This book is intended for anyone responsible for setting up and administering ZFS file systems. Topics are described for both SPARC and x86 based systems, where appropriate.

The Patron Saint of Butterflies

In 1982, the Dow hovered below 1000. Then, the market rose and rapidly gained speed until it peaked above 11,000. Noted journalist and financial reporter Maggie Mahar has written the first book on the remarkable bull market that began in 1982 and ended just in the early 2000s. For almost two decades, a colorful cast of characters such as Abby Joseph Cohen, Mary Meeker, Henry Blodget, and Alan Greenspan came to dominate the market news. This inside look at that 17-year cycle of growth, built upon interviews and unparalleled access to the most important analysts, market observers, and fund managers who eagerly tell the tales of excesses, presents the period with a historical perspective and explains what really happened and why.

Hydrothermal Behavior of Fiber- and Nanomaterial-Reinforced Polymer Composites

England, 1290
Lord Alex Stelton can't resist a challenge, especially one with a prize like this: protect a castle on the Scottish border for a year, and it's his. Desperate for land of his own, he'll do anything to win the estate-even enter a proxy marriage to Lady Lisbeth Reynolds, the rumored witch who lives there. Feared and scorned for her second sight, Lisbeth swore she'd never marry, but she is drawn to the handsome, confident Alex. She sees great love with him but fears what he would think of her gift and her visions of a traitor in their midst. Despite his own vow never to fall in love, Alex can't get the alluring Lisbeth out of his mind and is driven to protect her when attacks begin on the border. But as her visions of danger intensify, Lisbeth knows it is she who must protect him. Realizing they'll secure

their future only by facing the threat together, she must choose between keeping her magic a secret and losing the man she loves. 71,000 words

“Timely and provocatively incorrect.”—Oprah.com (Mysteries Every Thinking Woman Should Read) The two-time Pulitzer Prize and three-time National Book Award-nominated author of *Le Divorce* returns with a mesmerizing novel of double standards and double agents. Now, Diane Johnson brilliantly exposes the manners and morals of the cultural collision between Islam and the West. Lulu Sawyer arrives in Marrakech, Morocco, hoping to rekindle her romance with a worldly Englishman, Ian Drumm. It's the perfect cover for her assignment for the CIA: tracing the flow of money from well-heeled donors to radical Islamic groups. While spending her days poolside among Europeans in villas staffed by maids in abayas, and her nights at lively dinner parties, Lulu observes the fragile and tense coexistence of two cultures. But beneath the surface of this polite expatriate community lies a sinister world laced not only with double standards, but double agents. Johnson weaves a dazzling tale in the great tradition of works about naïve Americans abroad, with a fascinating new assortment of characters as well as witty and timely observations on the political and sexual complexities between Islamic and Western culture.

The Programmer's Guide to SCSI

This textbook guides the reader towards various aspects of growth and international trade in a Diamond-type overlapping generations framework. Using the same model type throughout the book, timely topics such as growth with bubbles, debt reduction in rich countries and policies to mitigate climate change are explored. The first part starts from the “old” growth theory and bridges to the “new” growth theory (including R&D and human capital approaches). The second part presents an intertemporal equilibrium theory of inter and intra-sectoral trade and concludes by analyzing the debt mechanics inducing the huge imbalances

among eurozone countries. The book is primarily addressed to graduate students wishing to proceed to the analytically more demanding journal literature.

AN INSPIRATIONAL AND HEARTRENDING MEMOIR ABOUT BEN BREEDLOVE, WHO SHARED HIS NEAR-DEATHEXPERIENCES AND VISIONS OF HEAVEN IN HIS VIRAL VIDEOS—WRITTEN BY HIS SISTER, ALLY BREEDLOVE. On Christmas Day 2011, Ben Breedlove's soul went to heaven. But it wasn't his first time there. Ben suffered from hypertrophic cardiomyopathy (HCM), a heart condition that posed a constant risk of sudden death. His condition, a thickening of the heart muscle, worsened over time, leaving him weak and fatigued. It also led Ben to some close calls medically, in particular cardiac arrest on four separate occasions, during which he felt the presence of angels and experienced the perfect peace of heaven. Precocious and warm, Ben was close with his family and two siblings, and forged deep relationships with his friends. He loved to wakeboard and wake surf, and he had dreams of visiting foreign countries around the world. He created the YouTube channels TotalRandomness512 and BreedloveTV, and co-created the channel OurAdvice4You, where he posted videos about everything from dating advice for girls to more serious topics like his spirituality and heart condition. Unbeknownst to his parents and family, Ben created a two-part video called "This Is My Story," in which he used flashcards to tell the world about his near-death experiences and his beckoning toward heaven. When he died a short while later, at the tender age of eighteen, his family and the rest of the world stumbled upon these videos. The world responded with overwhelming acceptance of the message Ben shared. Sharing his vision of heaven was Ben's gift to his family, and to the world. And now this is the Breedlove family's gift to us - an in-depth look at the life and near-deaths of Ben, the strength and faith of a family, and ultimately, the hope of heaven. Do you believe in Angels or God? I Do. - Ben Breedlove

Growth and International Trade

How is the American spirit holding up in these difficult times? Peter Funt, syndicated columnist and host of TV's "Candid Camera," looks beyond the headlines to find out. In six-dozen essays, Funt uses a light but penetrating touch to take the nation's temperature. "I've always been fascinated by small slices of life," he writes. "During my time in broadcast and print journalism, as well as in entertainment television, I've looked for the smaller items that, when taken together, create a bigger picture of who we are and where we're headed." Funt's columns appear regularly in The Wall Street Journal and The New York Times, and many of his op-eds formed the basis for these essays. Funt's canvas is very much like the real world we deal with every day. Sure, Americans are concerned about taxes, education and crime. But we also care about mobile apps that talk back to us, Paul McCartney's hairdo, and raccoons that destroy our lawns. "On 'Candid Camera,' Funt explains, "we celebrated the American spirit, and in the last five years of traveling, interviewing and researching, I'm happy to report that the spirit remains strong. That said, my opinion pieces often focus on the negative. That's inherent in news and commentary; we don't dismiss all the good, but we search out those things that need to be fixed." In "Cautiously Optimistic," Peter Funt finds the good, the bad and the occasionally hilarious. These essays are designed to make you think, but also to smile.
