If the truth were told, this volume and its direct antecedents must rank among the most ambitious, if not simply pretentious, endeavors imaginable, at least in the social sciences. The titles of the volume and the chapters, promising to integrate the experiences of the sense of justice and the affectional bonding of people in close relations, seem straightforward and reasonable enough. What they fail to convey, however, is the simple bald fact that we in the human social sciences have no firm grasp on either of these two fundamental experiences-what we sometimes call "love" and "justice." To begin with, even as "scientists" committed to understanding based upon systematic propositions linking publicly observable concepts, we have no clear consensus concerning the nature of the affectional bonds linking people in close relationships-love, intimacy, caring, mutual responsiveness, or the sense of justice, fairness, deserving, and in our efforts to understand entitlement. And we are continually handicapped stand these complex, moving experiences by the persistent tendency to reduce them to manifestations of, "nothing but," familiar psychological or even biological processes-"secondary rewards," "selfish genes." So, why then this volume? Although there are many answers to the question, probably the most germane is that the basic issues are so important and intriguing that the recent past has seen rather dramatic parallel growth in social scientists' interest in these two areas-justice and close relationships.

From ancient to modern times, sexualised war violence against women was tolerated if not encouraged as a means of reward, propaganda, humiliation, and terror. This was and is in defiance of international laws that have criminalised acts of sexualised war violence since the 18th century. Ad hoc international tribunals have addressed especially war rape since the 15th century. The International Criminal Court (ICC), however, is the first independent, permanent, international criminal court that recognises not only war rape but also sexual slavery and other sexualised crimes as crimes against humanity, war crimes, and acts of genocide in its statute and supporting documents. This book explores how the ICC definitions of rape and forced marriage came about, and addresses the ongoing challenge of how to define war rape and forced marriage in times of armed conflict in a way that adequately reflects women's experiences, as well as the nature of the crimes. In addition to deepening the understanding of the ICC negotiations of war rape and forced marriage, and of the crimes

themselves, this volume highlights relevant factors that need to be considered when criminalising acts of sexualised war violence under international law. *Sexualised Crimes, Armed Conflict and the Law* draws on feminist and constructivist theories and offers a comprehensive theoretical and empirical examination of the definition of rape and forced marriage. It presents the latest state of knowledge on the topic and will be of interest to researchers, academics, policymakers, officials and intergovernmental organisations, and students in the fields of post-conflict law and justice, international law, human rights law, international relations, gender studies, politics, and criminology.

"Tell me about a time." The words evoke a child's fairy-tale innocence. ### **The Arab-Israeli Conflict**

This book explores the role of evangelicalism in the conflict in Northern Ireland and discusses how it may contribute to a peaceful political transition. Ganiel analyzes the 'traditional' evangelicals who are associated with the Reverend Ian Paisley, as well as a new breed of 'mediating' evangelicals who have broken with the traditions of the past. Comparing evangelical politics in Northern Ireland to the U.S. and Canada, this book sheds light on future directions for Northern Irish evangelicalism. The conclusion has global reverberations as it reflects on the place of 'strong' religions--such as

evangelicalism and other forms of fundamentalism—in contemporary world politics.

### **Getting Past No**

In a multi-cultural society, differing worldviews among groups can lead to conflict over competing values and behaviors. Nowhere is this tension more concrete than in the wilderness, where people of different cultures hunt and fish for the same animals. White Americans tend to see nature as something external which they have some responsibility to care for. In contrast, Native Americans are more likely to see themselves as one with nature. In Culture and Resource Conflict, authors

Douglas Medin, Norbert Ross, and Douglas Cox investigate the discord between whites and Menominee American Indians over hunting and fishing, and in the process, contribute to our understanding of how and why cultures so often collide. Based on detailed ethnographic and experimental research, *Culture and Resource Conflict* finds that Native American and European American hunters and fishermen have differing approaches—or mental models—with respect to fish and game, and that these differences lead to misunderstanding, stereotyping, and conflict. Menominee look at the practice of hunting and fishing for sport as a sign of a lack of respect for nature. Whites, on the other hand, define respect for nature more on grounds of resource management and conservation. Some whites believe—contrary to fact—that Native Americans are depleting animal populations with excessive hunting and fishing, while the Menominee protest that they only hunt what they need and make extensive use of their catch. Yet the authors find that, despite these differences, the two groups share the fundamental underlying goal of preserving fish and game for future generations, and both groups see hunting and fishing as deeply meaningful activities. At its core, the conflict between these two groups is more about mistrust and stereotyping than actual disagreement over values. Combining the strengths of psychology and anthropology, *Culture and Resource Conflict* shows how misunderstandings about the motives of others can lead to hostility and conflict. As debates over natural resources rage worldwide, this unique book demonstrates the obstacles that must be overcome for different groups to reach consensus over environmental policy.

### **The Assimilation Myth**

## **American Public Opinion Toward Israel and the Arab-Israeli Conflict**

This book is a logical consequence of a book published in 1965 under the title Immigrants Assimilation - A Study of Polish People in Western Australia. In the original study, adult Polish immigrants were asked, amongst other things, about their attitudes to their children's assimilation to the culture of the Australian society. Needless to say, some parents were eager for their children to remain Polish, whilst others expressed a desire for them to become Australians. Naturally, it seemed practical to investigate the children's attitudes to their own assimilation. The present study is therefore mainly concerned with these attitudes. Much has been written about second generation immigrants and a lot has been of a speculative nature, since nobody has yet gone into the homes of immigrants and asked them and their children about the way they feel regarding a culture which is new to them. The present study is unique in this sense because it fills a vital gap by studying assimilation of two generations of immigrants belonging to the same family. Second generation immigrants have occupied the attention of many writers in the sociological and psychological literature. Vital social phenomena such as delinquency, mental breakdowns, and marginality have been ascribed to the second generation immigrants on account of their status as midway people between two cultural milieus. Some of these phenomena are traced in the present study. It is generally accepted that
