Herbert Zettl draws on his expertise and field experience to bring you the seventh edition of VIDEO BASICS, the handiest and most authoritative, current, and technically accurate student guide to video production available. Meeting the need for a briefer book, this text distills comprehensive video instruction so that it can be covered in a single semester. The book moves students from video concepts and processes to production tools and techniques and, finally, to the production environment (studio and field, inside and outside) and its effects. A more conceptual framework leads students from the idea (what to create) to the image (how to create) on video. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Electronic Media connects the traditional world of broadcasting with the contemporary universe of digital electronic media. It provides a synopsis of the beginnings of electronic media in broadcasting, and the subsequent advancements into digital media. Underlying the structure of the book is a "See It Then, See It Now, See It Later" approach that focuses on how past innovations lay the groundwork for changing trends in technology, providing the opportunity and demand for change in both broadcasting and digital media. FYI and Zoom-In boxes point to further information, tying together the immediate and long-ranging issues

surrounding electronic media. Career Tracks feature the experiences of industry experts and share tips in how to approach this challenging industry. Check out the companion website at <http://www.routledge.com/cw/medoff-9780240812564/> for materials for both students and instructors.

Object Lessons is a series of short, beautifully designed books about the hidden lives of ordinary things. While we all use remote controls, we understand little about their history or their impact on our daily lives. Caetlin Benson-Allot looks back on the remote control's material and cultural history to explain how such an innocuous media accessory has changed the way we occupy our houses, interact with our families, and experience the world. From the first wired radio remotes of the 1920s to infrared universal remotes, from the homemade TV controllers to the Apple Remote, remote controls shape our media devices and how we live with

them. Object Lessons is published in partnership with an essay series in the The Atlantic.

On February 17, 2009, analog television broadcasting in the United States will end. As of that date, all television stations will switch to digital TV broadcasts -- effectively making obsolete every analog television set in the country. What do you need to do to keep watching television after the switch to digital? Do you need to buy a new television set? If so, what kind of set? Do you need a fancy high definition TV? Or is there a way to make your old TV still work with the new digital broadcasts? Should you switch to cable or satellite television? And what is digital television, anyway? These are just a few of the questions people are asking as the switch to digital TV approaches. All of these questions and more are answered in this short book. Don't be one of the tens of millions of people who are confused about the switch to digital TV and may lose their broadcast signal on February 17! Buy this book and take the guesswork out of the switch to digital TV! What you can learn in this book - o What is the difference is between Digital TV and HDTV o How to switch your analog antenna reception to digital o What you need to do if you are a cable, DSL or satellite subscriber o How to connect a digital converter box o Tips on shopping for a new digital TV o Great solutions to your digital TV problems
