A Treatise on the Social Compact, Or, The Principles of Political Law

Master the Civil Service Exams

Our American Government textbook adheres to the scope and sequence of introductory American government courses nationwide. We have endeavored to make the workings of American Government interesting and accessible to students while maintaining the conceptual coverage and rigor inherent in the subject at the college level. With this objective in mind, the content of this textbook has been developed and arranged to provide a logical progression from the fundamental principles of institutional design at the founding, to avenues of political participation, to thorough coverage of the political structures that constitute American government. The book builds upon what students have already learned and emphasizes connections between topics as well as between theory and applications. The goal of each section is to enable students not just to recognize concepts, but to work with them in ways that will be useful in later courses, future careers, and as

engaged citizens. The organization and pedagogical features were developed and vetted with feedback from American government instructors dedicated to the project.

From civil rights to Ferguson, Franchise reveals the untold history of how fast food became one of the greatest generators of black wealth in America. Often blamed for the rising rates of obesity and diabetes among black Americans, fast food restaurants like McDonald's have long symbolized capitalism's villainous effects on our nation's most vulnerable communities. But how did fast food restaurants so thoroughly saturate black neighborhoods in the first place? In Franchise,

acclaimed historian Marcia Chatelain uncovers a surprising history of cooperation among fast food companies, black capitalists, and civil rights leaders, who—in the troubled years after King’s assassination—believed they found an economic answer to the problem of racial inequality. With the discourse of social welfare all but evaporated, federal programs under presidents Johnson and Nixon promoted a new vision for racial justice: that the franchising of fast food restaurants, by black citizens in their own neighborhoods, could finally improve the quality of black life. Synthesizing years of research, Franchise tells a troubling success story of an industry that blossomed the very moment a freedom movement began to wither.
