Solving complex problems and selling their solutions is critical for personal and organizational success. For most of us, however, it doesn't come naturally and we

haven't been taught how to do it well. Research shows a host of pitfalls trips us up when we try: We're quick to believe we understand a situation and jump to a flawed solution. We seek to confirm our hypotheses and ignore conflicting evidence. We view challenges incompletely through the frameworks we know instead of with a fresh pair of eyes. And when we communicate our recommendations, we forget our reasoning isn't obvious to our audience. How can we do it better? In *Cracked It!*, seasoned strategy professors and consultants Bernard Garrette, Corey Phelps and Olivier Sibony present a rigorous and practical four-step approach to overcome these pitfalls. Building on tried-and-tested (but rarely revealed) methods of top strategy consultants, research in cognitive psychology, and the latest advances in design thinking, they provide a step-by-step process and toolkit that will help readers tackle any challenging business problem. Using compelling stories and detailed case examples, the authors guide readers through each step in the process: from how to state, structure and then solve problems to how to sell the solutions. Written in an engaging style by a trio of experts with decades of experience researching, teaching and consulting on complex business problems, this book will be an indispensable manual for anyone interested in creating value by helping their organizations crack the problems that matter most.

### **Bumps, Hills and Mountains**

Sometimes heroes fall and take their loved ones down with them. Colonel Michael Cedars and reporter Hope Shane fell in love in a war zone, but then the world blew up and splintered their lives in two. Coming home again isn't always easy. A Marine accustomed to giving orders, Michael struggles to find his role in civilian life.

Wounded, he faces new battles as he learns to walk again, struggles with wartime ghosts, and questions his abilities as a husband. Hope doesn't give up-not on the man she loves and not on her pursuit of justice. An investigative reporter, she's hot on the trail of a human trafficking ring. Danger intensifies as she gets closer to the truth, but the human traffickers know her weakness. Will Michael become her Achilles Heel? Is he still the hero she married or has he become a liability that could get them both killed?

### **In Leah's Wake**

Jerry D Young was born at home, in Senath, Missouri July 3, 1953. At age 5 the family rented a small farm house on an active farm 40 miles southwest of St. Louis. While the family weren't farmers, they lived something of a homestead type life, raising a milk cow, sometimes two, and calves, a pig or two, chickens, and the occasional goat. Along with the stock, a large garden helped to feed Jerry's three brothers and two sisters for several years. Fishing and hunting contributed to the pantry, as did foraging the wild edibles on the property. At the age of 14, the family, minus a brother and two sisters that were now adults and on their own, moved back to Senath. Having been encouraged from an early age to read, Jerry was a regular patron of the Senath Branch Library. A love of a good story was born within him, and shortly before graduating high school, for a lack of stories that he

liked at the library, he began to write short vignettes, and started taking notes for stories that he wanted to tell. Well, a full life interceded, and the writing didn't resume for several years. But while working a job with a much free time, and the then newfangled home computer, Jerry began to write in earnest. With the occasional gap in the process, Jerry continued to research and write, never believing he could ever be published. But when he turned 50, he wanted a change in his life, left the job he was doing and began focusing on his writing. When he became ill, the writing stopped, but not the inspiration. When he started writing again, in 2004, after getting the medical problems under control, he began to read some on-line stories dealing with emergency preparedness, one of his other loves. The die was cast. Now with over a hundred of the vignettes and short stories about how to survive disasters written, along with his other novels, Jerry decided to go for broke, adding one of his previous works every few days to his list of stories now available, Jerry continues to write, both the Prep/PAW stories, as well as action adventure with a little romance type stories that first got him started.

### **Reckless Endangerment**

This story introduces and encourages readers to use SODAS (Situation, Options, Disadvantages, Advantages, and Solution) as a way to logically and thoughtfully figure out how to solve any problem, from the silly to the serious. What's the Problem? adds to the wildly popular Executive FUNction book series.

### **Lamikorda**

In the salad of Michael Collins' otherwise perfect life there lurked one undoubted caterpillar, an immature determination to win a county junior hurling title with his beloved De Wets. Collins' playing history and his personal life contain much to vex the ordinary fan and strain his credulity, which is as it must be. And, like all the great matches "The Drinker with the Hurling Problem" is full of excitement, black humour and gritty reality. Collins' story will move the compassionate to tears, the just to indignation and the cruel to laughter. This book tells the story of what it takes to make an Irish male vow to change his life, to say nothing of his underpants. Every novelist writes one book too many and maybe that's what Paddy Coyne has just written; another variation on the Icarus theme: about wax melting, unscheduled descents and, of course, the inclination of God to look the other way when people are suffering most acutely.

### **What Do You Do with a Problem?**

The bombshell is dropped, the news incredible. It could mean so much for so many. People think their prayers have been answered. Scientists promise this advancement will only be used for good. Can they really guarantee that? The time period is what is referred to as 'end times' when fearful news is the rule of the day.

Good news is scarce and so people hold onto this promise of 'help' like a life preserver since that may be what it will be to them. Meanwhile a certain element of criminals is exploding and no one knows what to do with them. Every day the newspaper reveals new horrors. Victims rise along with the perpetrators. It is obvious the battle between good and evil is heating up. It is no longer popular to believe, to have faith or profess your Christianity. It is a time when all that matters to most is what they want for themselves. Selfishness is running rampant and cold hearts and lack of love and conscience are evident. One solution found is going to pull most down to the level of those doing this evil. As has been said is all evil needs to succeed is for good men to do nothing.

### **Enemy Pie**

Have you ever felt stuck? We all know life is full of problems. Whether it's depression, stress, financial burdens, illness, or relationship struggles - problems take many forms. What we often forget is that solutions can be right under our noses or in the case of Ms. Fox, right over her head. The Problem Story is a blend of Aesop's fables meets self-help. In it, readers will find an allegory of life's challenges characterized by three animals - Ms. Opossum, Mr. Badger, and Ms. Fox - and how each attempts to find the ultimate solution to one enormous problem. The Problem Story features: - History and evidence for Problem-Solving Therapy - An illustrated allegory for problem-solving skills - Story discussion guide and analysis - 3-step

solution guide for readers to try themselves

### **Solutions and Other Problems**

This second edition of the popular math teaching resource book *Math Stories for Problem Solving Success* offers updated true-to-life situations designed to motivate teenagers to use math skills for solving everyday problems. The book features intriguing short stories followed by sets of problems related to the stories that are correlated to the standards of the National Council of Teachers of Mathematics. Each of the easy-to-read stories is followed by three increasingly difficult groups of problem sets. This makes it simple for teachers to select the appropriate problem set for students of different abilities and at different grade levels. To further enhance student involvement, the stories feature recurring characters and can be used either sequentially or out of order. The problems in the book cover many basic math topics, including decimals, fractions, and percents; measurement; geometry; data, statistics, and probability; algebra; and problem solving. In addition to having all the answers, an Answer Key at the end of the book offers explanations and background information about the problems that can be helpful

to both teachers and students. Math Stories for Problem Solving Success will help you show students that math is something they are already using every day.

### **The Koala Who Could**

The Alplai have lived in peace and prosperity for centuries, spreading beyond their homeworld's single continent into floating cities on its vast oceans, and colonizing the planets and moons of their solar system. Now, a massive alien vessel has come, carrying over a million colonists in cryogenic stasis from a devastated world. Ganak, the recently appointed Commissioner for Space Exploration,

advocates that the Terai be allowed to settle in the newly prepared Eastern Sector of the planet Totrana. The proposal is approved, and the avian-descended Alplai work with this strange mammalian species to help them build a new home. But not all the Alplai welcome these creatures. Many are concerned about their warlike past, and when a new disease erupts on Totrana, the aliens are quickly blamed. Despite their contributions, the Terai face discrimination and harassment. How far can Ganak use his influence to help, and what leaders will emerge amongst them as they strive to build a new life?

### **Glitch Mitchell and the Unseen Planet**

"What do you do with a problem? Especially one that follows you around and doesn't seem to be going away? Do you worry about it? Ignore it? Do you run and hide from it? This is the story of a persistent problem and the child who isn't so sure what to make of it. The longer the problem is avoided, the bigger it seems to get. But when the child finally musters up the courage to face it, the problem turns out to be something quite different than it appeared. This is a story for anyone, at any age, who has ever had a problem that they wished would go away. It's a story to inspire you to look closely at that problem and to find out why it's here. Because you might discover something amazing about your problem and yourself. What are problems for? They challenge us, shape us, push us, and help us to discover just how strong and brave and capable we really are. Even though we don't always

want them, problems have a way of bringing unexpected gifts. So, what will you do with your problem?"--Provided by publisher.

### **The Problem Story**

The award-winning, evidence-based violence prevention and intervention program for children. I Can Problem Solve (ICPS) is a universal school-based program designed to enhance the interpersonal cognitive processes and problem-solving skills of children in preschool through grade 6. Developed by Myrna B. Shure for three age groups and supported by 25 years of meticulous research, ICPS is proven to prevent and reduce early high-risk behaviors such as impulsivity and social withdrawal and to promote prosocial behaviors such as concern for others and positive peer relationships. ICPS for Intermediate Elementary Grades Structured

Lessons: A total of 77 lessons, each with an easy-to-follow teacher script, guide children's learning of essential ICPS vocabulary and concepts and problem-solving skills (alternative solutions, consequences, solution-consequence pairs, means-end thinking). Interaction in the Classroom: Teachers and students learn a whole new way to communicate, using ICPS dialoging, a special technique of problem-solving talk. The result is an improved classroom climate with less conflict and more cooperation. Integration into the Curriculum: Children practice ICPS problem-solving concepts as they work on math, reading, science, social studies, and other academic subjects. Lessons speak to children on their own level, using games, stories, puppets, illustrations, and role-plays. A key program principle is that the child, not the teacher, must solve the problem at hand. In other words, ICPS teaches children how to think, not what to think.

### **I Can Problem Solve: Preschool**

Sixteen-year-old Max and 10-year-old Tessa were fully prepared for another horrible summer vacation. While they always hoped to go somewhere fun like Disney World or Universal Studios, they usually went somewhere weird and cheap that their father, former boy bander Don Masters, found in an ad in a truck stop coupon magazine. But this year was different. Where they went couldn't be found on any map or in any truck stop coupon book. They passed through a portal to a place called Turtle Island, an alternate version of America that diverged from our history before the pilgrims landed at Plymouth Rock. It was there where they met world famous action movie star Jordie Paine -- star of such films as I Plan to Kill You Now and the sequel, I Plan to Kill You Now, Too, the ninja film, Chuck Butcher: Sword Wielding Jackal, as well as the light-hearted romp, Harry Hinklehoffer and the Giant Dancing Toad of East Nebraska -- who would be their guide in this strange new world. Jordie, they later learned, brought the Masters family to Turtle Island for a very specific reason. Because they look just like the ruthless first family of Turtle Island, the Masters are pawns in a coup to overthrow the dictator. But things don't go as planned and the Masters wind up in the Survival Games, Turtle Island's national pastime/system of justice where criminals competitors, or

crimpeititors, compete for their freedom. In this scifi comedy, the stakes are very simple -- if they win, they rule, if they lose, they must suffer the consequences.
