This is a story of friendship, love and how one very sarcastic woman can find the strength to pick up the pieces after having her heart broken. Hook and Ladder 69

prevent other women from being similarly played and dismayed. The job: act as bait for a cheating husband. The target: Matt Russo. The case should be as easy as getting a man's attention--and Paige has never had trouble with that. The problem is Matt--in all his nerdy-hot glory--turns out to be not such a scumbag after all. And when the case hits closer to home than Paige could ever have imagined--landing her in a face-off with the mob--she wonders if taking the job just to prove that she has a brain maybe wasn't her best idea. This second outing for the Fool Me Once team follows in the same fun, feisty footsteps as bestselling author Tara Sivec's Shame on You.

This book explores the practicality of using the existing subsurface geology on the Moon and Mars for protection against radiation, thermal extremes, micrometeorites and dust storms rather than building surface habitats at great expense at least for those first few missions. It encourages NASA to plan a precursor mission using this concept and employ a "Short Stay" Opposition Class mission to Mars as the first mission rather than the "Long Stay" concept requiring

a mission that is too long, too dangerous and too costly for man's first missions to Mars. Included in these pages is a short history on the uses of caves by early humans over great periods of time. It then describes the ongoing efforts to research caves, pits, tunnels, lava tubes, skylights and the associated technologies that pertain to potential lunar and Mars exploration and habitation. It describes evidence for existing caves and lava tubes on both the Moon and Mars. The work of noted scientists, technologists and roboticists are referenced and described. This ongoing work is more extensive than one would think and is directly applicable to longer term habitation and exploration of the Moon and Mars. Emphasis is also given to the operational aspects of working and living in lunar and Martian caves and lava tubes.

The Oxford Handbook of Chinese Linguistics offers a broad and comprehensive coverage of the entire field from a multi-disciplinary perspective. All chapters are

contributed by leading scholars in their respective areas. This Handbook contains eight sections: history, languages and dialects, language contact, morphology, syntax, phonetics and phonology, socio-cultural aspects and neuro-psychological aspects. It provides not only a diachronic view of how languages evolve, but also a synchronic view of how languages in contact enrich each other by borrowing new words, calquing loan translation and even developing new syntactic structures. It also accompanies traditional linguistic studies of grammar and phonology with empirical evidence from psychology and neurocognitive sciences. In addition to research on the Chinese language and its major dialect groups, this handbook covers studies on sign languages and non-Chinese languages, such as the Austronesian languages spoken in Taiwan.

The Home Court Advantage

Winner of the Benjamin L. Hooks National Book Award Winner of the Michael Nelson Prize of the International Association for Media and History In 1964, Nina Simone sat at a piano in New York's Carnegie Hall to play what she called a "show tune." Then she began to sing: "Alabama's got me so upset/Tennessee made me lose my rest/And everybody knows about Mississippi Goddam!" Simone, and her song, became icons of the civil rights movement. But her confrontational style was not the only path taken by black women entertainers. In *How It Feels to Be Free*, Ruth Feldstein examines celebrated black women performers, illuminating the risks they took, their roles at home and abroad, and the ways that they raised the issue of gender amid their demands for black liberation. Feldstein focuses on six women who made names for themselves in the music, film, and television industries: Simone, Lena Horne, Miriam Makeba, Abbey Lincoln, Diahann Carroll, and Cicely Tyson. These women did not simply mirror black activism; their performances helped constitute the era's political history. Makeba connected America's struggle for civil rights to the fight against apartheid in South Africa, while Simone sparked high-profile controversy with her incendiary lyrics. Yet Feldstein finds nuance in

their careers. In 1968, Hollywood cast the outspoken Lincoln as a maid to a white family in *For Love of Ivy*, adding a layer of complication to the film. That same year, Diahann Carroll took on the starring role in the television series *Julia*. Was *Julia* a landmark for casting a black woman or for treating her race as unimportant? The answer is not clear-cut. Yet audiences gave broader meaning to what sometimes seemed to be apolitical performances. *How It Feels to Be Free* demonstrates that entertainment was not always just entertainment and that "We Shall Overcome" was not the only soundtrack to the civil rights movement. By putting black women performances at center stage, Feldstein sheds light on the meanings of black womanhood in a revolutionary time.

The international creation of typefaces after 1950 was decisively influenced by the Swiss type designer Adrian Frutiger. His Univers typeface and the machine-readable font OCR-B, which was adopted as an ISO standard, are milestones, as is his type for the Paris airports, which set new standards for signage types and evolved into the Frutiger typeface. With his corporate types, he helped to define the public profiles of companies such as the Japanese Shiseido line of cosmetics. In all he created some fifty types, including Ondine, Méridien, Avenir, and Vectora. Based on conversations with Frutiger himself and on extensive research in France, England, Germany, and Switzerland, this publication provides a highly detailed and

accurate account of the type designer's artistic development. For the first time, all of his types – from the design phase to the marketing stage – are illustrated and analyzed with reference to the technology and related types. Hitherto unpublished types that were never realized and more than one hundred logos complete the picture.

Grandpa Loves Us

From the great raconteur of the American underworld, and author of *The Gangs of New York*, comes *Sucker's Progress: An Information History of Gambling in America*. From Midwestern Riverboats to East Coast Racetracks, Herbert Asbury explores the legal and illegal history of gambling in pre-WWII America. Describing notorious gambling havens like Chicago and New Orleans, as well as lesser-known outposts in cities like Fort Wayne, Indiana, and Cincinnati, Ohio, Asbury examines the gambling houses, big and small, which peppered the American landscape. Also presented are the lives of some of America's most famous gamblers, including Mike McDonald, John Morrissey, and Richard Canfield, as well as their infamous counterparts like "Canada Bill" and "Charley Black Eyes," men who made their names as grifters and con men. Asbury also explores the games these men played, describing the rules and origins of dozens of dice and card games. From \$1 lottery tickets to thousand dollar pokes antes, America's love of gambling thrives today, but it was during Asbury's era that gambling was established as an American passion. "Asbury embarked on what seems in retrospect an extraordinary mission: to document the entire underworld of America, from New Orleans to San Francisco. His studies of gambling, of the racial politics of the New Orleans French Quarter, and of the history of Chicago crime remain monuments to an ambition that was then confined to the fringes of pop history. *Sucker's Progress*, his history of gambling and swindling in America, is dense with facts about a subject one would have thought persisted only as rumour and tall tale."—A.
