A NEW YORK TIMES, WASHINGTON POST, USA TODAY, AND PUBLISHERS WEEKLY BESTSELLER “[A] diverse and enlightening book . . . The 99% Invisible City is altogether fresh and imaginative when it comes to thinking about urban spaces.” —The New York Times Book Review “Here is a field guide, a boon, a bible, for the urban curious. Your city’s secret anatomy laid bare—a hundred things you look at but don’t see, see but don’t know. Each entry is a compact, surprising

story, a thought piece, an invitation to marvel.

Together, they are almost transformative. To know why things are as they are adds a satisfying richness to daily existence. This book is terrific, just terrific.”

—Mary Roach, New York Times bestselling author of *Stiff*, *Grunt*, and *Gulp* “The 99% Invisible City brings into view the fascinating but often unnoticed worlds we walk and drive through every day, and to read it is to feel newly alive and aware of your place in the world. This book made me laugh, and it made me cry, and it reminded me to always read the plaque.”

—John Green, New York Times bestselling author of *The Fault in Our Stars* and *Turtles All The Way Down* A beautifully designed guidebook to the unnoticed yet essential elements of our cities, from the creators of the wildly popular 99% Invisible podcast Have you ever wondered what those bright, squiggly graffiti marks on the sidewalk mean? Or stopped to consider why you don't see metal fire escapes on new buildings? Or pondered the story behind those dancing inflatable figures in car dealerships? 99% Invisible is a big-ideas podcast about small-seeming things, revealing stories baked into the buildings we inhabit, the streets we drive, and the sidewalks we traverse. The show celebrates design and architecture in all of its functional glory and accidental absurdity, with intriguing tales of both designers and the people impacted by their designs. Now, in *The 99% Invisible City: A Field Guide to Hidden World of Everyday Design*, host Roman Mars and coauthor Kurt Kohlstedt zoom in on the various elements that make our cities work, exploring the origins and other fascinating stories behind everything from power grids and fire escapes to drinking fountains and street signs. With

deeply researched entries and beautiful line drawings throughout, *The 99% Invisible City* will captivate devoted fans of the show and anyone curious about design, urban environments, and the unsung marvels of the world around them.

When artists and designers explore or create a fictional setting, the milieu must be completely fleshed out, explained, and designed. In this book, comic and gaming art veteran Mark A. Nelson explores and demonstrates his methods for fashioning visually stunning, believable environments for fantasy creatures and characters. Scores of images and step-by-step examples illustrate how variation and experimentation lead to fresh, original designs for otherworldly beings, their environments, and their stories. Nelson discusses how to find ideas and borrow from history to add the strength of realism to a fantasy world. In describing the best ways to establish a habitat, he offers specifics about climate, terrain, flora, and wildlife. He shares insights into founding societies in terms of their means of survival, manner of warfare, spiritual practices, style of dress, and levels of technology. All visual creatives who work with imaginative material — illustrators, comic artists, and writers — will take a lively interest in this source of inspiration and practical knowledge.

### **Hidden Universe Travel Guides: Star Trek**

The challenges to humanity posed by the digital future, the first detailed examination of the unprecedented form of power called "surveillance capitalism," and the quest by powerful corporations to predict and control our behavior. In this masterwork of original thinking and research, Shoshana Zuboff provides startling insights into the phenomenon that

she has named surveillance capitalism. The stakes could not be higher: a global architecture of behavior modification threatens human nature in the twenty-first century just as industrial capitalism disfigured the natural world in the twentieth. Zuboff vividly brings to life the consequences as surveillance capitalism advances from Silicon Valley into every economic sector. Vast wealth and power are accumulated in ominous new "behavioral futures markets," where predictions about our behavior are bought and sold, and the production of goods and services is subordinated to a new "means of behavioral modification." The threat has shifted from a totalitarian Big Brother state to a ubiquitous digital architecture: a "Big Other" operating in the interests of surveillance capital. Here is the crucible of an unprecedented form of power marked by extreme concentrations of knowledge and free from democratic oversight. Zuboff's comprehensive and moving analysis lays bare the threats to twenty-first century society: a controlled "hive" of total connection that seduces with promises of total certainty for maximum profit--at the expense of democracy, freedom, and our human future. With little resistance from law or society, surveillance capitalism is on the verge of dominating the social order and shaping the digital future--if we let it.

This book is a celebration of some of the greatest player bats in the hobby, and some of the bats used to illustrate each two-page spread are extraordinary relics of our National Pastime. At the very least, these bats provide us with a greater insight about the players that used them, including their habits, traits and idiosyncrasies. At the other end of the spectrum, they provide us with a direct connection to the player, and transport us back in time to the place, and in many cases, the very moment that some of our fondest memories of baseball exist.
