**Effective Resumes for Executives and
Specialized Personnel**

The social probability theories, and historical & natural observations contained in this book were developed over many years and others are based on observations and current events in history. I have also included two new products I discovered while living in my native country of Saint Lucia. Additionally, I review the world, its beauty, and its history. Humanity has reached a milestone. While in Saint Lucia, I noted several alien sightings and have shared my observations of these sightings through this book. I reviewed many natural and historical observations, have looked at the world, and saw the wonder it contains. The reader will see references to "Mind Probe technology". This technology is used by governments with the technology to conduct systematic checks on people of interest. I became aware of the technology while living in Saint Lucia because of the alien sightings, I witnessed and the conclusions I drew from those sightings. It is imperative that, as a society, we do not perceive these alien visitors as a threat. It is my summation that they can be the harbingers of great technology and enhanced medical care that will benefit humanity. I hope that with the writing of this book, the scientific community and committee that discusses these phenomena will welcome me as a member because I believe I can contribute greatly to their investigation of the alien presence that I surmise have been visiting earth for thousands if not millions of years.

The Beginning Engineer's Role

Petroleum Engineer for Management

SEATEC

Stanford Bulletin

Each book's company profiles include: full company name, address, and telephone number; contacts for professional hiring; listings of professional positions commonly filled; educational backgrounds sought; fringe benefits offered; and internships offered. Also provided are sections on job search techniques, tips on writing resumes and cover letters, executive search firms and placement agencies, professional associations, and more.

Oils and Gas Journal

Hispanic Engineer & Information Technology is a publication devoted to science and technology and to promoting opportunities in those fields for Hispanic Americans.
