Ten Strategies of a World-Class Cyber Security Operations Center conveys MITRE's accumulated expertise on enterprise-grade computer network defense. It covers ten key qualities of leading Cyber Security Operations Centers (CSOCs), ranging from their structure and organization, to processes that best enable smooth operations, to approaches that extract maximum value from key CSOC technology investments. This book offers perspective and context for key decision points in structuring a CSOC, such as what capabilities to offer, how to architect large-scale data collection and analysis, and how to prepare the CSOC team for agile, threat-based response. If you manage, work in, or are standing up a CSOC, this book is for you. It is also available on MITRE's website, www.mitre.org.

Computers in Our World

During the past four years, political activism has grown to a level that has not been seen in the United States since the Vietnam War. Tensions over the war in Iraq and the presidential election motivated hundreds of thousands of people on both sides of the political fence to take to the streets. Politics the Wellstone Way offers a comprehensive set of strategies to help progressives channel that energy into winning issue-based and electoral campaigns. Wellstone Action is a nonprofit organization dedicated to continuing Paul and Sheila Wellstone's fight for progressive change and economic justice by teaching effective political action skills to people across the country. Politics the Wellstone Way is a workshop in book form, providing the detailed framework needed to jump-start a new generation of activists plus plenty of helpful tools for old pros, including articulating a strong message, base building, field organizing, budgeting, fundraising, scheduling, getting out the vote, and grassroots advocacy and lobbying, illustrated by practical and inspirational examples. From the school board all the way to the White House, Politics the Wellstone Way instructs people on becoming better organizers, candidates, campaign workers, and citizen activists, empowering them to make their voices heard. Wellstone Action was established by

the Wellstones' two surviving sons, David and Mark. The main vehicle for this ongoing work is Camp Wellstone, a weekend training program that Wellstone Action leads regularly in locations across the country. Jeff Blodgett, Paul Wellstone's longtime campaign manager, is the executive director of Wellstone Action. For more information visit www.wellstoneaction.com.

How and Why to Read and Create Children's Digital Books outlines effective ways of using digital books in early years and primary classrooms, and specifies the educational potential of using digital books and apps in physical spaces and virtual communities. With a particular focus on apps and personalised reading, Natalia Kucirkova combines theory and practice to argue that personalised reading is only truly personalised when it is created or co-created by reading communities. Divided into two parts, Part I suggests criteria to evaluate the educational quality of digital books and practical strategies for their use in the classroom. Specific attention is paid to the ways in which digital books can support individual children's strengths and difficulties, digital literacies, language and communication skills. Part II explores digital books created by children, their caregivers, teachers and librarians, and Kucirkova also offers insights into how smart toys, tangibles and augmented/virtual reality tools can enrich children's reading for pleasure. How and Why to Read and Create Children's Digital Books is of interest to an international readership ranging from trainee or established teachers to MA level students and researchers, as well as designers, librarians and publishers. All are inspired to approach children's reading on and with screens with an agentic perspective of creating and sharing. Praise for How and Why to Read and Create Children's Digital Books 'This is an exciting and innovative book – not least because it is freely available to read online but because its origins are in primary practice. The author is an accomplished storyteller, and whether you know, as yet, little about the value of digital literacy in the storymaking process, or you are an accomplished digital player, this book is full of evidence-informed ideas, explanations and inspiration.' Liz Chamberlain, Open University 'At a time when children's reading is increasingly on-screen, many teachers, parents and carers are seeking practical, straightforward guidance on how to support children's engagement with digital books. This volume, written by the leading expert on personalised e-books, is packed with app reviews, suggestions and insights from recent international research, all underpinned by careful analysis of digital book features and recognition of reading as a social and cultural practice. Providing accessible guidance on finding, choosing, sharing and creating digital books, it will be welcomed by those excited by the possibilities of enthusing children about reading in the digital age.' Cathy Burnett, Professor of Literacy and Education, Sheffield Hallam University

Master Guide for Underwater Digital Photography

Documentary Storytelling has reached filmmakers and filmgoers worldwide with its unique focus on the key ingredient for success in the growing global documentary marketplace: storytelling. This practical guide reveals how today's top filmmakers bring the tools of narrative cinema to the world of nonfiction film and video without sacrificing the rigor and truthfulness that give documentaries their power. The book offers practical advice for producers, directors, editors, cinematographers, writers and others seeking to make ethical and effective films that merge the strengths of visual and aural media with the power of narrative storytelling. In this new, updated edition, Emmy Award-winning author Sheila Curran Bernard offers: New strategies for analyzing documentary work New conversations with filmmakers including Stanley Nelson (The Black Panthers), Kazuhiro Soda (Mental), Orlando von Einsiedel (Virunga), and Cara Mertes (JustFilms) Discussions previously held with Susan Kim (Imaginary Witness), Deborah Scranton (The War Tapes), Alex Gibney (Taxi to the Dark Side), and James Marsh (Man on Wire).

Digital Apollo

Encompassing nearly 2,000 years of heists and tunnel jobs, break-ins and escapes, A Burglar's Guide to the City offers an unexpected blueprint to the criminal possibilities in the world all around us. You'll never see the city the same way again. At the core of A Burglar's Guide to the City is an unexpected and thrilling insight: how any building transforms when seen through the eyes of someone hoping to break into it. Studying architecture the way a burglar would, Geoff Manaugh takes readers through walls, down elevator shafts, into panic rooms, up to the buried vaults of banks, and out across the rooftops of an unsuspecting city. With the help of FBI Special Agents, reformed bank robbers, private security consultants, the L.A.P.D. Air Support Division, and architects past and present, the book dissects the built environment from both sides of the law. Whether picking padlocks or climbing the walls of high-rise apartments, finding gaps in a museum's surveillance routine or discussing home invasions in ancient Rome, A Burglar's Guide to the City has the tools, the tales, and the x-ray vision you need to see architecture as nothing more than an obstacle that can be outwitted and undercut. Full of real-life heists-both spectacular and absurd-A Burglar's Guide to the City ensures readers will never enter a bank again without imagining how to loot the vault or walk down the street without planning the perfect getaway.

Why was the French Communist Party hostile to the student rebellion in May-June 1968, when one might have expected a revolutionary party to support a revolutionary movement? In an outstanding Yale undergraduate essay, Richard Johnson shows that the events of May-June 1968 are proof of the ultimately unbridgeable gap between contemporary communism and revolutionary thought and action.
