Are you hunting for a fifth grade curriculum with content for a full school year? Alpha Omega Publications has just what you need! The LIFEPAK 5th Grade 5-Subject Set contains curriculum for five core subjects: Bible, History & Geography, Science, Language Arts, and Math. This Bible-centered curriculum is based on the concept of mastery learning and offers flexible, step-by-step lessons that provide an opportunity for personalized instruction. Each colorful, consumable lesson and supplemental hands-on activity makes this easy-to-use curriculum set a favorite of homeschooling families. And best of all, this 5-subject set costs less than ordering each subject individually! But let's take a closer look at this best-selling Alpha Omega curriculum. Each LIFEPAK subject in this 5-subject set contains ten, self-paced worktexts that encourage student-directed learning. Plus, an easy-to-follow, in-depth teacher's guide for each subject is sure to make your homeschooling day fun and easy. What's more, with motivating lessons, review questions, and tests, you can rest assured that your child is receiving a solid, well-rounded education. What could be better? Save yourself time, energy, and money. Try the popular LIFEPAK 5th Grade 5-Subject Set for yourself today! The 5th Grade Science Experiments DVD is a recommended resource not included in this set.

### Horizons Math

### The Chautauquan

Written by a parent and school board member, who first embraced many of the ideas of the modern school reform movement, Schoolhouse Shams lays bare much of the mythology and misinformation that underpin many of the failed school reform policies of the last decade. Many of the top strategies of the highly publicized school reform movement already have been tried out in St. Louis with disastrous results. Along with demonstrating the failure of school reform

prescriptions to improve education, the experience of St. Louis demonstrates that the ideological premise of the reform movement, that a focus on providing opportunities for private profit-taking will necessarily improve schools, is both wrong and conflicts with the ideals of democracy, accountability, and justice.

### **Lifepac Complete Set Grade 5**

For grades 7-12. Provides students with in-depth knowledge of individual states through an interactive survey of state government, history, economics, business and industry, natural resources, population, cultures, and religious history.

### **Adventures in Creation, Level 1**

This book was created to help teachers as they instruct students through the Master's Class Chemistry course by Master Books. The teacher is one who guides students through the subject matter, helps each student stay on schedule and be organized, and is their source of accountability along the way. With that in mind, this guide provides additional help through the laboratory exercises, as well as lessons, quizzes, and examinations that are provided along with the answers. The lessons in this study emphasize working through procedures and problem solving by learning patterns. The vocabulary is kept at the essential level. Practice exercises are given with their answers so that the patterns can be used in problem solving. These lessons and laboratory exercises are the result of over 30 years of teaching home school high school students and then working with them as they proceed through college. Guided labs are provided to enhance instruction of weekly lessons. There are many principles and truths given to us in Scripture by the God that created the universe and all of the laws by which it functions. It is important to see the hand of God and His principles and wisdom as it plays out in chemistry. This course integrates what God has told us in the context of this study. Features: Each suggested weekly schedule has five easy-to-manage lessons that combine reading and worksheets. Worksheets, quizzes, and tests are perforated and three-hole punched — materials are easy to tear out, hand out, grade, and store. Adjust the schedule and materials needed to best work within your educational program. Space is given for assignments dates. There is flexibility in scheduling. Adapt the days to your school schedule. Workflow: Students will read the pages in their book and then complete each section of the teacher guide. They should be encouraged to complete as many of the activities and projects as possible as well. Tests are given at regular intervals with space to record each grade. About the Author: DR. DENNIS ENGLIN earned his bachelor's from Westmont College, his master of science from California State University, and his EdD from the University of Southern California. He enjoys teaching animal biology, vertebrate biology, wildlife biology, organismic biology, and astronomy at The Master's University. His professional memberships include the Creation Research Society, the American Fisheries Association, Southern California Academy of Sciences, Yellowstone Association, and Au Sable Institute of Environmental Studies.

### **Children's Books in Print, 2007**

Winner of the Newbery Medal and the National Book Award! This #1 New York Times bestselling, modern classic in which boys are forced to dig holes day in and day out is now available with a splashy new look. Stanley Yelnats is under a curse. A curse that began with his no-good-dirty-rotten-pig-stealing-great-great-grandfather and has since followed generations of Yelnatses. Now Stanley has been unjustly sent to a boys' detention center, Camp Green Lake, where the boys build character by spending all day, every day digging holes exactly five feet wide and five feet deep. There is no lake at Camp Green Lake. But there are an awful lot of holes. It doesn't take long for Stanley to realize there's more than character improvement going on at Camp Green Lake. The boys are digging holes because the warden is looking for something. But what could be buried under a dried-up lake? Stanley tries to dig up the truth in this inventive and darkly humorous tale of crime and punishment—and redemption. Includes a double bonus: an excerpt from *Small Steps*, the follow-up to *Holes*, as well as an excerpt from Louis Sachar's new middle-grade novel, *Fuzzy Mud*. "A smart jigsaw puzzle of a novel." --The New York Times WINNER OF THE BOSTON GLOBE-HORN BOOK AWARD A NEW YORK TIMES BOOK REVIEW NOTABLE CHILDREN'S BOOK SELECTED FOR NUMEROUS BEST BOOK OF THE YEAR AND ALA HONORS

### **Exploring World History**

### **Schoolhouse Shams**

This practical, positive book reveals the many parenting strategies that Jim Bob and Michelle Duggar use as they preside over America's best-known mega-family. Each time a new baby arrives, the press from around the world clamors for interviews and information. Visitors are amazed to find seventeen (baby number eighteen is due January 1, 2009) well-groomed, well-behaved, well-schooled children in a home that focuses on family, financial responsibility, fun—and most importantly, faith. Readers will learn about the Duggars' marriage—how they communicate effectively, make family decisions, and find quality time alone. They'll discover how the Duggars manage to educate all their children at home, while providing experiences that go beyond the family walls, through vacations and educational trips. And they'll see how the Duggar family manages their finances and lives debt-free—even when they built their own 7,000-square-foot house. Answering the oft asked question—How can I do with one or two children what you do with seventeen (soon to be eighteen)?—Jim Bob and Michelle reveal how they create a warm and welcoming home filled with what Michelle calls “serene chaos.” They show how other parents can succeed whether they're rearing a single child or several. With spiritual insights, experience-based wisdom, practical tips, and plenty of humorous and tender anecdotes, the Duggars answer the questions that pour into the family's Web site on a daily basis—especially after every national media interview and TV appearance—including their segments on the Discovery Health Channel's “Meet the Duggars” series.

## **Writing a State Report**

This science series brings the Bible to life and will instill a love for science through exploration, investigations, and imaginative Bible-inspired stories. Students will discover that science is a wonderful tool God has given us to study His creation. They will also learn more about His character as they ask questions and experience God's world through science. This course includes: Memory verses with hand motions to help students memorize Bible passages Discussion Starters that encourage students to dive deeper into the topics they're learning Activity pages for students to create their own Science Notebook to share OVERVIEW: This course is designed to be interactive with students, as they are given the opportunity to stop and discuss answers to questions in the text. The course explores questions such as: What is light made of? How do clouds form? What is photosynthesis? Why does the moon have phases? What are the layers of the ocean like? How does the heart pump blood? Students will be able to answer these questions and many more as they investigate their way through God's creation. Let's Talk Science: Adventures in Creation is hands-on fun, easy to prepare for, and it will encourage your student's curiosity!
