Principles of Microeconomics provides students with an accessible text that reflects the issues and context of Microeconomics in Europe. It relies throughout on a well articulated shortlist of 7 core principles which are reinforced by real world examples. Review questions, exercises and problems encourage students to apply these principles in a variety of contexts. Developed from the well regarded US textbook by Frank and Bernanke it presents concepts intuitively through examples drawn from familiar contexts. The text encourages students to become "economics naturalists"; people who employ basic economics principles to understand and explain the world around them. “digital-first” approach for the principles of economics course, Roger Butters and Carlos Asarta offer the same core content covered in mainstream textbooks, but in a way that breaks free from the constraints of a traditional textbook’s structure and format, empowering instructors to take advantage of new approaches in teaching methodology to revitalize their courses. The authors present over 200 distinct concepts in the principles course, each anchored by an engaging 2-4 minute high-quality video, and accompanied by a suite of learning resources such as dynamic applications, worked examples, and assessment tools. With a concept-level approach, instructors are able to handpick every aspect of the curriculum, from concepts covered to sequencing, providing flexibility for instructors to tailor their courses in such a way that is appropriate for any school, at any level, and set to any depth. The result is an experience that is motivating, accessible, and adaptable to how today’s students learn and obtain information.

Real examples. Real companies. Real business decisions. Covering the core economics principles and providing engaging, relevant examples within just nineteen Chapters, Hubbard Essentials of Economics is the perfect teaching and learning resource for a one semester unit. The authors present economics as a dynamic, relevant discipline for Australasian students. The key questions students of first year economics ask themselves are: "Why am I here?" and "Will I ever use this?" Hubbard Essentials of Economics answers these questions by demonstrating that real businesses use economics to make real decisions every day. Each chapter of the text opens with a case study featuring a real business or real business situation, refers to the study throughout the Chapter, and concludes with An Inside Look—a news article format which illustrates how a key principle covered in the Chapter relates to real business situations or was used by a real company to make a real business decision.
