other people, and everywhere present. Why then, do we fall prey to unwanted conditions - illness, financial lack, relationship difficulties, loneliness and problems of every kind? Written as a manual for the practical applications of the principles set forth in The Science of Mind, this book takes the original philosophy of "change your thinking, change your life," and explains a clear and definite scientific method of prayer that can help you overcome life's obstacles.

Change Your Thinking, Change Your Life

Engage your mind to transform your life The Science of The Mind: The Original 1926 Edition & Other Essential Works is a collection of the most thought-provoking and impactful work of Ernest Holmes. Born in 1887, Holmes was the founder of Religious Science, a key part of the New Thought movement. He founded what would later come to be called the Centers for Spiritual Living which now exist across the nation and throughout the world. The Science of Mind faithfully reproduces the original text of Holmes's books, preserving their original character and integrity. Included within this edition are three classic works: The Science of Mind, The Creative Mind, and The Creative Mind and Success. The Science of The Mind is part of The Library of Spiritual Wisdom, a beautifully designed series of curated classics written by some of the greatest spiritual teachers of all time. With books covering topics ranging from prosperity and motivation to the occult and metaphysical thought, The Library of Spiritual Wisdom is the definitive collection of texts from some of the most

This Thing Called You

A "rock star" (New York Times) of the computing world provides a radical new work on the meaning of human consciousness. The holy grail of psychologists and scientists for nearly a century has been to understand and replicate both human thought and the human mind. In fact, it's what attracted the now-legendary computer scientist and AI authority David Gelernter to the discipline in the first place. As a student and young researcher in the 1980s, Gelernter hoped to build a program with a dial marked "focus." At maximum "focus," the program would "think" rationally, formally, reasonably. As the dial was turned down and "focus" diminished, its "mind" would start to wander, and as you dialed even lower, this artificial mind would start to free-associate, eventually ignoring the user completely as it cruised off into the mental adventures we know as sleep. While the program was only a partial success, it laid the foundation for *The Tides of Mind*, a

groundbreaking new exploration of the human psyche that shows us how the very purpose of the mind changes throughout the day. Indeed, as Gelernter explains, when we are at our most alert, when reasoning and creating new memories is our main mental business, the mind is a computer-like machine that keeps emotion on a short leash and attention on our surroundings. As we gradually tire, however, and descend the "mental spectrum," reasoning comes unglued. Memory ranges more freely, the mind wanders, and daydreams grow more insistent. Self-awareness fades, reflection blinks out, and at last we are completely immersed in our own minds. With far-reaching implications, Gelernter's landmark "Spectrum of Consciousness" finally helps decode some of the most mysterious wonders of the human mind, such as the numinous light of early childhood, why dreams are so often predictive, and why sadism and masochism underpin some of our greatest artistic achievements. It's a theory that also challenges the very notion of the mind as a machine—and not through empirical studies or "hard science" but by listening to our great poets and novelists, who have proven themselves as humanity's most trusted guides to the subjective mind and inner self. In the great introspective tradition of Wilhelm Wundt and René Descartes, David Gelernter promises to not only revolutionize our understanding of what it means to be human but also to help answer many of our most fundamental questions about the origins of creativity, thought, and consciousness.

The Science of Mind

Ernest Holmes, well known for founding the Church of Religious Science (now called “Centers for Spiritual Living”) and for his magnum opus *The Science of Mind*, published many smaller papers and treatises throughout his career as an author. Now, for the first time, seven of his best classical works are bound together in a single volume, *Your Spiritual Power*—including four rare works being published by Tarcher/Penguin for the first time. The works in this amazing collection of motivational writing include: —Immortality: Thoughts on what it truly means to be immortal, and ponderings on what experiences after death may be like. —What Religious Science Teaches: Offering the student of life the best that the world has so far discovered, Holmes shows how the ideas of Religious Science have been developed by Taoism, Hindu scriptures, the Koran, the Talmud, and other great spiritual teachings of the world. —Your invisible Power: Considered by Holmes to be one of his most

Creative Ideas

The great contribution of Ernest Holmes to modern thought is the specific form of meditation and prayer by which man can control outward conditions of his life instead of permitting conditions to control him. Based soundly and thoughtfully upon the teachings of Jesus and other great spiritual leaders and philosophers, THIS THING CALLED LIFE is an outline of the practice of Faith by which problems of every kind may be solved by every man and woman, directly, simply and effectively. Recognised as one of the foremost teachers of religious science and philosophy since William James, in this book Mr. Holmes courageously declares that for centuries man has been putting the cart before the horse, that he is not helpless in the face of poverty, disease, evil and unhappiness, but that by this clear and simple system of thought and faith he can dominate them and introduce into his experience their exact opposites—abundance, health, good and happiness. If man will try and learn how to think, writes Mr. Holmes, he can dominate his entire life and everything in and around it.

"The birth of Big Science can be traced to Berkeley, California, nearly nine decades ago, when a resourceful young scientist with a talent for physics and an even greater talent for promotion pondered his new invention and declared, 'I'm going to be famous!' Ernest Orlando Lawrence's cyclotron would revolutionize nuclear physics, but that was only the beginning of its impact. It would change our understanding of the basic building blocks of nature. It would help win World War II. Its influence would be felt in academia and international politics. It was the beginning of Big Science, "--Novelist.

Ernest Shurtleff Holmes (January 21, 1887 - April 7, 1960) was an American New Thought writer, teacher, and leader. He was the founder of a Spiritual movement known as Religious Science, part of the greater New Thought movement, whose spiritual philosophy is known as "The Science of Mind." He was the author of *The Science of Mind* and numerous other metaphysical books, and the founder of *Science of Mind* magazine, in continuous publication since 1927. His books remain in print, and the principles he taught as "Science of Mind" have inspired and influenced many generations of metaphysical students and teachers. Holmes had previously studied another New Thought teaching, Divine Science, and was an ordained Divine Science Minister. His influence beyond New Thought can be seen in the self-help movement. After leading small private meetings throughout the city, in 1916 Ernest Holmes was

invited to speak at the Metaphysical Library in Los Angeles. This led him to repeat engagements, and on a nationwide tour. In 1919 he published his first book, *The Creative Mind*, and after almost a decade of touring Holmes committed to remaining in the L.A. area to complete his major work, *The Science of Mind*. It was published in 1926. That year Holmes started speaking each Sunday morning in a theatre in the Ambassador Hotel that seated 625. In November 1927, they moved to the 1,295-seat Ebell Theatre. Subsequently, Holmes lectures continued moving to ever-larger spaces, including Biltmore Hotel, and the Wiltern Theatre. which seats more than 2800. In February 1927, Holmes incorporated the Institute of Religious Science and School of Philosophy, Inc., and later that year he began publishing *Science of Mind* magazine. In 1935 he reincorporated his organization as the Institute of Religious Science and Philosophy, and in 1954 it was reestablished again as a religious organization called the Church of Religious Science. Today his *Science of Mind/Religious Science* teachings are continued by the Centers for Spiritual Living, the Affiliated New Thought Network, the Global Religious Science Ministries, Independent Religious Science ministries, and other organizations. In 2015, his books *Creative Mind* and *Creative Mind and Success* were narrated by Hillary Hawkins and published in audiobook form. (wikipedia.org)
