This reader-friendly sixth edition of *Composing with Confidence* focuses on the writing of paragraphs and essays within the composing process. Readers are guided step by step through the process, but are provided with options in prewriting, discovery, outlining, and predicting. Each chapter in the unit on the rhetorical modes offers academic and professional model paragraphs and essays, along with a well-wrought paragraph assignment, an optional essay writing assignment, and at least five alternative assignments. A new chapter, *Writing on the Job*, offers instruction in and models of a job application letter, a risumi, and two memos. A repeated feature offers practice in summarizing, paraphrasing, quoting, and arranging material from outside sources. And two new features, *Blueprints for Writing* and *Unit Summaries*, offer quick visual summaries of the most important points of the chapter or unit. A full unit on sentence-level issues of grammar and mechanics offers instruction in only those skills that are needed to make writing clear and grammatically correct. Each chapter in the unit ends with two "Editing for Mastery" exercises. "Tips" boxes and "If Your First Language Is Not English" boxes also provide short, specific, and practical advice. The book retains its most popular feature: fast-paced, high-interest, continuous discourse materials that makes it fun to read and work with. For those interested in developing their

writing skills at the paragraph to essay level.

Due to changing business scenarios, companies need to manage their economic resources efficiently to secure a stable position in the market. This is possible when financial management techniques are blended with strategic management concepts. This book discusses the basics of strategic management as well as financial management and explains how businesses can formulate strategies to pursue their financial objectives and strengthen their financial position. The book is divided into five sections. Section I introduces students to the fundamentals of strategic management and financial management. Section II explains the techniques of portfolio tools, Markowitz modern portfolio theory, capital asset pricing model, factor models and arbitrage pricing theory. Section III discusses investment decision under risk and uncertainty, corporate strategy and high technology investment. Section IV focuses on tools and techniques of analysis and interpretation of financial statements, corporate valuation and value-based management. Section V dwells on

contemporary issues in strategic financial management such as corporate restructuring, mergers and acquisitions. The book is intended as a text for postgraduate students of management. In addition, students pursuing professional courses such as chartered accountancy, MFC, as well as professionals in the corporate sector will find the book useful. Key Features: Provides solved practical problems and examples Provides tables, flow charts and diagrams to make concepts clear Includes chapter-end questions and problems to test students' knowledge Supports theory with caselets to put the matter in the right perspective

Gaining Word Power helps readers build and retain better vocabularies and become more effective strategic readers. Based on more than thirty years of the author's teaching experience, this comprehensive vocabulary book generates a basic college-level vocabulary quickly, effectively, and pleurably. It incorporates a number of proven vocabulary-building approaches that are grounded in sound learning theory. In each self-contained lesson, words are presented on graduated levels of difficulty, followed by challenging exercises and writing activities, then reinforced by immediate access to solutions. This enables readers to progress at their own pace and evaluate their progress. Although this text has a distinct pedagogical structure, a variety of practices, crossword puzzles, writing exercises, analogy activities, and numerous cartoons throughout challenge readers to learn using a variety of strategies while continuously emphasizing the reading-writing connection. For those seeking to develop their vocabulary and reading skills.

The Reading Context provides extensive reading skills practice at a new value price of under \$25. Designed for developmental reading courses (Grades 9□), The Reading Context emphasizes reading as a three—step “prepare — read —respond” process. The book starts where developing readers need to start: with an explanation of the context created by author, work, and reader. It also stresses the importance of thinking about who the writer is, what the author's purpose is, what kind of work students are about to read, and what they can expect to gain from it. Reading selections have been chosen to hold student interest while representing the kinds of material they will meet in college assignments —textbook material from business to psychology, from advertising to history, from health to education. Chapters are filled with short prose pieces for illustration and practice, and each chapter concludes with two or three longer reading selections. In each chapter, clear

explanations of each reading skill are supported by numerous exercises.
