and local. They look primarily at three important policy areas--education, housing, and law enforcement--that sharply illustrate the dilemmas facing policy makers as the debate about privatization shifts from the delivery of "hard" services, such as refuse collection, to human services. Contributors have very different perspectives: some are enthusiastic about privatization, others are very skeptical indeed. None of these papers has been published elsewhere; the volume developed from a 1987 conference on privatization sponsored by the La Follette Institute of Public Affairs at the University of Wisconsin-Madison. A particular strength of this collection lies in its consideration of alternative forms of service delivery. The privatization of public housing, for instance, may involve subsidies to the poor (vouchers), tenant management (a hybrid form of privatization), or outright sale. How, and how well, have such policies worked? Examples from other countries may prove especially enlightening: the English sale of public housing to tenants is one of the largest asset sales in the entire privatization movement; Australia has experimented with public subsidies to private schools; and Japan has experimented with the privatization of law enforcement and corrections. These issues are the subject of lively public debate in the United States today and are discussed at length in this volume. Thus *Privatization and Its Alternatives* speaks not only to scholars of public policy but also to a wide range of practitioner who must decide whether or how to privatize.

The Neurosurgeon's Handbook

A compact, readable and highly-authoritative source of critical neurosurgical information, Neurosurgery has been produced with the participation of some of the world's leading neurosurgeons and neuroclinicians and is based on the curriculum of British, European and North American neurosurgical training programs. The book is extensively illustrated with hundreds of figures demonstrating the imaging features of all major neurosurgical pathologies, including diagrams explaining key anatomical and surgical concepts, and images showing the features of common brain tumours. There are key references at the end of each chapter and critical commentary of neurosurgical literature is also included. The handbook concisely covers all aspects of adult and paediatric neurosurgery. It is systematically and clearly broken down into easy-to-follow sections such as introductory basic concepts, definitions, epidemiology, pathology, clinical and neuroradiological characteristics, clinical management and decision making. Additional sections on operative treatment include the key critical surgical anatomy, and clear, step-by-step descriptions of common surgical techniques. Widely accepted practice guidelines, major classification schemes and common scales are clearly presented and explained.

The French for Always

As more areas of government experience budget problems, the search for efficient and cost effective services has intensified. Private sector involvement is under heavy consideration. Twenty-eight original essays reflect expert opinions in three areas: police, adjudication, and corrections. Included are two reprinted articles, by Warren Burger, former Chief Justice of the United States and Richard Nealy, Chief Justice of the West Virginia Supreme Court. Perspectives range from desirability to implementation. Part one analyzes public and private provision of the various police functions with an

evaluation of private police services. Part two focuses on the supply of private judiciary services in civil cases. Part three looks at privatizing correctional services, from supplies to complete private management.

This volume offers a substantial discussion of ancient monarchies from the viewpoint of the ruler's court.

The Future of Policing

A career-spanning selection of previously uncollected writings and talks by the legendary author and activist No one did more to change how we look at cities than Jane Jacobs, the visionary urbanist and economic thinker whose 1961 book *The Death and Life of Great American Cities* started a global conversation that remains profoundly relevant more than half a century later. *Vital Little Plans* is an essential companion to *Death and Life* and Jacobs's other books on urbanism, economics, politics, and ethics. It offers readers a unique survey of her entire career in forty short pieces that have never been collected in a single volume, from charming and incisive urban vignettes from the 1930s to the raw materials of her two unfinished books of the 2000s, together with introductions and annotations by editors Samuel Zipp and Nathan Storrington. Readers will find classics here, including Jacobs's breakout article "Downtown Is for People," as well as lesser-known gems like her speech at the inaugural Earth Day and a host of other rare or previously unavailable essays, articles, speeches, interviews, and lectures. Some pieces shed light on the development of her most famous insights, while others explore topics rarely dissected in her major works, from globalization to feminism to universal health care. With this book, published in Jacobs's centenary year, contemporary readers—whether well versed in her ideas or new to her writing—are finally able to appreciate the full scope of her remarkable voice and vision. At a time when urban life is booming and people all over the world are moving to cities, the words of Jane Jacobs have never been more significant. *Vital Little Plans* weaves a lifetime of ideas from the most prominent urbanist of the twentieth century into a book that's indispensable to life in the twenty-first. Praise for *Vital Little Plans* "Jacobs's work . . . was a singularly accurate prediction of the future we live

in.”—The New Republic “In *Vital Little Plans*, a new collection of the short writings and speeches of Jane Jacobs, one of the most influential thinkers on the built environment, editors Samuel Zipp and Nathan Storrington have done readers a great service.”—The Huffington Post “A wonderful new anthology that captures [Jacobs’s] confident prose and her empathetic, patient eye for the way humans live and work together.”—The Globe and Mail “[A timely reminder] of the clarity and originality of [Jane Jacobs’s] thought.”—Toronto Star “[*Vital Little Plans*] comes to the foreground for [Jane Jacobs’s] centennial, and in a time when more of Jacobs’s prescient wisdom is needed.”—Metropolis “[Jacobs] changed the debate on urban planning. . . . As [*Vital Little Plans*] shows, she never stopped refining her observations about how cities thrived.”—Minneapolis Star Tribune “[Jane Jacobs] was one of three people I have met in a lifetime of meeting people who had an aura of sainthood about them. . . . The ability to radiate certainty without condescension, to be both very sure and very simple, is a potent one, and witnessing it in life explains a lot in history that might otherwise be inexplicable.”—Adam Gopnik, *The New Yorker* “Essential reading . . . [Jacobs’s] observational genius, practical wisdom, and moral courage are on full display here.”—Matthew Desmond, *New York Times* bestselling author of *Evicted*

The Constitution and Criminal Procedure

There are a number of very real dilemmas confronting those thinking about the future of policing in Britain and this succinct, pithy book offers a critical examination of the key issues. Among the vital questions considered are: how are the police to break out of the current cycle of rising costs and, in some people's eyes, declining productivity?; should criminal procedure be amended, as the police wish, in order to increase the likelihood of convicting and sentencing persistent offenders?; would the consequences of this be to further alienate from the police the more disadvantaged sections of the community? Perhaps the key issues facing policing in modern Britain can be summarised in the following way: how is the apparently insatiable demand by the public for more policing and better protection to be satisfied, given the continued limits on public spending; that there is concern that what the public demands may not have a significant effect on crime levels; and that further extension of police powers and the reach of the law could themselves have unwanted consequences. All these questions are posed and answered on the basis of the wealth of research and operational evidence gathered by the police service itself, the Home Office, and independent researchers. The book is comprehensive in its examination of all the issues outlined above, but it is jargon-free and accessible, thus ensuring its appeal to the general, well-informed reader as well as to students of criminology, criminal justice, social policy, and those enrolled in police studies courses, and policy-makers.

Privatization and Its Alternatives

these are just two of the issues addressed by Les Johnston, who argues that policing, far from being the exclusive preserve of public personnel, is an activity undertaken by a mixture of public, private, and quasi-public agents. His book reviews the history of private policing, examines developments of current concern, and finally considers the implications of these developments both for the sociology of policing and for a more general understanding of public-private relations in the late 20th century.

Peter and the Moon

This book is a textbook for Urban/Community Forestry courses and a handbook for Shade Tree Commissions, tree wardens, State and National Forestry Services, and professional societies. It is the most complete text in this field because it addresses both culture and management, and the chapters have been written by experts who are active practitioners. The book provides observations and examples relevant to every urban center in the U.S. and elsewhere.

The American Law of Torts

Ancient Greek writers on Persian history give us a glimpse of the influential role played by some individual women at these courts, but these are sporadic and hardly reliable accounts of a few colourful femme fatales in the royal family, designed to

show up the scandalous machinations of barbarian women gaining political control and causing the decline and effeminacy of the Persian kings. This book is the first to demonstrate the true importance of not only royal but non-royal women in Persia, with the benefit of contemporary Persian and Babylonian sources.
