The award-winning, evidence-based violence prevention and intervention program for children. I Can Problem Solve (ICPS) is a universal school-based program designed to enhance the interpersonal cognitive processes and problem-solving skills of children in preschool through grade 6. Developed by Myrna B. Shure for three age groups and supported by 25 years of meticulous research, ICPS is proven to prevent and reduce early high-risk behaviors such as impulsivity and social withdrawal and to promote prosocial behaviors such as concern for others and positive peer relationships. ICPS for Kindergarten and Primary Grades Structured Lessons: A total of 83 lessons, each with an easy-to-follow teacher script,

guide children's learning of essential ICPS vocabulary and concepts and problem-solving skills (alternative solutions, consequences, solution-consequence pairs). Interaction in the Classroom: Teachers and students learn a whole new way to communicate, using ICPS dialoging, a special technique of problem-solving talk. The result is an improved classroom climate with less conflict and more cooperation. Integration into the Curriculum: Children practice ICPS problem-solving concepts as they work on math, reading, science, social studies, and other academic subjects. Lessons speak to children on their own level, using games, stories, puppets, illustrations, and role-plays. A key program principle is that the child, not the teacher, must solve the problem at hand. A Library Journal Best Book of 2015 Go behind the scenes of seven of today's most popular narrative radio shows and podcasts, including This American Life and RadioLab, in graphic narrative. Every week, millions of devoted fans tune in to or download This American Life, The Moth, Radiolab, Planet Money, Snap Judgment, Serial, Invisibilia and other narrative radio shows. Using personal stories to breathe life into complex ideas and issues, these beloved programs help us to understand ourselves and our world a little bit better. Each has a distinct style, but every one delivers stories that are brilliantly told and produced. Out on the Wire offers an unexpected window into this new kind of storytelling—one that literally illustrates the making of a purely auditory medium. With the help of This American Life's Ira Glass, Jessica Abel, a cartoonist and devotee of narrative radio, uncovers just how radio producers construct narrative, spilling some juicy insider details. Jad Abumrad of RadioLab talks about chasing moments of awe with scientists, while Planet Money's Robert Smith lets us in on his slightly goofy strategy for putting interviewees at ease. And Abel reveals how mad—really mad—Ira Glass becomes when he

receives edits from his colleagues. Informative and engaging, *Out on the Wire* demonstrates that narrative radio and podcasts are creating some of the most exciting and innovative storytelling available today. From the Trade Paperback edition.

Instant New York Times bestseller “Howard Zinn on acid or some bullsh\*t like that.” —Tim Heidecker The creators of the cult-hit podcast Chapo Trap House deliver a manifesto for everyone who feels orphaned and alienated—politically, culturally, and economically—by the lanyard-wearing Wall Street

centrism of the left and the lizard-brained atavism of the right: there is a better way, the Chapo Way. In a guide that reads like “a weirder, smarter, and deliciously meaner version of The Daily Show’s 2004 America (The Book)” (Paste), Chapo Trap House shows you that you don’t have to side with either sinking ships. These self-described “assholes from the internet” offer a fully ironic ideology for all who feel politically hopeless and prefer broadsides and tirades to reasoned debate. Learn the “secret” history of the world, politics, media, and everything in-between that THEY don’t want you to know and chart a course from our wretched present to a utopian future where one can post in the morning, game in the afternoon, and podcast after dinner without ever becoming a poster, gamer, or podcaster. A book that’s “as intellectually serious and analytically original as it is irreverent and funny” (Glenn Greenwald, New York Times bestselling author of No Place to Hide) The Chapo Guide to Revolution features illustrated taxonomies of contemporary liberal and conservative characters, biographies of important thought leaders, “never before seen” drafts of Aaron Sorkin’s Newsroom manga, and the ten new laws that govern Chapo Year Zero (everyone gets a dog, billionaires are turned into Soylent, and logic is outlawed). If you’re a fan of sacred cows, prisoners being taken, and holds being barred, then this book is NOT for you. However, if you feel disenfranchised from the political and cultural nightmare we’re in, then Chapo, let’s go...

Recording great drum sounds is one of the most challenging tasks facing any drummer, audio engineer, or music producer. Capturing the variety, nuance, and excitement of the drum kit and other percussion instruments is part art, part science, and part creative experimentation--and there's a lot more to it than simply setting up a mic and hitting the Record button. In this comprehensive book, recording engineer/producer/mixer Mike Major leads you through the sometimes complex and often misunderstood art of recording drums. Along the way, you'll cover all the ins and outs, including establishing the drums' role in the song, preparing the drum kit (and the room) for recording, choosing microphones and getting sounds, and tracking, overdubbing, editing, and choosing the final take. Not only will you find plenty of tips and techniques to help your recordings sound better than ever, you'll also be inspired to examine the philosophies and thought processes that go into creating and capturing drum sounds that are unique, interesting, and powerful. With plenty of helpful illustrations and sample setups, and all of the files you need on the companion website, **RECORDING DRUMS: THE COMPLETE GUIDE** puts you on the fast track to great drum sounds.
