This book will show you how a simple writing tool can easily be turned into an effective self-defense weapon with just a little knowledge, practice, determination and imagination. This is to my knowledge, the first manual ever written that deals

primarily with the use of the pen as a self-protection tool. Some of the areas this book will cover include choosing the best pen for self-defense, carrying methods, how to grip the pen for most effectiveness, the right to self-defense and the law, vulnerable areas of the body and specific techniques and tactics to use the pen for self-defense. When you finish this text, you will be more aware and confident in your ability to defend yourself using a simple pen or pencil. The key to defending yourself must always begin with the realization that your own body has numerous areas that can be used as a self-defense tool.

Below the Belt

Traditional and nontraditional impact weapons are described, and their offensive and defensive uses are outlined. Legal and moral aspects are considered as well as tactical aspects of police self-defense. The weapons considered are nightsticks or batons, short billies, saps, combination impact weapons, the yawara and riot sticks, sap gloves and palm saps, and the nunchaku. Nontraditional impact weapons considered are the sidearm, flashlight, handcuffs, and makeshift impact weapons. The nature and use techniques of police impact weapons are discussed along with the psychology of relying on impact weapons, the tactics to be employed before and during their use, and methods of training in the use of the weapons. Legal and moral factors, including civil liability, are reviewed. Parameters of lethal force are discussed. The final section provides practical information on the application and use of impact weapons. Suggestions are presented for methods of carrying the weapons in the vehicle, on the person, and in belt carriers. The proper time to draw the impact weapon is discussed as well as the parts of the body which can be struck to effectively stop an attacker. Techniques to use in the case of an attack by several unarmed opponents are also outlined. Aspects of footwork and uses and complications involved in using the sleeper hold are considered. The text offers instructions for home practice of impact weapon techniques. Photographs are included.

Here is a book the average citizen will love and the politicians of all the major parties will probably hate. This is a book that gives equal criticism to democrats, liberals, far left liberals, republicans, conservatives, far right conservatives and

libertarians. Some of the material covered in this book include: The inherent evil of politics; the arrogance of power; why you should never trust a politician who always seeks to raise your taxes, who constantly uses religion or God in their speeches, who does not fully support the second amendment and the right to self-defense. Other questions explored in this book include: What is wrong with the democratic party? What is wrong with the republican party? What is wrong with the libertarian party? This is a book for people who are tired of being lied to and conned by politicians who enjoy insulting your intelligence. This is a book for independent minded, thinking individuals who refuse to be led by the nose by any political party or radical political group.

Howdunit Book of Police Procedure and Investigation

This book covers Defensive Baton issues for law enforcement officer. The goal is for the officers to understand and demonstrate the tactical fundamentals of the baton, in an operational setting, and its proper use as an intermediate impact weapon. One of the major dilemmas facing law enforcement today is the continually increasing number of assaults on police officers as they perform their duties. How can the officer respond to this critical situation without resorting to deadly force? Modern law enforcement tool has been developed to increase officers' ability to protect themselves, particularly in those cases not justifying the use of deadly force. That tool is the baton. The ability to use force, lawfully, against the public is the primary factor, which distinguishes the police from the rest of society. The police service is unique in society as they are the only civil organization that has been given the authority to use force. As a result of this responsibility, the use of force by the police comes under close scrutiny by both the public and the courts. The baton can be utilized when empty hand techniques are not effective. A trained officer who is proficient in the use of the baton is better able to protect himself and is less likely to resort to the use of his firearm. The main purpose of the baton is to stun or temporarily disable rather than cause permanent injury. The baton is not designed as a lethal weapon and is not an instrument of punishment. It is to be used in a skillful manner to counter or stop an aggressive subject. The techniques shown in this booklet has been universally accepted and are defensible in court. They are designed to work efficiently for all officers, male, female, small, large, fit and the less fit. Topics and techniques presented in this book will be of both great interest and great value to trainers and students of law enforcement.

Defense Tactics for Law Enforcement

Never Trust a Politician

Policing is commonly thought to be governed by domestic legal systems and not international law. However, various international legal standards are shown to have an impact in situations where police use force. *Police Use of Force under International Law* explores this tension in detail for the first time. It critically reviews the use of force by law enforcement agencies in a range of scenarios: against detainees, during protests, and in the context of counterterrorism and counterpiracy operations. Key trends, such as the growing use of private security services, are also considered. This book provides a human rights framework for police weaponry and protection of at-risk groups based on critical jurisprudence from the last twenty years. With pertinent case law and case studies to illustrate the key principles of the use of force, this book is essential reading for anyone interested in policing, human rights, state use of force or criminology.

TASER® Conducted Electrical Weapons are rapidly replacing the club for law-enforcement control of violent subjects within many countries around the globe. A TASER CEW is a hand-held device that delivers a 400-volt pulse with a duration tuned to control the skeletal muscles without affecting the heart at a distance of up to 6.5 meters over tiny wires. If necessary, it begins with an arcing voltage of 50,000 V to penetrate thick clothing; the 50,000 V is never delivered to the body itself. Due to the widespread usage of these devices and the widespread misconceptions surrounding their operation, this book will have significant utility. This volume is written for cardiologists, emergency physicians, pathologists, law enforcement management, corrections personnel, and attorneys.

Tonfa

This book covers "Officer Survival Skills, Use of Force, Soft Empty Hand Control, Hard Empty Hand Control, Weapon Retention and Gun Disarming, Handcuffing, Conducting Suspect Searches, and Defensive Baton " issues for law enforcement officer. The most important priority of the officer is able to survive in dangerous situations. These techniques provide officers self-confidence, which is needed to "win". Law enforcement officers are authorized to use a range of force options to preserve the peace, prevent crimes, maintain order, and apprehend suspects. Soft empty hand techniques are the first option of physical response used to restrain a person who is resisting. Hard Empty Hand Control techniques are defined as striking techniques. In some close encounters, a suspect may try to grab the officer's sidearm. Officers must develop a defensive awareness that their weapon can be snatched. Handcuffs are temporary restraining devices designed to control the movements of a subject. Body searching is a careful, systematic examination of the suspect at the scene of a crime, or immediately after apprehension. A trained officer who is proficient in the use of the baton is better able to protect himself and is less likely to resort to the use of his firearm. Topics and techniques presented in this book will be of both great interest and great value to trainers and students of law enforcement.
