Manual for Pharmacy Technicians

Can you remember, pronounce, and spell the active ingredient in the last medicine you took or gave your child? If you're an administrator, can everyone in your facility who provides patients with medications spell and pronounce those medications correctly? If you have any doubt-whether you're reading this book in a doctor's office, a pharmacy, or a hospital room-I wrote this book for you. A revolution is happening in health care. In the past, nurses, pharmacists, and doctors spoke together at length with families about their concerns and medicines. But now, patients receive only distracted attention as their health professionals tangle with billing, electronic records, and insurance obstacles. This shortened communication frustrates doctors and patients who want to connect. Patients find themselves isolated because they don't speak the language of medicine. This book teaches you that language with plain English words.

An emphasis is placed on practical applications for the technician. What types of issues will technicians encounter at work? What is their role in patient education? Fundamentals of Nursing

I've had feedback from students that they just want me to read them drug names and mnemonics so they can put in their earbuds before they go to bed before their board exams. I've got three five year olds, I don't have time to do the heavy lifting you all do as narrators. In Memorizing Pharmacology: A Relaxed Approach, which will sell over 6,500 audiobook copies in its first year, I only had the narrator complete 200 drug names in a seven hour book. There is a list of 350 later in the book, but I thought, who in the world would want to listen to 350 drug names in a row? So I omitted it. There was an answer to that rhetorical question, health professional students studying for a board exam that are exhausted from family, work, and school want to listen to it. This print, book, however, provides a journal for you to continue to add knowledge you pick up as you complete your pharmacology class, clinicals, or even an interesting commercial or YouTube video.
