The Talking Book casts the Bible as the central character in a vivid portrait of black America, tracing the origins of African-American culture from slavery's secluded forest prayer meetings to the bright lights and bold style of today's hip-hop artists. The Bible has profoundly influenced African Americans throughout history. From a variety of perspectives this wide-ranging book is the first to explore the Bible's role in the triumph of the black experience. Using the Bible as a foundation, African Americans shared religious beliefs, created their own music, and shaped the ultimate key to their freedom—literacy. Allen Callahan highlights the intersection of biblical images with African-American music, politics, religion, art, and literature. The author tells a moving story of a biblically informed African-American culture, identifying four major biblical images—Exile, Exodus, Ethiopia, and Emmanuel. He brings these themes to life in a unique African-American history that grows from the harsh experience of slavery into a rich culture that endures as one of the most important forces of twenty-first-century America.

In 1998 while changing after a kali training session, a friend approached Kevin Secours with a videocassette and asked, "You ever seen the Russian martial arts?" Looking at the Cyrillic label on the video, Secours asked, "Any good?" "It's interesting," the friend replied. "Weird as hell but interesting." Little did Secours know that tape would be his introduction to a 16-year (and counting) journey into the unorthodox world of the Russian martial arts, including years of high-level training under top Russian masters. On the video Secours saw mobility exercises unlike anything he had ever experienced. As he was to learn, the uniqueness of the Russian martial arts stemmed from the uniqueness of the country itself. The Cold War in the 1950s, during which the superpowers battled for supremacy, was the final forge that refined the Russian martial arts into what they are today. In anticipation of global warfare, the Soviet government commissioned combat

researchers to travel throughout the world to study different approaches. They tested these methods and integrated the best concepts with their own native traditions. This period of development led to the creation of distinct Soviet martial arts, including Sport Sambo, Combat Sambo, and Samoz, which was later modified and became known simply as Systema (literally "the System"). Approaching Systema from a decidedly Western perspective, Secours pressure-tested the strengths and benefits of every concept and technique, and ultimately took only what served him. He built his Combat Systema curriculum on a scientific approach to bio-mechanics, breath training, and combat psychology. In *The Complete Book of Combat Systema*, he keeps things practical, provable, and profitable for you to incorporate what works into your self-defense training.

In the 50s & 60s Coventry Climax engines powered many race-winning cars, including some driven by Stirling Moss & Jack Brabham. To get the true inside story, the author, an engineer, has talked to all surviving Coventry Climax personnel who were involved with the racing engines. The author was given full access to all of Walter Hassan's papers, photographs and engine drawings. After 30 months of original research and writing, this book describes exactly how these famous engines developed from industrial fire pumps to the Hillman Imp, from Le Mans winning Lotus Elites to Formula One winners driven by Stirling Moss and Jack Brabham, right through to the company's takeover by Jaguar in 1963. Viewed through the eyes of an engineer, and the detailed recollections of those who were there, this is a fascinating account of the trials and tribulations of leading edge race engine design from 1952 to 1966.
