Almost 70% of parents who refuse to vaccinate their children do so because they believe vaccines may cause harm. Indeed vaccines have been blamed for causing asthma, autism, diabetes, and many other conditions most of which have causes that are incompletely understood. Do Vaccines Cause That?! A Guide for Evaluating Vaccine Safety Concerns provides parents with clearly understandable, science-based information about vaccines, immunization, and vaccine safety.

### Practical Proverbs

Genitalogy Most great civilizations cultivate honored traditions which provide tools

to help people understand themselves, each other, and an unpredictable world. These often insightful teachings invite us to look at the stars (Astrology), our eyes (Iridology), our hands (Palmistry), the space around us (Aurus), magical cards (Tarot decks), Yarrow sticks (the I-Ching), tea leaves, Ouija boards, and today's favorite, Science, to help us explain our lives - past, present, and future. It's striking that, with rich and vast diversity, none of these traditions explore genitalia as a key to understanding the mysteries of life, especially when it comes to love. Why have almost all cultures ignored what is, perhaps, the most intimate part of our own bodies - our genitals?

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within

this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

This book effectively translates author Hank Green's YouTube video sensation of biology Crash Courses into guided question worksheets. Students follow along with Hank Green's online Crash Courses and reflect upon topics in biology using this interactive guiding question workbook. A quick type in on a Google search engine or YouTube of "Crash Course Biology" will take one to the desired site of where 40 episodes can be found. Common Core biology standards are followed in all questions inside of the Crash Course Biology: A Study Guide of Worksheets for Biology workbook helping students tap into level 3 and 4 DOK (Depth of Knowledge) thinking skills in biology while actively learning while listening to Hank Green's Biology Crash Course videos. This workbook can be used to focus students either with or without headphones on a laptop while watching the desired YouTube video thus eliminating distraction in a desired setting. Questions posed are in accordance with AP high school biology standards (aka college level biology standards) and can be used in order to improve test scores, content understanding, and effectively build upon essay structure in writing about topics in biology. Target audience includes but is not limited to native English speakers and English language learners ages 15-22. Note: Those without access to YouTube can still use these guiding questions as a guide in order find answers using their respective biology book, and by looking up answers using bolded key terms and vocabulary. Questions posed in this book are meant to inspire paragraph development including intro, thesis, body, and conclusion paragraph structure while affording the reader opportunities to analyze, evaluate, and reflect upon a wide number of topics found in biology.

Human Biology is a new book for readers preparing for careers in human biology or anatomy & physiology. As in Belk and Borden's highly successful "Biology: Science for Life," science is presented as a story that is integrated into the narrative to motivate readers to read further and make real-life connections to the concepts they are learning. Critical thinking is emphasized through figure captions that encourage readers to think further, "Stop and Stretch" vignettes that ask them to reflect on earlier concepts, and end-of-chapter problems that pose questions that integrate and synthesize the chapter material. The unique presentation of molecular genetics early in the book (Chapter 4) allows the authors to apply molecular ideas in subsequent chapters. Clear and friendly writing continues as a hallmark of these authors. KEY TOPS: The Scientific Method: Proven Effective, The Chemistry of Life: Drink to Your Health?, Cell Structure and Metabolism: Diet, Genes—Transcription, Translation, Mutation, and Cloning: Genetically Modified

Foods, Tissues, Organs, and Organ Systems: Work Out, The Musculoskeletal System: Sex Differences in Athleticism, The Digestive System: Weight-Loss Surgery, The Blood: Malaria-A Deadly Bite, The Cardiovascular System: Can We Stop the Number-One Killer?, The Respiratory System: Secondhand Smoke, The Urinary System: Surviving the Ironman, Immune System, Bacteria, Viruses, and Other Pathogens: Will Mad-Cow Disease Become an Epidemic?, Sexually Transmitted Infections: The Cervical Cancer Vaccine, Brain Structure and Function: Attention Deficit Disorder, The Senses: Is Danger Near?, The Endocrine System: Worried Sick, DNA Synthesis, Mitosis, and Meiosis: Cancer, Human Reproduction: Is There Something in the Water?, Mendelian and Quantitative Genetics: Are You Only as Smart as Your Genes?, Extensions of Mendelism, Sex Linkage, Pedigree Analysis, and DNA Fingerprinting DNA Detective, Development and Aging : The Promise and Perils of Stem Cells, Evolution: Where Did We Come From?, Ecosystems and Biomes: Where Do You Live?, Population, Community, and Ecosystem Ecology: Is Earth Experiencing a Biodiversity Crisis?
