A commuter's survival guide and a visitor's crash course on the sometimes hilarious, sometimes harrowing reality of Boston driving, The Boston Driver's

Handbook: The Almost Post Big Dig Edition offers expert advice and witty encouragement for conquering the streets. This newly revised edition has tips on everything you need to know-from where to park, how to drive in the winter, how to execute the "sidesqueeze" in heavy traffic -and everything you don't necessarily need to know but will love to know anyway-from pedestrian point values (absent-minded MIT professor, 2 points; mayor, 10 points) to the best accident excuses of all time. With the latest information on the confusion caused by Boston's "Central Artery Relocation Project," The Boston Driver's Handbook is as practical as it is entertaining, making it a must-have for the tourist and the Boston native alike.

Planning for Power Advertising

This book is a step-by-step guide to producing a sound foundation for advertising: one that will serve as the springboard to inspire powerful creative expression. Rich in cases from the evolving Indian context, Planning for Power Advertising offers an understanding of how strategic advertising is created. It takes the reader through cases and analyses of what worked or did not work in the marketplace. Anand Halve involves the reader throughout in exercises with Action Points at the end of most chapters—an approach that brings alive the concepts within, and helps readers discover the theory in practice. For advertising professionals, this is a manual to create a robust advertising brief. For students of advertising and marketing, Planning for Power Advertising is a simulation exercise from which they will learn how to apply the principles that will help them in their future careers. And for professionals in areas related to advertising—such as media, event management and PR—this book provides an insight into how the strategic underpinning of advertising is built.
