Test new Book

The study of vocabulary is a flourishing area in applied linguistics and language teaching which is creating a need for new approaches to vocabulary assessment. This volume presents a framework that expands the traditional concept of a vocabulary test to cover a range of procedures for assessing the vocabulary knowledge of second language learners. These procedures can be useful for addressing practical assessment needs as well as providing tools for conducting research into the lexical dimension of language.

A one-of-a-kind resource for evaluators using the Woodcock-Johnson® III The Woodcock-Johnson® III is one of the most widely used instruments for assessing both cognitive abilities and achievement in children and adolescents. Woodcock-Johnson® III: Reports, Recommendations, and Strategies is the only reference to provide valuable guidelines for preparing useful recommendations and writing effective, descriptive psychological and educational reports based on WJ III® scores, tasks analysis, and error patterns. Featuring the most up-to-date information available on the WJ III®, this essential resource offers an overview of the WJ III® scores and interpretive information, along with a review of the clusters, and tests. Numerous examples of diagnostic reports that depict a variety of common student learning problems are included, illustrating applications of the WJ III® in both educational and clinical settings. Drs. Nancy Mather and Lynne Jaffe also provide a wide variety of educational recommendations, along with summaries of proven methods and techniques for implementing

Lawrence Lessig, “the most important thinker on intellectual property in the Internet era”, masterfully argues that never before in human history has the power to control creative progress been so concentrated in the hands of the powerful few, the so-called Big Media. Never before have the cultural powers- that-be been able to exert such control over what we can and can’t do with the culture around us. Our society defends free markets and free speech; why then does it permit such top-down control? To lose our long tradition of free culture, Lawrence Lessig shows us, is to lose our freedom to create, our freedom to build, and, ultimately, our freedom to imagine.

This book explores an area that has been somewhat overlooked in the literature to date – the current status and future trends of English education in Oman. It offers a variety of theoretical and methodological approaches to the subject and explores areas of English education in Oman that have, until now, been little investigated. It explores these issues from a variety of perspectives: the professionalization of English teachers in the country; the implementation of novel teaching methodologies, curricula, and assessment approaches, into what are, in many ways, still very traditional education settings; the integration of learner identity into English language instruction; country- and culture-specific concerns with conducting research with Omani participants; the strategic demands of building stronger links between education and workforce needs; and developing learner autonomy and motivation.

This multidisciplinary volume offers insights on oral and written language development and how it takes place in literate societies. The volume covers topics from early to late language development, its interaction with literacy practices, including several languages, monolingual and multilingual contexts, different scripts, as well as typical and atypical development. Inspired by the work of Liliana Tolchinsky, a leading expert in language and literacy development, a group of internationally renowned scholars offers a state-of-the-art overview of current thinking in language development in literate societies in its broadest sense. Contributors offer a personal tribute to Liliana Tolchinsky in the opening section.

Co-published with UNESCO A product of the UNESCO-IHP project on Water and Cultural Diversity, this book represents an effort to examine the complex role water plays as a force in sustaining, maintaining, and threatening the viability of culturally diverse peoples. It is argued that water is a fundamental human need, a human right, and a core sustaining element in biodiversity and cultural diversity. The core concepts utilized in this book draw upon a larger trend in sustainability science, a recognition of the synergism and analytical potential in utilizing a coupled biological and social systems analysis, as the functioning viability of nature is both sustained and threatened by humans.
