### Dancing in My Nuddy-Pants

Pete Dizinoff, a skilled and successful New Jersey internist, has a loving and devoted wife, a network of close friends, an impressive house, and, most of all, a son, Alec, now nineteen, on whom he has pinned all his hopes. But Pete hadn't expected his best friend's troubled daughter to set her sights on his boy. When Alec falls under her spell, Pete sets out to derail the romance, never foreseeing the devastating consequences. In a riveting story of suburban tragedy, Lauren Grodstein charts a father's fall from grace as he struggles to save his family, his reputation, and himself.

### Citizenship in the 21st Century

In the first of a mesmerizing trilogy, Alexandra Ivy, author of the Guardians of Eternity series, introduces the Immortal Rogues--three vampires duty-bound to protect their own kind even as they fall prey to mortal desires. . . Centuries have passed since Gideon Ravel dwelled among humans. Now he must infiltrate the cream of London society to earn the trust of one woman. Simone, Lady Gilbert, possesses an amulet of unimaginable power, and no concept of the threat that surrounds her. The ton's gossip prepared him for her beauty and wit. But he is blindsided by her barely disguised sensuality and his growing need to possess her. . . None of the idle aristocrats who vie for Simone's attentions know about her past. To them, she is the sophisticated, worldly widow known as the "Wicked Temptress." The truth would ruin her, and she has never been tempted to reveal it until now. Yet beneath Gideon's bold, black-eyed stare is a hunger that demands satisfaction and complete surrender. . .and a secret far more dangerous than her own. . . Praise for Alexandra Ivy "Beyond the Darkness kept me riveted! The Guardians of Eternity series is highly addictive." --Larissa Lone, New York Times bestselling author "Ivy always packs her books with buckets of action, emotion and sexy sizzle. Another winner!" --Romantic Times on Devoured by Darkness

### Pastels For Dummies

According to the Department of Labor, the average woman in 1998 was bringing home less than \$25,000 a year. For every dollar that a man makes, a woman makes between 50 and 75 cents, and that is hardly news. But what you may not know is that, quietly and steadily, the number of women making six figures or more is rapidly increasing. Currently, over fifteen million women make \$100,000 or more, and the number continues to rise at a rate faster than for men. And these women come from every industry - psychologists, dot com founders, consultants, freelance writers, and even part-timers. What makes these particular women able to do so well in the workplace? Fueled by curiosity, Barbara Stanny, author of *Price Charming Isn't Coming: How Women Get Smart About Money* (Viking Penguin), set out to research this phenomenon. What she discovered was that, though the high-earning women she interviewed came from different backgrounds and had had greatly different work experiences, they all had certain characteristics in common. *Secrets of Six Figure Woman: Surprising Strategies of the Successful High Earners* will be a ground breaking book for high earners who want to ensure their wealth, enhance their success, and learn from others who are in the same boat. It will also offer inspiration, guidance, and motivation to those who aspire to make more.

### **A Friend of the Family**

Climate Physics is a modern subject based on a space-era understanding of the physical properties of the atmosphere and ocean, their planetary-scale history and evolution, new global measurement systems and sophisticated computer models, which collectively make quantitative studies and predictions possible. At the same time, interest in understanding the climate has received an enormous boost from the concern generated by the realization that rapid climate change, much of it forced by the relentless increase in population and industrialization, is potentially a serious threat to the quality of life on Earth. Our ability to resist and overcome any such threat depends directly on our ability to understand what physical effects are involved and to predict how trends may develop. In an introductory course like that presented here, we want to clarify the basics, topic by topic, and see how far we can get by applying relatively simple Physics to the climate problem. This provides a foundation for more advanced work, which we can identify and appreciate at this level although of course a full treatment requires more advanced books, of which there are many.

### **GM Lumina, Grand Prix, Cutlass Supreme, and Regal, 1988-96**

Classical Mechanics is a clear introduction to the subject, combining a user-friendly style with an authoritative approach, whilst requiring minimal prerequisite mathematics - only elementary calculus and simple vectors are presumed. The text starts with a careful look at Newton's Laws, before applying them in one dimension to oscillations and collisions. More advanced applications - including gravitational orbits, rigid body dynamics and mechanics in rotating frames - are deferred until after the limitations of Newton's inertial frames have been highlighted through an exposition of Einstein's Special Relativity. The examples given throughout are often unusual for an elementary text, although they are made accessible through discussion and diagrams. Complete revision summaries are given at the end of each chapter, together with problems designed to be both

illustrative and challenging. Features: \* Comprehensive introduction to classical mechanics and relativity \* Many novel examples, e.g. stability of the universe, falling cats, crickets bats and snooker \* Includes many problems with numerical answers \* Revision notes at the end of each chapter

### **Fundamentals of Modern Physics**

The human race began as slime and ended as slime. His name was Lister. After celebrating his birthday on a Monopoly board pub-crawl round London, he wakes up three million years from Earth, marooned in the wrong plane of the wrong dimension of the wrong reality with a crippling hangover and down to his last two

cigarettes . . . Together with a dead man, a senile computer, a deranged sanitation mechanoid with an overactive guilt chip and the best-dressed entity in all six known universes, the last remaining member of the human race begins his epic journey home. Join the Red Dwarf's trepid band of space zeroes - Lister, Rimmer, Kryten, Holly and the Cat - as they travel through frontal-lobe knotting realities where none dare venture but the bravest of the brave, the boldest of the bold, the feeblest of the feeble-minded.

### **Triskellion**

Who in his right mind wants to talk to a shrink? I don't want to talk about anything. I don't want to feel anything, taste anything or anything. The lyrics "just dying to die" run around in my brain day and night Fifteen-year-old Sam is in pain. He comes to the therapist's office unwillingly, angry, depressed, and filled with guilt over his own self-destructive behavior. He is being drawn deeper and deeper into a black hole of despair from which he sees no way out. The Road Back This is the Real-life story of Sam's Recovery, told from tapes of his therapy sessions. It tells what drove him to leave home, how he survived on the street, and why he was desperate to escape from the brutality of the gang that had become his "family" and from the torment of his own self-loathing. For every teen who has experienced the pain and loneliness of a no-way-out darkness, and for all those who love them, here is the light that can lead the way back.

In a perfect marriage of author and subject, P. D. James—one of the most widely admired writers of detective fiction at work today—gives us a personal, lively, illuminating exploration of the human appetite for mystery and mayhem, and of those writers who have satisfied it. P. D. James examines the genre from top to bottom, beginning with the mysteries at the hearts of such novels as Charles Dickens's *Bleak House* and Wilkie Collins's *The Woman in White*, and bringing us into the present with such writers as Colin Dexter and Henning Mankell. Along the way she writes about Arthur Conan Doyle, Dorothy L. Sayers, Agatha Christie ("arch-breaker of rules"), Josephine Tey, Dashiell Hammett, and Peter Lovesey, among many others. She traces their lives into and out of their fiction, clarifies their individual styles, and gives us indelible portraits of the characters they've created, from Sherlock Holmes to Sara Paretsky's sexually liberated female investigator, V. I. Warshawski. She compares British and American Golden Age mystery writing. She discusses detective fiction as social history, the stylistic components of the genre, her own process of writing, how critics have reacted over the years, and what she sees as a renewal of detective fiction—and of the detective hero—in recent years. There is perhaps no one who could write about this enduring genre of storytelling with equal authority and flair: it is essential reading for every lover of detective fiction. From the Hardcover edition.

## **With Lawrence in Arabia**

Unique in its coverage of all aspects of modern particle physics, this textbook provides a clear connection between the theory and recent experimental results, including the discovery of the Higgs boson at CERN. It provides a comprehensive and self-contained description of the Standard Model of particle physics suitable for upper-level undergraduate students and graduate students studying experimental particle physics. Physical theory is introduced in a straightforward manner with full mathematical derivations throughout. Fully-worked examples enable students to link the mathematical theory to results from modern particle physics experiments. End-of-chapter exercises, graded by difficulty, provide students with a deeper understanding of the subject. Online resources available at [www.cambridge.org/MPP](http://www.cambridge.org/MPP) feature password-protected fully-worked solutions to problems for instructors, numerical solutions and hints to the problems for students and PowerPoint slides and JPEGs of figures from the book.
