The intimate, fly-on-the wall tale of the decline and fall of an America icon With one notable exception, the firms that make up what we know as Wall Street have always been part of an inbred, insular culture that most people only vaguely understand. The exception was Merrill Lynch, a firm that revolutionized the stock market by bringing Wall Street to Main Street, setting up offices in far-flung cities and towns long ignored by the giants of finance. With its “thundering herd” of financial advisers, perhaps no other business, whether in financial services or elsewhere, so epitomized the American spirit. Merrill Lynch was not only “bullish on America,” it was a big reason why so many average Americans were able to grow wealthy by investing in the stock market. Merrill Lynch was an icon. Its sudden decline, collapse, and sale to Bank of America was a shock. How did it happen? Why did it happen? And what does this story of greed, hubris, and incompetence

tell us about the culture of Wall Street that continues to this day even though it came close to destroying the American economy? A culture in which the CEO of a firm losing \$28 billion pushes hard to be paid a \$25 million bonus. A culture in which two Merrill Lynch executives are guaranteed bonuses of \$30 million and \$40 million for four months' work, even while the firm is struggling to reduce its losses by firing thousands of employees. Based on unparalleled sources at both Merrill Lynch and Bank of America, Greg Farrell's *Crash of the Titans* is a Shakespearean saga of three flawed masters of the universe. E. Stanley O'Neal, whose inspiring rise from the segregated South to the corner office of Merrill Lynch—where he engineered a successful turnaround—was undone by his belief that a smooth-talking salesman could handle one of the most difficult jobs on Wall Street. Because he enjoyed O'Neal's support, this executive was allowed to build up an astonishing \$30 billion position in CDOs on the firm's balance sheet, at a time when all other Wall Street firms were desperately trying to exit the business. After O'Neal comes John Thain, the cerebral, MIT-educated technocrat whose rescue of the New York Stock Exchange earned him the nickname "Super Thain." He was hired to save Merrill Lynch in late 2007, but his belief that the markets would rebound led him to underestimate the depth of Merrill's problems. Finally, we meet Bank of America CEO Ken Lewis, a street fighter raised barely above the poverty line in rural Georgia, whose "my way or the highway" management style suffers fools more easily than potential rivals, and who made a \$50 billion commitment over a September weekend to buy a business he really didn't understand, thus jeopardizing his own institution. The merger itself turns out to be a bizarre combination of cultures that blend like oil and water, where slick Wall Street bankers suddenly find themselves reporting to a cast of characters straight out of the Beverly Hillbillies. BofA's inbred culture, which perceived New York banks its enemies, was based on loyalty and a good-ol'-boy network in which competence played second fiddle to blind obedience. *Crash of the Titans* is a financial thriller that puts you in the theater as the historic events of the financial crisis unfold and people responsible for billion of dollars of other people's money gamble recklessly to enhance their power and their paychecks or to save their own skins. Its wealth of never-before-revealed information and focus on two icons of corporate America make it the book that puts together all the pieces of the Wall Street disaster. Crash of the Titans

Communities Dominate Brands: Business and marketing challenges for the 21st century is a book about how the new phenomenon of digitally connected communities are emerging as a force to counterbalance the power of the big brands and advertising. The book explores the problems faced by branding, marketing and advertising facing multiple radical changes in this decade. Communities Dominate Brands discusses how disruptive effects of digitalisation and connectedness introduce threats and opportunities. The authors compellingly illustrate how modern consumers are forming communities and peer-groups to pool their power resulting in a dramatic revolution of how businesses interact with their customers. The book provides practical guidance of how to move from obsolete interruptive advertising to interactive engagement marketing and community based communications, with dozens of real business examples from around the world. Communities Dominate Brands addresses its topic from a marketing (including advertising and branding) perspective and maintains a rigorous focus on business and profit dimensions of the issues involved. The book discusses such recent phenomena as blogging, virtual environments, mobile phone based swarming and massively multiplayer games. The book

introduces a new generation of consumers called Generation-C (for Community). The book also discusses such new concepts as the Connected Age, Reachability, the Four C's, Alpha Users, and introduces Communities as an unavoidable new element into the traditional communication model. Combining the digital trends, modern management theories, and emerging new customer behaviour, Communities Dominate Brands arrives to its conclusion, that traditional marketing methods are increasingly ineffective and even becoming counterproductive. The power of the brands and the abuses by marketing have created a vacuum for a counterbalance, and digitally connected communities, the blogosphere, gamers, and especially the always-on connectedness of those on mobile phone networks, are emerging as the counterforce to redress the balance. The power of smart mobs and digitally enlightened communities will react rapidly to marketing excesses as the natural force balancing the power of the brands. The way a business can and must interact with the powerful new communities is through engagement marketing, by enticing the communities to interact with the brands. Communities Dominate Brands covers the major changes taking place in business and industry worldwide from leading digitally connected societies such as Finland, Korea, Japan, Hong Kong, UK and the USA. The authors discuss the business relevance of such community related technologies and phenomena such as blogging, CANs, iPod, MMOGs, MVNOs, PVRs, Ringing Tones, SMS text messaging, swarming, VOD. This is the definitive business book on the impact of new technologies, not explaining how technology works, but showing what businesses need to do to make money in the new digitally converging environment. Communities Dominate Brands analyses early successes of engaging communities by global brands such as Adidas, Apple, Audi, BBC, Boeing, Coca Cola, eBay, Ford, Google, Guinness, Hush Puppies, Lonely Planet, MTV, Nokia, Orange, Philips, Red Bull, Sony, Tesco, Tony & Guy, Vodafone, etc. The lessons are amplified with insights from rough punishment by communities suffered by Hutchison/Three networks, Kryptonite locks, Mazda, the Philippines Government, etc. Fully indexed, impeccably researched with documented sources, offering over 50 current business examples and over a dozen case studies, Communities Dominate Brands is a hands-on practical business handbook on how to adjust marketing to deal with communities. With tools such as the Four C's and Reachability, the authors provide a competitive head-start to all who want to achieve customer satisfaction and return business in the 21st century.

Kayleigh Towne is a beautiful and successful singer-songwriter, and Edwin Sharp is her biggest fan. When she replies to one of his fan letters with 'XO', Edwin is convinced she loves him, and that her latest hit song 'Your Shadow' was written for him. Nothing Kayleigh or her lawyers can say persuades him otherwise. Then the singer gets an anonymous phone call; it's the first verse of 'Your Shadow' playing. Soon after, one of the crew is horribly murdered. Kayleigh's friend Kathryn Dance, a special agent with the California Bureau of Investigation, knows that stalking crimes are not one-off occurrences, and, sure enough, more verses of the song are played as warnings of death to follow. With a little help from forensic criminalist Lincoln Rhyme, Dance must use her kinesic and investigative skills in an attempt to find the killer before more people die. Deaver has written the actual song, 'Your Shadow'. Readers are able to download it from www.jefferydeaver.com.

The IECC addresses energy efficiency on several fronts including cost savings, reduced energy usage, conservation of natural resources and the impact of energy usage on the environment. Key changes include: Log homes designed in accordance with the standard ICC 400, Standards on the Design and Construction of Log Structures, are exempt from the building thermal envelope requirements of the IECC. The maximum allowable fenestration U-factors in Table R402.1.2 (for the prescriptive compliance path) for climates zones 3 through 8 have been reduced from the values in the 2015 edition. The ICC/RESNET 380 standard has been included as one of standards that can be used for determining the air leakage rate of a building or dwelling unit. The Energy Rating Index compliance alternative index values have been increased slightly however, the method for determining an index is now required to be in accordance with standard ICC/RESNET 301. Revisions to interior and exterior lighting power budgets and better clarity for lighting controls. Clarity that regardless of design methodology, system commissioning is required. Anyone who has ever stood on the shores of Monterey Bay, watching the rolling ocean waves and frolicking otters, knows it is a unique place. But even residents on this idyllic California coast may not realize its full history. Monterey began as a natural paradise, but became the poster child for industrial devastation in John Steinbeck's Cannery Row, and is now one of the most celebrated shorelines in the world. It is a remarkable story of life, death, and revival—told here for the first time in all its stunning color and bleak grays. *The Death and Life of Monterey Bay* begins in the eighteenth century when Spanish and French explorers encountered a rocky shoreline brimming with life—raucous sea birds, abundant sea otters, barking sea lions, halibut the size of wagon wheels, waters thick with whales. A century and a half later, many of the sea creatures had disappeared, replaced by sardine canneries that sickened residents with their stench but kept the money flowing. When the fish ran out and the climate turned, the factories emptied and the community crumbled. But today, both Monterey's economy and wildlife are resplendent. How did it happen? The answer is deceptively simple: through the extraordinary acts of ordinary people. *The Death and Life of Monterey Bay* is the biography of a place, but also of the residents who reclaimed it. Monterey is thriving because of an eccentric mayor who wasn't afraid to use pistols, axes, or the force of law to protect her coasts. It is because of fishermen who love their livelihood, scientists who are fascinated by the sea's mysteries, and philanthropists and community leaders willing to invest in a world-class aquarium. The shores of Monterey Bay revived because of human passion—passion that enlivens every page of this hopeful book.

Get to know the guitars so famous that their names are household words among enthusiasts. First published in 2010, the first-ever illustrated history of the specific guitars of the men and women who made the music is now expanded to include 32 additional iconic guitars and their owners. Ultimate Star Guitars showcases B.B. King's "Lucille," Eric Clapton's "Blackie," Stevie Ray Vaughan's "First Wife," Billy F Gibbons's "Pearly Gates," Neil Young's "Old Black," and dozens upon dozens more. Other best-selling guitar histories look at the rank-and-file models, but Ultimate Star Guitars is unique in profiling the specific favorites of famous players - oftentimes million-dollar babies, such as the 1968 Stratocaster that Jimi Hendrix burned at Woodstock and which sold at Sotheby's in 1993 for \$1.3 million. Guitar journalist Dave Hunter explains the stories behind each: the important sessions on which they were used, landmark tours and gigs on which they were played, modifications made by their owners, and more. From twangy country to scorching metal, from full-throttle punk to sophisticated jazz, and from gut-punch blues to lo-fi indie rock, Ultimate Star Guitars is illustrated with performance and candid photography of the artists with their star guitars, relevant memorabilia, and more often than not, studio shots of the guitars or signature models based on them. An information-packed visual feast for guitar enthusiasts!

Energy security, rising energy prices (oil, gas, electricity), 'peak oil', environmental pollution, nuclear energy, climate change and sustainable living are hot topics across the globe. Meanwhile, abundant and perpetual wind resources offer opportunities, via recent technological developments, to provide part of the solution to address these key issues. The rapid growth of large-scale wind farm installations has now led to the generation of clean electricity for tens of millions of homes around the world. However, despite the potential to reduce the losses and costs associated with transmission and to use local wind acceleration techniques to improve energy yields, the potential for urban wind energy has yet to be realised. Although there is increasing public interest, the uptake of urban wind energy in suitable areas has been slow. This is in part due to a lack of understanding of key issues such as: available wind resources; technology integration; planning processes (include assessment of environmental impacts and public safety due to close proximity to people and property); energy consumption in buildings versus energy production from turbines; economics (including grants, subsidies, maintenance); and the effect of complex urban windscapes on performance. Urban Wind Energy attempts to illuminate these areas, addressing common concerns highlighting pitfalls, offering real world examples and providing a framework to assess viability in energy, environmental and economic terms. It is a comprehensive guide to urban wind energy for architects, engineers, planners, developers, investors, policy-makers, manufacturers and students as well as community organisations and home-owners interested in generating their own clean electricity.
