To learn to read a text for the portals of silence that are implicit in it is to gain a powerful tool for supporting and expanding one's silence, and to open the reader to the insight that ensues. The sort of reading proposed in this volume is both costly and rewarding. These pages invite readers once again to look at their own minds, to reflect on what is happening there, and to understand the essential role of silence for being human, and for living our own truth with one another.
