For the Love of Physics

A catalogue of works by Elizabeth Poston with autobiographical context, statistical analysis and illustrations including photographs of Elizabeth.

The Divine Right of Capital

Polydore Vergil of Urbino (ca.1470-1555) fired his readers' imagination with his encyclopaedic book *On the inventors of all things* (*De inventoribus rerum* 1499). His account of the manifold origins of sciences, crafts and social institutions is a praise of man's inventive genius and a prototypical cultural history. Polydorus was a household name for several centuries. Erasmus envied his friend the book's success, Rabelais heaped scorn on it, Catholic censors put it on the index, while Protestants were fascinated with that papist work. In this first in-depth study of the Renaissance 'bestseller', Catherine Atkinson examines not only the Italian humanist's bona fide (mostly ancient) inventors, in books I-III, she enquires into the neglected and misunderstood, yet equally important, books IV-VIII (1521). This early modern text, written on the eve of the Reformation, is devoted to the highly controversial topic of the 'invention' of ecclesiastical institutions. The priest and humanist Vergil, who during his 50 years in England rose in the church hierarchy, is shown to be an acute observer of contemporary religious practice. He employs the inventor question (who was the first to do this?) as an instrument of historiography and by comparing medieval church rites and institutions with religious practice of antiquity, implicitly questions the singularity of the Christian church.

"YOU HAVE CHANGED MY LIFE" is a common refrain in the emails Walter Lewin receives daily from fans who have been enthralled by his world-famous video lectures about the wonders of physics. "I walk with a new spring in my step and I

look at life through physics-colored eyes,” wrote one such fan. When Lewin’s lectures were made available online, he became an instant YouTube celebrity, and The New York Times declared, “Walter Lewin delivers his lectures with the panache of Julia Child bringing French cooking to amateurs and the zany theatricality of YouTube’s greatest hits.” For more than thirty years as a beloved professor at the Massachusetts Institute of Technology, Lewin honed his singular craft of making physics not only accessible but truly fun, whether putting his head in the path of a wrecking ball, supercharging himself with three hundred thousand volts of electricity, or demonstrating why the sky is blue and why clouds are white. Now, as Carl Sagan did for astronomy and Brian Green did for cosmology, Lewin takes readers on a marvelous journey in *For the Love of Physics*, opening our eyes as never before to the amazing beauty and power with which physics can reveal the hidden workings of the world all around us. “I introduce people to their own world,” writes Lewin, “the world they live in and are familiar with but don’t approach like a physicist—yet.” Could it be true that we are shorter standing up than lying down? Why can we snorkel no deeper than about one foot below the surface? Why are the colors of a rainbow always in the same order, and would it be possible to put our hand out and touch one? Whether introducing why the air smells so fresh after a lightning storm, why we briefly lose (and gain) weight when we ride in an elevator, or what the big bang would have sounded like had anyone existed to hear it, Lewin never ceases to surprise and delight with the extraordinary ability of physics to answer even the most elusive questions. Recounting his own exciting discoveries as a pioneer in the field of X-ray astronomy—arriving at MIT right at the start of an astonishing revolution in astronomy—he also brings to life the power of physics to reach into the vastness of space and unveil exotic uncharted territories, from the marvels of a supernova explosion in the Large Magellanic Cloud to the unseeable depths of black holes. “For me,” Lewin writes, “physics is a way of seeing—the spectacular and the mundane, the immense and the minute—as a beautiful, thrillingly interwoven whole.” His wonderfully inventive and vivid ways of introducing us to the revelations of physics impart to us a new appreciation of the remarkable beauty and intricate harmonies of the forces that govern our lives.

Petrarch and the Textual Origins of Interpretation

Update to popular book on legends of rock's golden era Now in its long-awaited second printing, Bob Cianci's *Great Rock Drummers of the Sixties*, the universally acclaimed history of Sixties rock drummers and drumming, has been reissued in its original form with a revised section that thoroughly updates information on the drummers featured within. This group of rock drummers are arguably the most revered and copied musicians to ever sit behind the kit. All the prominent drummers of the era are spotlighted, including Ringo Starr, Charlie Watts, Keith Moon, Mitch Mitchell, Hal Blaine, and other legends. Long out of print, the original first edition of *Great Rock Drummers of the Sixties* was published in 1989 and went on to become a collectors' item. This in-demand book is back and better than ever, with a new cover, improved layout, and much more information for anyone interested in the Sixties, its music, and rock drummers.

In his years of travelling the length and breadth of Australia, David Darcy has met many an old timer with a story to share - childhood memories of a very different Australia, and stories from a lifestyle that is fast disappearing as Australia changes and takes its place in the modern world. Here David Darcy is on the road again, traversing the continent in search of a good yarn and an interesting face. Through candid portraits and poignant, intimate conversations with men and women from all walks of Australian life, he captures recollections of childhood memories, a life lived on the land, in the cities, on the shores of this great dry continent - stories from a disappearing world.

Discovering Medieval Song

Co-published by MENC: The National Association for Music Education. A History of American Music Education covers the history of American music education, from its roots in Biblical times through recent historical events and trends. It describes the educational, philosophical, and sociological aspects of the subject, always putting it in the context of the history of the United States. It offers complete information on professional organizations, materials, techniques, and personalities in music education.

A new look at the life, times, and music of Polish composer and piano virtuoso Fryderyk Chopin (1810–49), although the most beloved of piano composers, remains a contradictory figure, an artist of virtually universal appeal who preferred the company of only a few sympathetic friends and listeners. Chopin and His World reexamines Chopin and his music in light of the cultural narratives formed during his lifetime. These include the romanticism of the ailing spirit, tragically singing its death-song as life ebbs; the Polish expatriate, helpless witness to the martyrdom of his beloved homeland, exiled among friendly but uncomprehending strangers; the sorcerer-bard of dream, memory, and Gothic terror; and the pianist's pianist, shunning the appreciative crowds yet composing and improvising idealized operas, scenes, dances, and narratives in the shadow of virtuoso-idol Franz Liszt. The international Chopin scholars gathered here demonstrate the ways in which Chopin responded to and was understood to exemplify these narratives, as an artist of his own time and one who transcended it. This collection also offers recently rediscovered artistic representations of his hands (with analysis), and—for the first time in English—an extended tribute to Chopin published in Poland upon his death and contemporary Polish writings contextualizing Chopin's compositional strategies. The contributors are Jonathan D. Bellman, Leon Botstein, Jean-Jacques Eigeldinger, Halina Goldberg, Jeffrey Kallberg, David Kasunic, Anatole Leikin, Eric McKee, James Parakilas, John Rink, and Sandra P. Rosenblum. Contemporary documents by Karol Kurpiński, Adam Mickiewicz, and Józef Sikorski are included.

Although Francesco Petrarca (1304–74) is best known today for cementing the sonnet's place in literary history, he was also a philosopher, historian, orator, and one of the foremost classical scholars of his age. *Petrarch: A Critical Guide to the Complete Works* is the only comprehensive, single-volume source to which anyone—scholar, student, or general reader—can turn for information on each of Petrarch's works, its place in the poet's oeuvre, and a critical exposition of its defining features. A sophisticated but accessible handbook that illuminates Petrarch's love of classical culture, his devout Christianity, his public celebrity, and his struggle for inner peace, this encyclopedic volume covers both Petrarch's Italian and Latin writings and the various genres in which he excelled: poem, tract, dialogue, oration, and letter. A biographical introduction and chronology anchor the book, making Petrarch an invaluable resource for specialists in Italian, comparative literature, history, classics, religious studies, the Middle Ages, and the Renaissance.

Four hundred seventy years ago the Anabaptist movement was launched with the inauguration of believer's baptism and the formation of the first congregation of the Swiss Brethren in Zurich, Switzerland. This standard introduction to the history of Anabaptism by noted church historian William R. Estep offers a vivid chronicle of the rise and spread of teachings and heritage of this important stream in Christianity. This third edition of *The Anabaptist Story* has been substantially revised and enlarged to take into account the numerous Anabaptist sources that have come to light in the last half-century as well as the significant number of monographs and other scholarly works on Anabaptist themes that have recently appeared. Estep challenges a number of assumptions held by contemporary historians and offers fresh insights into the Anabaptist movement.

The St. Gregory Hymnal And Catholic Choir Book

This is the incredible story of a Second World War shoot-out between black and white American soldiers in a quiet Cornish town that ended up putting the 'special relationship' itself on trial. The subsequent court martial into what tabloids labelled a 'wild west' mutiny became front page news in Great Britain and the USA. Three thousand miles across the Atlantic, it mirrored and bolstered a fast-accelerating civil rights movement. At home it caused Churchill himself 'grave anxiety' while refracting an extraordinary truth about the real state of Anglo-American relations. For three long days the story raged before the turbulent war-torn world moved on and forgot forever amid ever-escalating D-Day preparations. This account of a shocking drama the authorities tried to hush up has been painstakingly pieced back together for the first time thanks to new archival research. When slotted into its unique context, extracted from wartime cabinet documents, secret government surveys, opinion polls, diaries, letters and newspapers as well as testimony from those who remember it, the story offers a rare and stunning window into a little-known dark side of the 'American Invasion.' By breathing new life into a vanished trial, it reveals a rare and surprising insight into the wider story of how Britain reacted to soldiers of the Jim Crow army when they came to stay.

Phantom Stress : Brain Training to Master Relationship Stress introduces the reader to Logosoma Brain Training, a four-step practice that liberates one from the stresses that cause self-sabotaging patterns of thought, emotion and behavior and undo secure relationships. Phantom Stress is rooted in adverse childhood experiences or past stresses from adult life. These phantoms memories eclipse appropriate responses to life in the present and derail healthy self awareness, disrupt secure boundaries, and destroy positive emotional connections. This book teaches readers how to track down and neutralize toxic memories that produce phantom stress, and open new brain pathways to reconnecting with others for creative adaptive resilience to stress lasting love and compassion.

Moody's OTC Industrial News Reports

Over the first four decades of the Reformation, hundreds of songs written in popular styles and set to well-known tunes appeared across the German territories. These polemical songs included satires on the pope or on Martin Luther, ballads retelling historical events, translations of psalms and musical sermons. They ranged from ditties of one strophe to didactic Lieder of fifty or more. Luther wrote many such songs and this book contends that these songs, and the propagandist ballads they inspired, had a greater effect on the German people than Luther's writings or his sermons. Music was a major force of propaganda in the German Reformation. Rebecca Wagner Oettinger examines a wide selection of songs and the role they played in disseminating Luther's teachings to a largely non-literate population, while simultaneously spreading subversive criticism of Catholicism. These songs formed an intersection for several forces: the comfortable familiarity of popular music, historical theories on the power of music, the educational beliefs of sixteenth-century theologians and the need for sense of community and identity during troubled times. As Oettinger demonstrates, this music, while in itself simple, provides us with a new understanding of what most people in sixteenth-century Germany knew of the Reformation, how they acquired their knowledge and the ways in which they expressed their views about it. With full details of nearly 200 Lieder from this period provided in the second half of the book, Music as Propaganda in the German Reformation is both a valuable investigation of music as a political and religious agent and a useful resource for future research.

Led Zeppelin Gear is the first book to historically document all of the musical equipment of the members of Led Zeppelin. It is also the story of the members, but

with a twist: their history as told through the gear they used. This book covers not only the member's personal backgrounds, but also live and studio session from the late 1950s to date, with detailed documentation illustrating what instruments and equipment were used during each periods. Every song recorded by the band is also documented, with input from within the Zeppelin's camp, gear manufacturers as well as from fans. Whether you are a musician, a Zeppelin fan or just the casual reader, you will learn many new facts about the band members and their gear from their 50+ year existence.

Chopin and His World

The early modern and modern cultural world in the West would be unthinkable without Petrarch and Boccaccio. Despite this fact, there is still no scholarly contribution entirely devoted to analysing their intellectual revolution. Internationally renowned scholars are invited to discuss and rethink the historical, intellectual, and literary roles of Petrarch and Boccaccio between the great model of Dante's encyclopedia and the ideas of a double or multifaceted culture in the era of Italian Renaissance Humanism. In his lyrical poems and Latin treatises, Petrarch created a cultural pattern that was both Christian and Classical, exercising immense influence on the Western World in the centuries to come. Boccaccio translated this pattern into his own vernacular narratives and erudite works, ultimately claiming as his own achievement the reconstructed unity of the Ancient Greek and Latin world in his contemporary age. The volume reconsiders Petrarch's and Boccaccio's heritages from different perspectives (philosophy, theology, history, philology, paleography, literature, theory), and investigates how these heritages shaped the cultural transition between the end of the Middle Ages and the early modern era, as well as European identity.

The book traces the roots of plant biotechnology from the basic sciences to current applications in the biological and agricultural sciences, industry, and medicine. Providing intriguing opportunities to manipulate plant genetic and metabolic systems, plant biotechnology has now become an exciting area of research. The book vividly describes the processes and methods used to genetically engineer plants for agricultural, environmental and industrial purposes, while also discussing related bioethical and biosafety issues. It also highlights important factors that are often overlooked by methodologies used to develop plants' tolerance against biotic and abiotic stresses and in the development of special foods, bio-chemicals, and

pharmaceuticals. The topics discussed will be of considerable interest to both graduate and postgraduate students. Further, the book offers an ideal reference guide for teachers and researcher alike, bridging the gap between fundamental and advanced approaches.

The Church Bells of Northamptonshire

If a reader of Chaucer suspects that an echo of a biblical verse may somehow depend for its meaning on traditional commentary on that verse, how does he or she go about finding the relevant commentaries? If one finds the word 'fire' in a context that suggests resonances beyond the literal, how does that reader go about learning what the traditional figurative meanings of fire were? It was to the solution of such difficulties that R.E. Kaske addressed himself in this volume setting out and analyzing the major repositories of traditional material: biblical exegesis, the liturgy, hymns and sequences, sermons and homilies, the pictorial arts, mythography, commentaries on individual authors, and a number of miscellaneous themes. An appendix deals with medieval encyclopedias. Kaske created a tool that will revolutionize research in its designated field: the discovery and interpretation of the traditional meanings reflected in medieval Christian imagery.

Born in Tuscany in 1304, Italian poet Francesco Petrarca is widely considered one of the fathers of the modern Italian language. His writings inspired the Humanist movement and, subsequently, the Renaissance, but few figures are as complex or as misunderstood. He was a devotee of the ancient pagan Roman world and a devout Christian, a lover of friendship and sociability, yet at times an intensely private and almost misanthropic man. He believed life on earth was little more than a transitory pilgrimage, and took himself as his most important subject-matter. Christopher S. Celenza provides the first general account of Petrarch's life and work in English in over thirty years, and considers how his reputation and identity have changed over the centuries. He brings to light Petrarch's unrequited love for his poetic muse, Laura, the experiences of his university years, the anti-institutional attitude he developed as he sought a path to modernity by looking toward antiquity, and his endless focus on himself. Drawing on both Petrarch's Italian and Latin writings, this is a revealing portrait of a paradoxical figure: a man of mystique, historical importance and endless fascination.

Phantom Stress

Mapping the Motet in the Post-Tridentine Era provides new dimensions to the discussion of the immense corpus of polyphonic motets produced and performed in the decades following the end of the Council of Trent in 1563. Beyond the genre's

rich connections with contemporary spiritual life and religious experience, the motet is understood here as having a multifaceted life in transmission, performance and reception. By analysing the repertoire itself, but also by studying its material life in books and accounts, in physical places and concrete sonic environments, and by investigating the ways in which the motet was listened to and talked about by contemporaries, the eleven chapters in this book redefine the cultural role of the genre. The motet, thanks to its own protean nature, not bound to any given textual, functional or compositional constraint, was able to convey cultural meanings powerfully, give voice to individual and collective identities, cross linguistic and confessional divides, and incarnate a model of learned and highly expressive musical composition. Case studies include considerations of composers (Palestrina, Victoria, Lasso), cities (Seville and Granada, Milan), books (calendrically ordered collections, non-liturgical music books) and special portions of the repertoire (motets pro defunctis, instrumental intabulations).

Letters of Old Age: Books X-XVIII

Dante

Through forty-five creative and concise essays by an international team of authors, this Cambridge History brings the fifteenth century to life for both specialists and general readers. Combining the best qualities of survey texts and scholarly literature, the book offers authoritative overviews of central composers, genres, and musical institutions as well as new and provocative reassessments of the work concept, the boundaries between improvisation and composition, the practice of listening, humanism, musical borrowing, and other topics. Multidisciplinary studies of music and architecture, feasting, poetry, politics, liturgy, and religious devotion rub shoulders with studies of compositional techniques, musical notation, music manuscripts, and reception history. Generously illustrated with figures and examples, this volume paints a vibrant picture of musical life in a period characterized by extraordinary innovation and artistic achievement.

The Anabaptist Story

A History of American Music Education

This volume addresses a far-reaching aspects of Petrarch research and interpretation: the essential interplay between Petrarch's texts and their material preparation and reception. To read and interpret Petrarch we must come to grips with the fundamentals of Petrarchan philology.

Inventing Inventors in Renaissance Europe

Elizabeth Poston

"All these aspects of his life and art, including the rigorous training and arduous

practice that transformed a blind peasant boy into a superb musician, his lifelong friendship with Olivier Messiaen, his sometimes turbulent family life, and the body of works he left - only J. S. Bach wrote more compositions for the organ - are narrated and analyzed by Ann Labounsky, who is uniquely qualified to write this definitive biography. A favorite Langlais pupil, she was asked by Langlais himself to write it and had his full cooperation for numerous long interviews over many years."--BOOK JACKET.

Medieval Christian Literary Imagery

This volume is a major contribution to the field of disability history in the ancient world. Contributions from leading international scholars examine deformity and disability from a variety of historical, sociological and theoretical perspectives, as represented in various media. The volume is not confined to a narrow view of 'antiquity' but includes a large number of pieces on ancient western Asia that provide a broad and comparative view of the topic and enable scholars to see this important topic in the round. Disability in Antiquity is the first multidisciplinary volume to truly map out and explore the topic of disability in the ancient world and create new avenues of thought and research.

Rerum Familiarium Libri, IX-XVI

This is the first volume ever to systematically study the subject of disabilities in the Roman world. The contributors examine the topic from head to toe: mental and intellectual disability, alcoholism, visual impairment, speech disorder, hermaphroditism, monstrous births, mobility problems, osteology and visual representations of disparate bodies.
