Reference Guide to American Literature

From its first edition the purpose of Walford has been to identify and evaluate the widest possible range of reference materials. No rigid definition of reference is applied. In addition to the expected bibliographies, indexes, dictionaries, encyclopaedias, and directories, a number of important textbooks and manuals of general practice are included. While the majority of the items are books, Walford is a guide to reference material. Thus periodical articles, microforms, online and CD-ROM sources are all represented. In this volume a particular effort has been made to improve coverage of the latter two categories.

This new edition of Bleiler's popular and award-winning guide is a superb reference and research tool, as well as an invaluable aid to collection development. Evaluative reviews of approximately 1,000 reference works on mystery and detective fiction provide in-depth discussions of their contents, strengths, weaknesses, and usefulness, often comparing titles to similar or competing works. Encyclopedias, biographical dictionaries, genre guides, national bibliographies, media studies, general reader's guides, web sites, and organizations are just some of the information sources covered in this thorough source. All annotations from the previous edition have been reviewed, revised, and updated; and complete critical reviews of works published since the last edition have been added, including titles released in the present year (2003). More than one third of monographic citations are new to this edition. In a feature new to this edition, Bleiler indexes reference works that provide biographical information on mystery writers, and lists the key websites on these authors. More than 2,500 bio-bibliographic citations to individual mystery writers are given-information that will be particularly useful to those researching specific authors. Organized by publication type for easy access, this work also features a detailed index, making it an essential guide for scholars, researchers, educators, readers' advisors, reference librarians, collection development specialists, and fans.
