Classroom Bullying Prevention, Pre-K-4th Grade

This report describes and evaluates the initial effects of the 1984 Texas Education Reform Bill (House Bill 72), in which the Texas legislature enacted a massive attempt to enhance both equity and effectiveness in the State's system of elementary and secondary education. Chapter 1 describes the Bill's various financing components and focuses on its initial effect on disparities in spending among rich and poor districts. Chapter 2 examines the various reforms aimed at improving the quality of teaching, and Chapter 3 focuses on the provisions that affect students. Chapters 4-7 deal with the effects of House Bill 72 on programs which seek to provide special educational services (compensatory education, bilingual education, special education, and vocational education). Chapter 8 describes the implementation of new prekindergarten and summer preschool programs. Chapter 9 discusses the difficulty of

implementing curriculum reforms at the State and local levels, and focuses on the confusion that has resulted from House Bill 72's requirements and those of a 1981 law, House Bill 246, which called for different types of reform. Finally, Chapter 10 presents general conclusions and recommendations. The study uncovered widespread satisfaction with the general direction of reform, it is said, except in certain areas where implementation of the law has been difficult. The State, it is argued, must be willing to accept that education is likely to be more expensive in the future. (KH)

"The "activities" section has been a regular feature of the Mathematics teacher since 1972. The section provides classroom teachers and teacher educators with a useful source of discovery lessons, laboratory experiences, mathematical games and puzzles, and model constructions for use with students in grades 7 through 12. This compilation of reprinted activities is organized in five sections around the following topics : computational skills, calculators, geometry, measurement, and problem solving."--lii.

Official Florida Statutes, 1983

Early Childhood Curriculum for All Learners: Integrating Play and Literacy Activities is designed to teach early childhood professionals about the latest research on play and early literacy and then to show them practical methods for adapting this research to everyday classroom practices that will encourage the development of learning skills. The authors link solid, play-based research to specific developmentally appropriate practices. By combining these two areas, the text demonstrates that academic learning and play activities are highly compatible, and that children can and do develop academic skills through play. In addition, the text focuses on socio-dramatic play, a
