Naval Safety Supervisor - Navedtra

14167f

Per references (a) through (g), this T&R Manual establishes training standards, regulations and practices regarding the training of Marines and sailors whose primary mission is logistics.

Catalog of Publications

Army Terminal Operations

Conventional Ammunition Management

This book describes the overall system safety engineering process used to design, develop, test and operate systems that are safe. This is a Design for Safety (DFS) concept and methodology.

The Complete Military Working Dog Manual

The Joint Meteorological and Oceanographic (METOC) Handbook (JMH) serves as a primary reference for the new Joint METOC Officer Course (JMOC). The intention of the JMH is to provide the Joint METOC Officer (JMO), associated METOC staff, and Service and functional component METOC personnel, an easy-to-use reference manual to assist in the planning and execution of METOC support for joint operations. Some information previously included is better found through on-line sources which are more easily

updated, and a web-based resources listing is included as an appendix. The JMH describes existing Joint METOC structure, how METOC personnel and organizations are integrated into the combatant command and JTF structures, and what METOC resources are available. Separate chapters cover METOC capabilities and support to operational forces within Service organizational structures. It is important to understand the joint operational planning process and how the METOC officer fits into that process. The duties and responsibilities of the Senior METOC Officer (SMO) and JMO and their interaction during a joint operation are important concepts. The coordination between the JMO and his Service and functional component METOC units is vital to the success of joint METOC operations. The concept of one theater, one forecast, highlighted in Joint Publication 3-59, is the cornerstone of METOC support to a joint operation. Joint METOC personnel should understand the capabilities of Service level METOC equipment and tactical and fixed communication systems for interoperability. The sources of METOC data and available products and services from various METOC production sites and theater level operational commands are useful for any military operation.

U.S. Military Working Dog Training Handbook

This training circular contains basic and advanced training and techniques for static line parachuting. It is designed to standardize procedures for initial

qualification and training of personnel in their duties and responsibilities in airborne operations. The jumpmaster, assistant jumpmaster, safeties, DACO, DZSTL, and DZSO occupy key positions in airborne operations. This manual contains the initial training and qualifications of the personnel designated to occupy these critical positions. This training circular (TC) provides all Department of Defense (DOD) Airborne personnel with techniques and training guidelines to maintain an Airborne force. It also updates FM 3.21.220, dated 23 September 2003. This publication supersedes FM 3-21.220/MCWP 3-15.7/AFMAN11-420/NAVSEA, SS400-AF-MMO-010, 23 Sept 2003. This book applies to the U.S. Army, the U.S. Army National Guard (ARNG), the U.S. Army Reserve (USAR), the United States Marine Corps, the Department of the Navy, and the Department of the Air Force. TC 3-21.220 (FM 3-21.220) MCWP 3-315.7 AFMAN 11-420 NAVSEA SS400-AF-MMO-010

Military Explosives

Over 1,600 total pages 14097 FIRE CONTROLMAN SUPERVISOR Covers Fire Controlman supervisor responsibilities, organization, administration, inspections, and maintenance; supervision and training; combat systems, subsystems, and their maintenance; and weapons exercises. 14098 FIRE CONTROLMAN, VOLUME 01, ADMINISTRATION AND SAFETY Covers general administration, technical administration, electronics safety, and hazardous materials as they pertain to the FC rating. 14099A FIRE CONTROLMAN, VOLUME 02--FIRE CONTROL

SYSTEMS AND RADAR FUNDAMENTALS Covers basic radar systems, fire control systems, and radar safety as they relate to the Fire Controlman rating. 14100 FIRE CONTROLMAN, VOLUME 03--DIGITAL DATA SYSTEMS Covers computer and peripheral fundamentals and operations, configurations and hardware, operator controls and controlling units, components and circuits, central processing units and buses, memories, input/output and interfacing, instructions and man/machine interfaces, magnetic tape storage, magnetic disk storage, CD-ROM storage, printers, data conversion devices, and switchboards. 14101 FIRE CONTROLMAN, VOLUME 04--FIRE CONTROL MAINTENANCE CONCEPTS Introduces the Planned Maintenance System and discusses methods for identifying and isolating system faults, liquid cooling systems used by Fire Controlmen, battery alignment (purpose, equipment, and alignment considerations), and radar collimation. 14102 FIRE CONTROLMAN, VOLUME 05--DISPLAY SYSTEMS AND DEVICES Covers basic display devices and input devices associated with Navy tactical data systems as used by the FC rating. 14103 FIRE CONTROLMAN, VOLUME 06--DIGITAL COMMUNICATIONS Covers the fundamentals of data communications, the Link-11 and Link-4A systems, and local area networks. 14104A FIREMAN Provides information on the following subject areas: engineering administration; engineering fundamentals; the basic steam cycle; gas turbines; internal combustion engines; ship propulsion; pumps, valves, and piping; auxiliary machinery and equipment; instruments; shipboard electrical equipment; and environmental controls.

Manuals Combined: U.S. Navy FIRE CONTROLMAN Volumes 01 - 06 & FIREMAN

Thoughts on War

Safetyline

The Navy Electricity and Electronics Training Series (NEETS) was developed for use by personnel in many electrical and electronic-related Navy ratings. Written by, and with the advice of, senior technicians in these ratings, this series provides beginners with fundamental electrical and electronic concepts through self-study. The presentation of this series is not oriented to any specific rating structure, but is divided into modules containing related information organized into traditional paths of instruction. The series is designed to give small amounts of information that can be easily digested before advancing further into the more complex material. For a student just becoming acquainted with electricity or electronics, it is highly recommended that the modules be studied in their suggested sequence.

Petroleum and Water Logistics Operations

We designed this training manual to help acquaint you with the Navy's safety and occupational health

programs, their setup, management, and supervision. In addition to the Safety and Occupational Health (SOH) Program, we will discuss the Shore Safety Program, the Afloat Safety Program, the Aviation Safety Program, and your duties as a naval safety supervisor. We have provided the appropriate references for specific safety standards throughout this manual and various safety terms and acronyms. You will also find information on the following program elements: - Safety program promotion and attitudes - Mishap causes and prevention - Mishap investigation and reporting - Safety program evaluation - SOH Program elements - Traffic safety - Explosives safety - Athletic, recreation, & home safety programs

Fire Controlman, Volume 1-Administration and Safety

Learn how to train your dog exactly as the U.S. military trains its canine soldiers. This manual is the Department of Defense's principle source of information on care, conditioning, and training of our nation's Military Working Dogs - such as "Cairo," the canine who served in the raid that killed Bin Laden. From basics, such as "HEEL" and "STAY" to negotiating obstacle courses, to tracking, searching, and even attacking . . . this manual shows readers how our military trains their dogs to be the best trained canines in the world. Contents include: * Veterinary Training Priorities * Principles of Conditioning and Behavior Modification * Patrol Dog Training * Clear Signals Training Method * Deferred

Final Response * Detector Dog Training Validation *
The Military Working Dog (WMD Program) * Facilities
and Equipment * And more...

System Safety Engineering

Leadership is so much a part of the conduct of training that at times it is difficult to tell where one stops and the other starts. . . . “The best book on military training from platoon to division level that has been published in any army.”—Army magazine “His message is that whatever works and gets results by the most direct and efficient means is good. All else should be eliminated.”—Air University Review “A utilitarian book that talks intelligently of leadership, management and common sense.”—ARMOR magazine “A hardhitting and unvarnished . . . authoritative work that should be read and reread by everyone who aspires to be a truly professional soldier.”—General Bruce Palmer, U.S. Army (Ret.) “A gem, with few peers, invaluable . . . [Arthur Collins'] advice is always performance oriented. Don't talk so much about it, he says, Don't make so many fancy charts about training. Instead, do it. Teach it. Perform it.”—Parameters

Logistics (Log) Training and Readiness (T&r) Manual

Marine Corps Warfighting Publication (MCWP) 4-11.6, Petroleum and Water Logistics Operations, provides doctrinal guidance for bulk petroleum and water support of the Marine air-ground task force (MAGTF).

This publication is aligned doctrinally with Marine Corps Doctrinal Publication 4, Logistics, and tactically with MCWP 4-1, Logistics Operations. It specifically addresses the techniques and procedures of bulk fuel and water support of the MAGTF in a joint/multinational environment. MCWP 4-11.6 is a follow-on publication of MCWP 3-17, Engineer Operations.

Explosive Ordnance Disposal Technician/Officer Training and Readiness Manual

Purpose of Equipment: The CCMCK Weapon Conversion System allows Force-On-Force close combat training by temporarily converting service weapons (M16A2/M16A3/M16A4 Rifles, M4/M4A1 Carbines, M249 Squad Automatic Weapons (SAW), and M9 and M11 Pistols) to fire low-velocity marking ammunition. CCMCK ammunition includes 5.56mm Bulk marking ammunition for the M16A2/M16A3/M16A4 Rifle and M4/M4A1 Carbine, 5.56mm Linked marking ammunition for the M249 SAW, and 9mm marking ammunition for the M9 and M11 Pistols. Marking ammunition, manufactured in red, blue, and yellow, is loaded into the magazine of the converted weapon in the same manner as service ammunition. Once loaded, the weapon cycles and functions the same as service ammunition and marks the target with minimal hazard to personnel wearing appropriate safety equipment. The system allows normal weapon employment cues such as aiming, firing, Force-On-Force training, and interactive live-fire

scenario task and mission execution.

Marine Corps Physical Security Program Manual

Two books in one! The Complete Military Working Dog Manual combines the U.S. Military's Dog Training Handbook and U.S. Army's Guide to Veterinary Care of Military Working Dogs into one book. In the U.S. Military's Dog Training Handbook, you will learn how to train your dog like the U.S. military. This is the official military manual used for training military working dogs (MWD). From teaching basic commands to navigating obstacle courses, tracking, searching, and attacking, this guide will show you how to turn your dog into a canine soldier. You will learn: Veterinary Care Principles of Conditioning and Behavior Modification Patrol Dog Training Clear Signals Training Method Deferred Final Response Detector Dog Training Validation and Legal Considerations The Military Working Dog (MWD) Program Facilities and Equipment Safety and Transportation Operational Employment Contingency Operations And more! In Veterinary Care and Management of the Military Working Dog you will learn how to care for your dog like the U.S. military. This is the official military manual used for training dog handlers on veterinary care of MWDs. From equipment and facilities to dentistry, this guide will educate on K9 well-being and veterinary care. You will learn: Equipment and Facilities Preventive Medicine, Deployment Issues, and Standard Procedures Emergency Medicine Common Medical Problems

Diagnostic Imaging Surgery Dentistry Physical Conditioning Behavioral Medicine Disposition Necropsy and Pathology Support And more! This manual consolidates medical information, policies, procedures and regulatory directives specific to the medical management of MWDs into one document. Army Veterinary Corps Officers have researched, extracted, and compiled the material from a variety of references from all services and standards of veterinary practice within the United States. This book will not teach you how to be a veterinarian, but it will help you be a better dog owner.

Fire Controlman, Volume 1-Administration and Safety

Ex-Letters

Joint shipboard helicopter operations (JSHO) rank among the most challenging types of joint operations. JSHO require US Army, US Air Force, and special

operations personnel operate alongside US Navy (USN), US Marine Corps (USMC), and US Coast Guard (USCG) personnel in unfamiliar work and living spaces, with equipment not specifically designed for shipboard capability, and in an operating environment which is characterized by tightly constrained space and an unforgiving nature. It is incumbent every soldier or airman embarked understand their responsibilities during the many evolutions that transpire during each ship's daily routine and the challenges those evolutions present to their unit's daily operations. Unlike some joint operations where the Services are assigned operational areas and interact with each other on the margins (via communications channels, across boundary lines, etc.), JSHO require continuous interaction, coordination, and teamwork to accomplish the simplest of tasks. When planning JSHO, joint force commanders (JFCs) must consider a number of factors, the foremost of which are the impact such operations may have on the overall joint operation. Among these considerations are the mission tradeoffs associated with the displacement of naval aircraft; the removal of the ship from its place in the expeditionary ship and/or embarked unit mission capabilities resulting from emission control or hazards of electromagnetic radiation to ordnance requirements, wind limitations, and/or location requirements. While the mission tradeoff impact of embarking other Service helicopters on small air-capable ships is rather straightforward, JSHO aboard an aircraft carrier or amphibious aviation assault ship is more difficult to assess because these ships are complex, multi-mission platforms. Further, the choreography required

for high deck density operations necessitates meticulous planning. This publication provides doctrine for planning, coordinating, and conducting joint shipboard helicopter operations from US ships with flight decks.

NATL INDUSTRIAL SECURITY PROGR

The Explosive Ordnance Disposal Technician/Officer Training and Readiness Manual establishes Core Capability Mission Essential Tasks (MET) for readiness reporting and required events for standardization training of Marines and Navy personnel assigned to Marine Corps. It also provides tasking for formal schools preparing personnel for service in the Marine Corps commands. This NAVMC manual supersedes NAVMC 3500.66.

Army Motor Transport Units and Operations

The purpose of this order is to establish the Marine Corps Physical Security Program and provide policy to support commander's efforts to maintain a robust physical security program .

Static Line Parachuting Techniques and Training April 2014

1-100. Purpose. This Manual: a. Is issued in accordance with the National Industrial Security Program (NISP). It prescribes the requirements, restrictions, and other safeguards to prevent

unauthorized disclosure of classified information. The Manual controls the authorized disclosure of classified information released by U.S. Government Executive Branch Departments and Agencies to their contractors. It also prescribes the procedures, requirements, restrictions, and other safeguards to protect special classes of classified information, including Restricted Data (RD), Formerly Restricted Data (FRD), intelligence sources and methods information, Sensitive Compartmented Information (SCI), and Special Access Program (SAP) information. These procedures are applicable to licensees, grantees, and certificate holders to the extent legally and practically possible within the constraints of applicable law and the Code of Federal Regulations (CFR). b. Incorporates and cancels DoD 5220.22-M, Supplement 1 (reference (ab)).

Navy Electricity and Electronics Training Series

Conventional Ammunition Management

A Key Containing the Answers to the Examples in the Introduction to Algebra Upon the Inductive Method of Instruction

This FM deals with Army terminal operations in a TO. It contains procedures and techniques to plan, use, and control Army water, motor, rail, and air terminal

operations. It explains the transportation doctrine and organizational structures needed to deploy Army terminal operations in a TO. It covers roles, missions, and concepts of employment for terminal operation units. This manual is mainly for unit commanders, key personnel, higher HQ staffs, theater planners, and commanders of operational allied units. Terminals are key nodes in the total distribution system that support the commander's concept of operation at all levels of war and through the range of military operations. They provide loading, unloading, and handling of cargo and personnel between various transportation modes. When linked by modes of transport, they define the transportation structure for the operation. Force projection missions require early identification and establishment of terminals. A well-conceived plan assures that terminals can support the deployment, reception, and onward movement of the force and its sustainment. Crucial to the execution of the operation is the assignment of the right personnel, cargo, and material handling equipment at each terminal. ITV of material moving through the transportation system also provides the CINC with information pertaining to location and final destination of all cargo. The Army is required to function across a range of operation from peacetime through conflict to war (see FM 100-5). Terminal operators must be able to operate in every TO. Terminals will be vulnerable to air and missile attacks, especially if US and allied forces have not established air superiority and sea control. They may also be subject to attacks by unconventional forces and to sabotage, terrorism, mining, espionage, and chemical or biological attacks. Whatever the level of the Army operation, terminals will remain a critical

piece to ensure continuous movement of personnel and cargo.

Garrison Mobile Equipment

The purpose of this publication is to provide policy guidance concerning intermediate-level supply management.

Joint Meteorological & Oceanographic (Metoc) Handbook

Catalog of Publications

This text is a treatise on the nature, conduct and operations of war; from minor tactics to grand strategy, from one of the foremost military thinkers of the twentieth century, Liddell Hart.

Common Sense Training

The purpose of this volume is to publish policy and procedures for garrison mobile equipment (GME) issued by the Commandant of the Marine Corps (CMC). This Manual provides administrative and technical instructions, policies, and procedures for all personnel involved in the management of procurement, operation, and maintenance of GME.
