Brad Stone enjoyed unprecedented access to current and former Amazon employees and Bezos family members, giving readers the first in-depth, fly-on-the-wall account of life at Amazon. Compared to tech's other elite innovators -- Jobs, Gates, Zuckerberg -- Bezos is a private man. But he stands out for his restless pursuit of new markets, leading Amazon into risky new ventures like the Kindle and cloud computing, and transforming retail in the same way Henry Ford revolutionized manufacturing. The Everything Store will be the revealing, definitive biography of the company that placed one of the first and largest bets on the Internet and forever changed the way we shop and read.

The Four

At the heart of Dickens's second novel is a story as much about crime and poverty as it is about justice and charity. Orphaned at birth, Oliver Twist grows up under the loveless, relentless watch of a workhouse. He runs away with hopes for a better life in London, only to become-at the hands of the unforgettable Artful Dodger-a guileless pawn in a gang of pickpockets and robbers working for Fagin, one of Dickens's most controversial villains. Full of ingenious plot twists, at turns thrilling, tragic, tender, and sharp-eyed, Oliver Twist is among Dickens's most enduring classics; the story of a young orphan who dares to say, "Please, sir, I want some more."

The Book of Unconformities

One of the twentieth century's great undisputed masterpieces, Malcolm Lowry's *Under the Volcano* includes an introduction by Michael Schmidt in Penguin Modern Classics. It is the fiesta 'Day of the Dead' in the small Mexican town of Quauhnahuac. In the shadow of the volcano, ragged children beg coins to buy skulls made of chocolate, ugly pariah dogs roam the streets and Geoffrey Firmin - ex-consul, ex-husband, an alcoholic and a ruined man - is living out the last day of his life. Drowning himself in mescal while his former wife and half-brother look on, powerless to help him, the consul has become an enduring tragic figure. As the day wears on, it becomes apparent that Geoffrey must die. It is his only escape from a world he cannot understand. His story, the image of one man's agonised journey towards Calvary, became a prophetic book for a whole generation. Malcolm Lowry (1909-1957) was born and died in England. Between school and studying English at St Catherine's College, Cambridge he spent five months at sea as a deckhand, an experience which gave him the material for his first novel, *Ultramarine* (1933). After marrying in Paris, he moved to New York where he completed *In Ballast to the White* (1936). *Under The Volcano* was begun in Hollywood, coloured by a short stay in the Mexico that it describes, and eventually finished in Dollarton, British Columbia. If you enjoyed *Under the Volcano*, you might like F. Scott Fitzgerald's *The Beautiful and the Damned*, also available in Penguin Classics. 'A Faustian masterpiece' Anthony Burgess

Tuesdays with Morrie

NATIONAL BESTSELLER WINNER OF THE PULITZER PRIZE The searing, post-apocalyptic novel about a father and son's fight

to survive. A father and his son walk alone through burned America. Nothing moves in the ravaged landscape save the ash on the wind. It is cold enough to crack stones, and when the snow falls it is gray. The sky is dark. Their destination is the coast, although they don't know what, if anything, awaits them there. They have nothing; just a pistol to defend themselves against the lawless bands that stalk the road, the clothes they are wearing, a cart of scavenged food—and each other. The Road is the profoundly moving story of a journey. It boldly imagines a future in which no hope remains, but in which the father and his son, "each the other's world entire," are sustained by love. Awesome in the totality of its vision, it is an unflinching meditation on the worst and the best that we are capable of: ultimate destructiveness, desperate tenacity, and the tenderness that keeps two people alive in the face of total devastation. Travels Into Several Remote Nations of the World. By Lemuel Gulliver

Winner of the Macmillan Prize for African Adult Fiction An uncompromising novel by one of Africa's premiere writers, detailing the horrors of civil war in luminous, haunting prose In 1980, after decades of guerilla war against colonial rule, Rhodesia earned its hard-fought-for independence from Britain. Less than two years thereafter when Mugabe rose to power in the new Zimbabwe, it signaled the beginning of brutal civil unrest that would last nearly a half decade more. With The Stone Virgins Yvonne Vera examines the dissident movement from the perspective of two sisters living in a small township outside of Bulawayo. In a portrait painted in successive impressions of life before and after the liberation, Vera explores the quest for dignity and a centered existence against a backdrop of unimaginable violence; the twin instincts of survival and love; the rival pulls of township and city life; and mankind's capacity for terror, beauty, and sacrifice. One sister will find a reason for hope. One will not make it through alive. Weaving historical fact within a story of grand passions and striking endurance, Vera has gifted us with a powerful and provocative testament to the resilience of the Zimbabwean people.

The Big Book of Words You Should Know

Often claimed to be among the first modern detective stories written, "The Murders in the Rue Morgue" exemplifies Poe's interest in the workings of the mind when facing cases that need to be solved. C. Auguste Dupin, the protagonist, is the forefather of all great detectives such as Sherlock Holmes, Hercule Poirot, and Philip Marlowe. Different from Poe's terror or horror-laden tales, the story nonetheless abounds in strange occurrences and horrific depictions. It has been made into several movie and TV adaptations, as well as radio programmes. Edgar Allan Poe (1809-1849) was an American poet, author, and literary critic. Most famous for his poetry, short stories, and tales of the supernatural, mysterious, and macabre, he is also regarded as the inventor of the detective genre and a contributor to the emergence of science fiction, dark romanticism, and weird fiction. His most famous works include "The Raven" (1845), "The Black Cat" (1843), and "The Gold-Bug" (1843).

The Road

Les Misérables is a French historical novel by Victor Hugo that is considered one of the greatest novels of the 19th century. Beginning in 1815 and culminating in the 1832 June Rebellion in Paris, the novel follows the lives and interactions of several characters, focusing on the struggles of ex-convict Jean Valjean and his experience of redemption. Examining the nature of law and grace, the novel elaborates upon the history of France, the architecture and urban design of Paris, politics, moral philosophy, antimorarchism, justice, religion, and the types and nature of romantic and familial love. More than a quarter of the novel is devoted to essays that argue a moral point or display Hugo's encyclopedic knowledge. The topics Hugo addresses include cloistered religious orders, the construction of the Paris sewers, argot, and the street urchins of Paris. Even when not turning to other subjects outside his narrative, Hugo sometimes interrupts the straightforward recitation of events, his voice and control of the story line unconstrained by time and sequence. The story begins in 1815 in Digne, as the peasant Jean Valjean, just released from 19 years' imprisonment in the galleys—five for stealing bread for his starving sister and her family and fourteen more for numerous escape attempts—is turned away by innkeepers because his yellow passport marks him as a former convict. He sleeps on the street, angry and bitter. Digne's benevolent Bishop Myriel gives him shelter. At night, Valjean runs off with Myriel's silverware. When the police capture Valjean, Myriel pretends that he has given the silverware to Valjean and presses him to take two silver candlesticks as well, as if he had forgotten to take them. The police accept his explanation and leave. Myriel tells Valjean that his life has been spared for God, and that he should use money from the silver candlesticks to make an honest man of himself. Six years pass and Valjean, using the alias Monsieur Madeleine, has become a wealthy factory owner and is appointed mayor.

Whether your customer is another department within your own company or an external client, this book provides you with tested processes and tools to help you understand traffic flow, protocol behavior, and internetworking technologies. After completing this book, you will be equipped to design enterprise networks that meet a customer's requirements for functionality, capacity, performance, availability, scalability, affordability, security, and manageability. **Audience** This book is for you if you are an internetworking professional responsible for designing and maintaining medium- to large-sized enterprise networks. If you are a network engineer, architect, or technician who has a working knowledge of network protocols and technologies, this book will provide you with practical advice on applying your knowledge to internetwork design. This book also includes useful information for consultants, systems engineers, and sales engineers who design corporate networks for clients. In the fast-paced presales environment of many systems engineers, it often is difficult to slow down and insist on a top-down, structured systems analysis approach. Wherever possible, this book includes shortcuts and assumptions that can be made to speed up the network design process. Finally, this book is useful for undergraduate and graduate students in computer science and information technology disciplines. Students who have

taken one or two courses in networking theory will find Top-Down Network Design, Third Edition, an approachable introduction to the engineering and business issues related to developing real-world networks that solve typical business problems. Changes for the Third Edition Networks have changed in many ways since the second edition was published. Many legacy technologies have disappeared and are no longer covered in the book. In addition, modern networks have become multifaceted, providing support for numerous bandwidth-hungry applications and a variety of devices, ranging from smart phones to tablet PCs to high-end servers. Modern users expect the network to be available all the time, from any device, and to let them securely collaborate with coworkers, friends, and family. Networks today support voice, video, high-definition TV, desktop sharing, virtual meetings, online training, virtual reality, and applications that we can't even imagine that brilliant college students are busily creating in their dorm rooms. As applications rapidly change and put more demand on networks, the need to teach a systematic approach to network design is even more important than ever. With that need in mind, the third edition has been retooled to make it an ideal textbook for college students. The third edition features review questions and design scenarios at the end of each chapter to help students learn top-down network design. Animal Farm

From the author of the acclaimed Insectopedia, a powerful exploration of loss, endurance, and the absences that permeate the present When Hugh Raffles's two sisters died suddenly within a few weeks of each other, he reached for rocks, stones, and other seemingly solid objects as anchors in a world unmoored, as ways to make sense of these events through stories far larger than his own. A moving, profound, and affirming meditation, The Book of Unconformities is grounded in stories of stones: Neolithic stone circles, Icelandic lava, mica from a Nazi concentration camp, petrified whale blubber in Svalbard, the marble prized by Manhattan's Lenape, and a huge Greenlandic meteorite that arrived with six Inuit adventurers in the exuberant but fractious New York City of 1897. As Raffles follows these fundamental objects, unearthing the events they've

engendered, he finds them losing their solidity and becoming as capricious, indifferent, and willful as time itself.

Stone Girl Bone Girl

Steven Spielberg once said, "I like ideas, especially movie ideas, that you can hold in your hand. If a person can tell me the idea in twenty-five words or less, it's going to make a pretty good movie." Spielberg's comment embodies the essence of the high concept film, which can be condensed into one simple sentence that inspires marketing campaigns, lures audiences, and separates success from failure at the box office. This pioneering study explores the development and dominance of the high concept movie within commercial Hollywood filmmaking since the late 1970s. Justin Wyatt describes how box office success, always important in Hollywood, became paramount in the era in which major film studios passed into the hands of media conglomerates concerned more with the economics of filmmaking than aesthetics. In particular, he shows how high concept films became fully integrated with their marketing, so that a single phrase ("Just when you thought it was safe to go back in the water") could sell the movie to studio executives and provide copy for massive advertising campaigns; a single image or a theme song could instantly remind potential audience members of the movie, and tie-in merchandise could generate millions of dollars in additional income.

Shadow Country

A modern classic, Einstein's Dreams is a fictional collage of stories dreamed by Albert Einstein in 1905, about time, relativity and physics. As the defiant but sensitive young genius is creating his theory of relativity, a new conception of time, he imagines many possible worlds. In one, time is circular, so that people are fated to repeat triumphs and failures over and over. In another, there is a place where time stands still, visited by lovers and parents clinging to their children. In another, time is a nightingale, sometimes trapped by a bell jar. Now translated into thirty languages, Einstein's Dreams has inspired playwrights, dancers, musicians, and painters all over the world. In poetic vignettes, it explores the connections between science and art, the process of creativity, and ultimately the fragility of human existence.
