### **The Last Man on the Moon**

The basis of the 2014 award-winning feature-length documentary! A revealing and dramatic look at the inside of the American Space Program from one of its pioneers. Eugene Cernan was a unique American who came of age as an astronaut during the most exciting and dangerous decade of spaceflight. His career spanned the entire Gemini and Apollo programs, from being the first person to spacewalk all the way around our world to the moment when he left man's last footprint on the Moon as commander of Apollo 17. Between those two historic events lay more adventures than an ordinary person could imagine as Cernan repeatedly put his life, his family and everything he held dear on the altar of an obsessive desire. Written with New York Times bestselling author Don Davis, *The Last Man on the Moon* is the astronaut story never before told - about the fear, love and sacrifice demanded of the few men who dared to reach beyond the heavens for the biggest prize of all - the Moon.

In the Retro Hugo Award-nominated novel that inspired the Syfy miniseries, alien invaders bring peace to Earth—at a grave price: “A first-rate tour de force” (The New York Times). In the near future, enormous silver spaceships appear without warning over mankind’s largest cities. They belong to the Overlords, an alien race far superior to humanity in technological development. Their purpose is to dominate Earth. Their demands, however, are surprisingly benevolent: end war, poverty, and cruelty. Their presence, rather than signaling the end of humanity, ushers in a golden age . . . or so it seems. Without conflict, human culture and progress stagnate. As the years pass, it becomes clear that the Overlords have a hidden agenda for the evolution of the human race that may not be as benevolent as it seems. “Frighteningly logical, believable, and grimly prophetic . . . Clarke is a master.” —Los Angeles Times

advances in medical science to the backward peoples of the New World capital. Here begins the cyclical tale of man battling the unknown, of science confronting the eternally indifferent forces of nature. Morales takes us on a trip through ancient and future civilizations, through exotic but all-too-familiar cultures, to a final confrontation with our own ethics and world views. In later chapters, the colonial physician finds his successors as they once again engage in life or death struggles, attempting to balance their own hopes, desires and loves with the good society and the state. Book II of the novel takes place in modern-day southern California, and Book III in a futuristic technocratic confederation known as Lamex. In the tradition of Latin American born novelist, Alejandro Morales is one of the finest representatives of magic realism in the English language. In *The Rag Doll Plague*, Morales creates a many layered fictional world, taking us on an entertaining and thought-provoking safari thorough lands, times, peoples and ideas never before encountered or presented in this manner. But ultimately, this valuable trip leads to a reacquaintance with our own society and its moral vision.

In this fascinating book, New Yorker business columnist James Surowiecki explores a deceptively simple idea: Large groups of people are smarter than an elite few, no matter how brilliant—better at solving problems, fostering innovation, coming to wise decisions, even predicting the future. With boundless erudition and in delightfully clear prose, Surowiecki ranges across fields as diverse as popular culture, psychology, ant biology, behavioral economics, artificial intelligence, military history, and politics to show how this simple idea offers important lessons for how we live our lives, select our leaders, run our companies, and think about our world.

The strange thing about THE END was that nobody expected it. The pessimists had been wrong. No atomic war. No nuclear destruction. No fallout. No radioactivity. Disarmament had brought universal peace and sanity. Co-existence had become a reality - not an idealist's dream. Then disaster struck. The desperate weather forecasts were the beginning. The ice was The End. Seas became frozen wastes. Rivers turned to glaciers overnight. The whole planet was in the grip of a cold so intense that millions perished in a few hours, millions more died within the week. Only the bravest and the hardiest survived. Rugged men and courageous women, with the spirits of the earliest pioneers, urging them on to do the impossible. Was the big freeze just a cosmic accident - with man on the unlucky end? Had one of the big powers tried to master weather control, secretly, despite the disarmament talks and failed disastrously. Perhaps it was the prelude to alien invasion?

absurd cartoon gift book offering a wry commentary on modern relationships. In this outrageously funny and oddly wise guide to relationships, forty-five-year-old bachelor Will Forte shares his bulletproof advice for attracting-and retaining-a romantic partner of the fairer sex. Told in the form of 101 hand-drawn rules of thumb, the book takes on all the questions men are dying to know the answers to but are too afraid to ask: What activities are acceptable and not acceptable to do with a romantic interest's father? What animals, if any, should never be incorporated into foreplay? Should I claim to have collaborated with a famous poet? Combining wisdom, both practical and not, with idiosyncratic drawings so simple that even a romantically frustrated man-child could understand them, *101 Things to Definitely Not Do If You Want to Get a Chick* gracefully answers these questions and ninety-eight others.

"A fascinating tale...Readers who are into high-altitude adventure stories won't be disappointed."  
—Associated Press  
In 1939 the Savage Mountain claimed its first victim. Born into vast wealth yet uneasy with a life of leisure, Dudley Wolfe, of Boston and Rockport, Maine, set out to become the first man to climb K2, the world's second-highest mountain and, in the opinion of mountaineers, an even more formidable challenge than Mt. Everest. Although close to middle age and inexperienced at high altitude, Wolfe, with the team leader, made it higher than any other members of the expedition, but he couldn't get back down. Suffering from altitude sickness and severe dehydration, he was abandoned at nearly 25,000 feet; it would be another sixty-three years before the author discovered his remains.
