## Crazy Hair Day

Part of the Legend Classics series  
As Gregor Samsa awoke one morning from uneasy dreams he found himself transformed in his bed into a gigantic insect.  
The Metamorphosis - the masterpiece of Franz Kafka - was first published in 1915 and is one of the seminal works of fiction of the twentieth century. The novel is cited as a key influence for many of today's leading authors; as Auden wrote: "Kafka is important to us because his predicament is the predicament of modern man".  
Traveling salesman, Gregor Samsa, wakes to find himself transformed into a large, monstrous insect-like creature. The cause of Gregor's transformation is never revealed, and as he attempts to adjust to his new condition he becomes a burden to his

parents and sister, who are repelled by the horrible, verminous creature Gregor has become. A harrowing, yet strangely comic, meditation on human feelings of inadequacy, guilt, and isolation, *The Metamorphosis* has taken its place as one of the most widely read and influential works of twentieth-century fiction. The Legend Classics series: *Around the World in Eighty Days*, *The Adventures of Huckleberry Finn*, *The Importance of Being Earnest*, *Alice's Adventures in Wonderland*, *The Metamorphosis*, *The Railway Children*, *The Hound of the Baskervilles*, *Frankenstein*, *Wuthering Heights*, *Three Men in a Boat*, *The Time Machine*, *Little Women*, *Anne of Green Gables*, *The Jungle Book*, *The Yellow Wallpaper and Other Stories*, *Dracula*, *A Study in Scarlet*, *Leaves of Grass*, *The Secret Garden*, *The War of the Worlds*, *A Christmas Carol*, *Strange Case of Dr Jekyll and Mr Hyde*, *Heart of Darkness*, *The Scarlet Letter*, *This Side of Paradise*, *Oliver Twist*, *The Picture of Dorian Gray*, *Treasure Island*, *The Turn of the Screw*, *The Adventures of Tom Sawyer*, *Emma*, *The Trial*, *A Selection of Short Stories by Edgar Allan Poe*, *Grimm Fairy Tales*

## **Assessing and Teaching Reading Comprehension and Writing, K-3**

This volume focuses on our understanding of the reading comprehension of adolescents in a high stakes academic environment. Leading researchers share their most current research on each issue, covering theory and empirical research from a range of specializations, including various content areas, English language learners, students with disabilities, and reading assessment. Topics discussed include: cognitive models of reading comprehension and how they relate to typical or atypical development of reading comprehension, reading in history classes, comprehension of densely worded and symbolic mathematical texts, understanding causality in science texts, the more rigorous comprehension standards in English language arts classes, balancing the practical and measurement constraints of the assessment of reading comprehension, understanding the needs and challenges of English language learners and students in special education with respect to the various content areas discussed in this book. This book is of interest to researchers in literacy and educational psychology as well as curriculum developers.

## **Teaching Text Structures**

This book is about reading. Throughout the book, the author explains the complexity of the dual-language involvement of FL/L2 reading by showing how L1 and FL/L2 factors interplay in FL/L2 reading. The main aim of the book is to explore reading in English in the foreign/second language context as a cross-linguistic phenomenon and to present the results of a think-aloud study which investigated reading in Polish as the L1 and English as the FL of Polish learners of English. The

project consisted of six stages, each focussing on a different aspect of reading. Thus, the following was explored: reading strategies, problems and solutions, the way the subjects constructed their representations of the texts, the students' individual patterns of developing comprehension and effectiveness in identifying the main ideas. The findings revealed both differences and similarities between the subjects' reading in Polish and their reading in English. The book offers implications for further research and elucidates the usefulness of think-aloud protocols in foreign language instruction.

This is a story for anyone, at any age, who has ever had a problem that they wished would go away. It's a story to inspire you to look closely at that problem and to find out why it's here. Because you might discover something amazing about your problem and yourself. What are problems for? When one defines "order" as a sorting of priorities, it becomes beautifully clear as to what Foucault is doing here. With virtuoso showmanship, he weaves an intensely complex history of thought. He dips into literature, art, economics and even biology in *The Order of Things*, possibly one of the most significant, yet most overlooked, works of the twentieth century. Eclipsed by his later work on power and discourse, nonetheless it was *The Order of Things* that established Foucault's reputation as an intellectual giant. Pirouetting around the outer edge of language, Foucault unsettles the surface of literary writing. In describing the limitations of our usual taxonomies, he opens the door onto a whole new system of thought, one ripe with what he calls "exotic charm". Intellectual pyrotechnics from the master of critical thinking, this book is crucial reading for those who wish to gain insight into that odd beast called Postmodernism, and a must for any fan of Foucault.
