Intended for practitioners, this study has three principal aims: (1) to reduce the breadth of formal grammar instruction by first locating those areas where grammar and writing overlap and then identifying those kinds of writing problems most amenable to treatment with a grammar-based approach; (2) to decrease the classroom hours spent on formal grammar instruction by showing how to capitalize on the already acquired yet unconscious knowledge that all native writers have of their language; and (3) to make this streamlined "writer's grammar" more productive by showing how to integrate it with style, content, and organization.

The book is directed toward teachers of writing who, to varying degrees, struggle with the unwieldy partnership of grammar and writing. Chapters 1 and 2 serve to examine some probable reasons why grammar instruction has failed to improve writing quality, to delimit radically the scope of grammar instruction, and to identify specific areas where a knowledge of a minimal set of grammatical categories might be of help. Chapters 3 and 4 focus on the use of native-speaker abilities in place of formal grammar instruction to treat certain kinds of sentence-level writing problems. Chapter 5 suggests a promising way to integrate the diminished focus on grammar with style, content, and organization. Finally, chapter 6 summarizes several pragmatic paradoxes that currently beset grammar instruction in the schools. (MG)

### **Five Hundred and One Grammar and Writing Questions**

"HELP! My Students Can't Write!" Why You Need a Writing Revolution in Your Classroom and How to Lead It. The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, TWR can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities TWR is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning

content.

When one defines "order" as a sorting of priorities, it becomes beautifully clear as to what Foucault is doing here. With virtuoso showmanship, he weaves an intensely complex history of thought. He dips into literature, art, economics and even biology in *The Order of Things*, possibly one of the most significant, yet most overlooked, works of the twentieth century. Eclipsed by his later work on power and discourse, nonetheless it was *The Order of Things* that established Foucault's reputation as an intellectual giant. Pirouetting around the outer edge of language, Foucault unsettles the surface of literary writing. In describing the limitations of our usual taxonomies, he opens the door onto a whole new system of thought, one ripe with what he calls "exotic charm". Intellectual pyrotechnics from the master of critical thinking, this book is crucial reading for those who wish to gain insight into

that odd beast called Postmodernism, and a must for any fan of Foucault.
