In a distant and second-hand set of dimensions, in an astral plane that was never meant to fly . . . Imagine a flat world sitting on the backs of four elephants who hurtle through space balanced on a giant turtle. The Discworld is a place (and a time) strikingly parallel to our own—but also very different. But also very similar. To commemorate the twenty-fifth anniversary of the birth of the Discworld, the first two volumes of the remarkable Terry Pratchett's equally remarkable—and phenomenally successful—series were made available together, right here, in graphic novel form. These beautifully illustrated renditions of The Colour of

They said it couldn't be done. Well, it has been done, proving them wrong once again. After years of research, cunningly contrived in as many minutes, the Discworld has its map. It takes full account of the historic and much documented expeditions of the Discworld's fêted (or at least fated) explorers: General Sir Roderick Purdeigh, Lars Larsnephew, Llamedos Jones, Lady Alice Venturi, Ponce da Quirm and, of course, Venter Borass. Now travellers on this circular world can see it all: from Klatch to the Ramtops, from

Cori Celesti to the Circle Sea, from Genua to Bhangbhangduc. The great cities of Hunghung, Pseudopolis, Al Khali and, of course, Ankh-Morpork are placed with loving care upon this world which is carried through space by Great A'Tuin.

Discworld and Philosophy

When Charles Darwin writes the wrong book and reverses the progress of science, Unseen University's wizards must once again save Roundworld (Earth, that is) from an apocalyptic end. Ever since a wizardly experiment inadvertently brought about the creation of Roundworld, the wizard scholars of Unseen University have done their best to put things on the right course. In Darwin's Watch they may face their greatest challenge yet: A man called Darwin has written a bestselling book called The Theology of the Species, and his theory of scientific design has been witlessly embraced by Victorian society. As a result, scientific progress has slowed to a crawl, and the wizards must find a way to change history back to the way it should have been. DARWIN'S WATCH EXPLORES THE REVERBERATIONS of major scientific advances on our planet and our culture, the dangers of obscurantism, and the theory of evolution as you have never seen it before. This brilliant addition to Pratchett's beloved Discworld series illustrates with great wit and wisdom how the laws of our universe truly are stranger than fiction.

The Colour of Magic

A fascinating guide to the international bestselling Discworld series and the award-winning *The Wee Free Men*—soon to be a major motion picture. Before J. K. Rowling became the best-selling author in Britain, Terry Pratchett wore that hat. With over 45 million books sold, Pratchett is an international phenomenon. His brainchild is the Discworld series—novels he began as parodies of other works like *Macbeth*, *Faust*, and *The Arabian Nights*. *The Wee Free Men*, one of Pratchett's most popular novels, will be made into a movie by Spider-Man director Sam Raimi. It's the story of 9-year-old wannabe witch Tiffany Aching, who unites with the Nac Mac Feegle (6-inch-tall blue men who like to fight and love to drink) to free her brother from an evil fairy queen. A fun, interactive guide that will explore the land of Discworld, *Secrets of The Wee Free Men* and Discworld is filled with sidebars, mythology trivia, and includes a bio of the fascinating author Terry Pratchett, and an in-depth analysis of his work. This unofficial guide is a great resource for readers of *The Wee Free Men* and the other books of the Discworld series.

Not only an artistic and breathtaking view of Lancre but also an interesting and informative guide to one of the Discworld's more, er, picturesque kingdoms. Granny Weatherwax, Nanny Ogg and Magrat Garlick live there. Lancre could hardly be somewhere ordinary, could it? Magic glues the Discworld together and a lot of it ends up in Lancre, principal Kingdom of the Ramtop Mountains. Between Uberwald and Whale Bay, the Octarine Grass Country and the Windersins Ocean lies the most exciting and dangerous terrain in all Discworld. The Ramtops supply Discworld with most of its witches and wizards. The leaves on the trees move even when there is no breeze. Rocks go for a stroll in the evening. Even the land, at times, seems alive. The mapp may be only two-dimensional, but watch it very carefully and you might just see it jostle about a bit.

In Discworld, unlike our own frustrating Roundworld, everything makes sense. The world is held up by elephants standing on the back of a swimming turtle who knows where he's going, the sun goes round the world every day, so it doesn't have to be very hot, and things always happen because someone intends them to happen. Millions of fans are addicted to Pratchett's Discworld, and the interest has only intensified since Pratchett's recent death and the release of his final Discworld novel, *The Shepherd's Crown*, in September 2015. The philosophical riches of Discworld are inexhaustible, yet the brave explorers of Discworld and Philosophy cover a lot of ground. From discussion of Moist von Lipwig's con artistry showing the essential con of the financial system, to the examination of everyone's favorite Discworld character, the murderous luggage, to the lawless Mac Nac Feegles and what they tell us about civil government, to the character Death as he appears in several Discworld novels, *Discworld and Philosophy* gives us an in-depth treatment of Pratchett's magical universe. Other chapters look at the power of Discworld's witches, the moral viewpoint of the golems, how William de Worde's newspaper illuminates the issue of censorship, how fate and luck interact to shape our lives, and why the more simple and straightforward Discworld characters are so much better at seeing the truth than those with enormous intellects but little common sense.
