for epistemology. It brings together philosophers, linguists, and scholars working on knowledge traditions to advance work in epistemology that moves beyond the Anglophone sphere. The first group of chapters provide evidence of cross-linguistic or cultural diversity relevant to epistemology and discuss its possible implications. These essays defend epistemic pluralism based on Sanskrit data as a commitment to pluralism about epistemic stances, analyze the use of two Japanese knowledge verbs in relation to knowledge how, explore the Confucian notion of justification, and surveys cultural differences about the testimonial knowledge. The second group of chapters defends "core monism"—which claims that despite the cross-linguistic diversity of knowledge verbs, there is certain core epistemological meaning shared by all languages—from both a Natural Semantic Metalanguage (NSM) and skeptical perspective. The third cluster of essays considers the implications of cultural diversity for epistemology based on anthropological studies. These chapters explore real disparities in folk epistemology across cultures. Finally, the last two chapters discuss methods or perspectives to unify epistemology despite and based on the diversity of folk intuitions and epistemological concepts. Ethno-Epistemology is an essential resource for philosophers working in epistemology and comparative philosophy, as well as linguists and cultural anthropologists interested in the cultural-linguistic diversity of knowledge traditions.

### **The Cathedral and Others Poems**

A harrowing collision of SF tropes and the emotional landscape of Scandinavian noir. Bodelsen, "primarily associated with 1960s New-Realism in Danish literature," might be best known to English-speaking audiences for writing the source material for the 1978 heist film *The Silent Partner*, starring Christopher Plummer and Elliott Gould. An icy and complex (despite its brief length) speculation on the promise of immortality.

Since its formation in 1932, Saudi Arabia has been ruled by two interdependent families. The Al Sa'uds control politics and the descendants of Ibn Abd al-Wahhab impose Wahhabism—a violent, fanatical perversion of the pluralistic Islam practiced by most Muslims. Stephen Schwartz argues that Wahhabism, vigorously exported with the help of Saudi oil money, is what incites Palestinian suicide bombers, Osama bin Laden, and other Islamic terrorists throughout the world. Schwartz reveals the hypocrisy of the Saudi regime, whose moderate facade conceals state-sponsored repression and terrorism. He also raises troubling questions about Wahhabi infiltration of America's Islamic community and about U.S. oil companies sanitizing Saudi Arabia's image for the West. This sharp analysis and eye-opening expose illuminates the background to the September 11th terrorist attacks and offers new approaches for U.S. policy toward its closest ally in the Middle East.

surplus Jeeps and began exploring the rugged backcountry of the American West. This burgeoning market segment, which eventually became known as sport utility vehicles (SUVs), numbered about 40,000 units per year with offerings from Jeep, Scout, Toyota, and Land Rover. In 1966, Ford entered the fray with its Bronco, offering increased refinement, more power, and an innovative coil-spring front suspension. The Bronco caught on quickly and soon established a reputation as a solid backcountry performer. In Baja, the legendary accomplishments of racers such as Parnelli Jones, Rod Hall, and Bill Stroppe further cemented the bobtail's reputation for toughness. Ford moved upstream with the introduction of the larger Bronco for 1978, witnessing a huge increase in sales for the second-generation trucks. The Twin Traction Beam front end was introduced in the third generation, and further refinements including more aerodynamic styling, greater luxury, and more powerful fuel-injected engines came on board in the generations that followed. Through it all, the Bronco retained its reputation as a tough, versatile, and comfortable rig, both on and off the paved road. With the reintroduction of the Bronco for 2020, Ford is producing a vehicle for a whole new generation of enthusiasts that looks to bring modern styling and performance to the market while building on the 30-year heritage of the first five generations of the Bronco so dearly loved by their owners. From the development process and details of the first trucks through the 1996 models, author Todd Zuercher shares technical details, rarely seen photos, and highlights of significant models along with the stories of those people whose lives have been intertwined

## **The Haunted Season**

The extent to which modern social science continues to reflect the subjective traits of authors and the contexts in which they operate, rather than the objective facts or insights they claim to develop, remains one of the most striking features of social science research and writing. Kinloch and Mohan provide a multidisciplinary and worldwide examination of the ties between the subjective traits of social scientists, the contexts in which they affect research, and the kinds of knowledge they produce. The essays fall into five general topic areas: major theoretical issues, research as ideology, the political context of ideology, major factors in the academic setting, and the relationship between personal biography and professional ideology. This book will be of greatest concern to scholars, students, and researchers involved with the sociology of knowledge, social theory and methods, comparative social science, and social problems.

In his new book, 'The Cult of Vulgarity, ' Theodore Dalrymple charts how the out-of-touch elite have been responsible for pushing a culture of vulgarity in both the print and broadcast media, acting on the mistaken impression that they are giving the public what they want. He describes how vulgarity became a token of warm-heartedness, whilst advocating good taste made you seem cold. Using his years of experience of working as clinical psychiatrist in hospitals and he prisons, he shows the effect this subversion has had on the nation's well-being

Clear, finely nuanced, historically and philosophically mature, this is a vital reflection on the history of theology and in systematic theology.

### **Web Reasoning and Rule Systems**

Spare and incisive, the poems in *Losing the Ring in the River* deal with three strong women—Clara, Emma, and Liz, women who are tough, often sassy, and have dreams that aren't quelled by the realities they face. Saiser deftly explores the undercurrents connecting three generations and is at her most powerful when she explores how lives are restricted and sometimes painfully damaged by what people cannot or will not share with one another. Saiser's poetry is as harsh as it is beautiful; she avoids resolutions and easy endings, focusing instead on the small, hard-won victories that each woman experiences in her life and in her love of those around her.

### **Behold Your Queen!**

*Seven Stories of Grace* The list of authors who have illuminated the life of the Catholic clergy is impressive: G.K. Chesterton, Georges Bernanos, J.F. Powers, Edwin O'Connor, and Graham Greene. To that list you can now add Richard Infante, a priest himself

and a master of the art of fiction. This volume gathers his already-published stories with a new novella, "Saints and Sojourners." The drama in the stories emerges from matters peculiar to priestly life, yet applicable to every vocation. In priesthood as in family life, there are generation gaps. There are crises. There are infidelities - and near-infidelities. And there is always grace, though it sometimes arrives in a distressing disguise. "These stories are something more than realist. They're real. And so they hit a reader not the way words usually do, but rather the way life does." From the foreword by Mike Aquilina

Supported Collaborative Learning, directed by Claire O'Malley in Maratea, Italy, in 1989. We both felt that it would be interesting to organise a second Workshop in this area, but specifically concerned with the use of computers and networking (telematics) as communication tools for collaborative learning outside the formal school setting. We were particularly interested in examining the ways in which computer conferencing can be used for collaboration and group learning in the contexts of distance education, adult learning, professional training, and organisational networking. And we wanted to ensure that we included, in the scope of the Workshop, situations in which learning is a primary, explicit goal (e.g. an online training programme) as well as situations where learning occurs as a secondary, even incidental, outcome of a collaborative activity whose explicit purpose might be different (e.g. the activities of networked product teams or task groups). Another goal was to try to bring together for a few days people with three different perspectives on the use of computer conferencing: users, researchers, and software designers. We hoped that, if we could assemble a group of people from these three different constituencies, we might, collectively, be able to make a small contribution to real progress in the field.
