Dark Mountain

Lummox has been the pet of the Stuart family for generations. With eight legs, a thick hide and huge (and growing) size, Lummox is nobody's idea of man's best friend. Nevertheless, John Stuart XI, descendant of the starman who originally brought Lummox back to Earth from a distant planet, loves him. John isn't about to let the authorities take his pet away and, with his best friend Betty, determines to save Lummox even if it takes leaving the life he's known forever. However, what

John and Betty don't realize is that the survival of the Earth itself may depend on the true nature of The Star Beast. An all-time great science fiction coming-of-age classic from seven-time Hugo winner and Dean of Science Fiction, Robert A. Heinlein. At the publisher's request, this title is sold without DRM (Digital Rights Management).

The Pleasant Profession of Robert A. Heinlein

Robert A. Heinlein began publishing in the 1940s at the dawn of the Golden Age of science fiction, and today he is considered one of the genre's 'big three' alongside Arthur C. Clarke and Isaac Asimov. His short stories were instrumental in developing its structure and rhetoric, while novels such as *Stranger in a Strange Land* and *Starship Troopers* demonstrated that such writing could be a vehicle for political argument. Heinlein's influence remains strong, but his legacy is fiercely contested. His vision of the future was sometimes radical, sometimes deeply conservative, and arguments have flared up recently about which faction has the most significant claim on his ideas. In this major critical study, Hugo Award-winner Farah Mendlesohn carries out a close reading of Heinlein's work, including unpublished stories, essays, and speeches. It sets out not to interpret a single book, but to think through the arguments Heinlein made over a lifetime about the nature of science fiction, about American politics, and about himself.

Variable Star

Tribal politics and a family torn apart are at the root of compelling conflicts revolving around the thought-provoking question "Do you believe life is pulled by fate or pushed by luck?" that keeps this tale moving in several directions. Who's being manipulated, and who's pulling the strings? Prisoner Prodigal Pawn is a complex murder mystery, set in Albuquerque, New Mexico that revolves around a law firm, an Indian casino, and tribal politics. The story unravels with Elton Mazingo, as the main suspect in the murder of his colleague at the Baxter and Baxter law firm, going on the run. Bill Baxter is the ambitious and successful lawyer who is preparing to run for political office. His equally ambitious wife, Liz, is going to take his place as head of the family firm. As the story continues, we learn

that Elton's father, who also worked for Baxter, is in jail serving a sentence for murder, eerily the same situation Elton finds himself in. The Mazingo brothers, Elton and Charles, as well as their convicted-felon father, BP, are the eponymous prisoner, prodigal son, and pawn caught up in an elaborate scheme that its perpetrators would kill to keep hidden. Elton and his estranged brother, a tribal police officer, have individually set out to investigate their father's case, and are on a quest to clear his name. The quest will open a Pandora's box of murder, betrayal and greed. When Elton seeks the aid of a childhood friend who uses him to pursue an agenda of her own, the brothers soon discover that there is virtually nobody around them whom they can trust. Prisoner Prodigal Pawn infuses a unique blend of family, intrigue, and corruption, with shocking twists. It is fast paced and full of adventure with an intricate plot, flawlessly woven with many interesting characters that will keep the reader turning those pages.

the course of her career. As the court case unfolds, everyone in the small community must confront their own prejudices. Caught in the middle, Adisa also tries to chart her way along a path complicated by her budding relationship with a charismatic young preacher who leads the local movement demanding the police officer answer for his crime. Taught By Women, Poems as Resistance Language, New and Selected by Haki R. Madhubuti, marks a return to his roots. It is his first single-authored book of poetry in over nine years. In it, he pays homage to the many women who have influenced him and contributed to his unique worldview. Readers are urged not to forget various women who have nurtured, encouraged, challenged and strengthened us despite our sometimes dismal circumstances. Madhubuti asks that we remember these women, long distance runners, who give hope, optimism and courage to the next generation of children who need their strength, perseverance and quiet power. In these new and selected poems Madhubuti, formerly Don L. Lee, poet, publisher, editor, and activist, places us in lyrical proximity to a legacy of women whose lives he honors with heart warm verses and timeless reverence. Each poem is a vivid portraiture of the "magnificent energy" emanating from a rainbow of Black women. In this mosaic collection of poetry, Madhubuti celebrates the luminous spirits of women whose visible 'greatness' has left an indelible mark on his life's work. In Taught By Women, Madhubuti sings their struggles and praises

with pitch perfect precision, every note-- an empowering song and unforgettable melody.

In the Stars

The novel Orange Lily, originally published in 1879, is set in the area surrounding the small village of Carrowdore in County Down, Northern Ireland. Its eponymous heroine, Lily Keag, is a farmer's daughter whose love for her childhood sweetheart, Tom Coulter, is thwarted by a class divide that few would have dared cross in nineteenth-century Ulster. She was dubbed 'Orange Lily' partly because of her reddish hair, but also because of her father's position as Master of the 'Ballyboly' Orange Lodge. But beyond the story of the trials and tribulations of the star-crossed lovers is a wealth of social and linguistic history of the region, including the hierarchy from the 'big house' down, customs, beliefs, traditions, and Ulster-Scots vocabulary. May Crommelin (1849-1930) was born at Carrowdore Castle and spent

Get Free Time For The Stars Robert A Heinlein

a good part of her formative years there. She travelled widely and wrote numerous novels and travel books, as well as short stories and articles for magazines. Her sympathy with the Orange dimension of local folk-culture is perhaps surprising, coming, as it does, from a 'gentry' perspective, and from an author who circulated among Victorian London's literati (her sister was married to the poet laureate, John Masefield). But the Crommelin ancestors had been French Huguenots who first fought with King William III in 1690, and then settled in Ulster under his royal patronage, as May Crommelin was always proud to remind the world. This new edition, edited, introduced and glossed by Dr Philip Robinson, also includes the short stories *The Witch of Windy Hill* and *An Old Maid's Marriage*.

Time for the Stars

Travel to other planets is a reality, and with overpopulation stretching the resources of Earth, the necessity to find habitable worlds is growing ever more urgent. With no time to wait years for communication between slower-than-light spaceships and home, the Long Range Foundation explores an unlikely solution--human telepathy. Identical twins Tom and Pat are enlisted to be the human radios that will keep the ships in contact with Earth, but one of them has to stay behind while the other explores the depths of space. This is one of Heinlein's triumphs.

Part one of a series that follows the dramatic challenges in the main character's belief system about the universe, humanity's origins and nearly every aspect of normality. This story promises to entertain you with a blend of sci-fi, action and drama, romance and comedy, and a little spirituality and metaphysics to boot. The action is heart thumping and the drama is engrossing.

AN AFFAIR OF HONOR

Dan Wynn wanted to explore space more than life itself, but a tragic accident left him too injured for NASA's space program. Second chances don't come along every day, so when an old friend offered him one, he grabbed on with both hands. The next thing Dan knew, he was on the moon, piloting humanity's first starship while fighting his way through one peril after another. Little did Dan know that simple offer was anything but, and would lead him to the stars far beyond our own. The risks are great. But if life knocked you down, what would you gamble to have one more shot at your dreams? Excerpt: "Dan - ad astra!" Dan heard the order. Ad astra. To the stars. It was a toast the two of them had shared back in college, when they first stepped onto the roads which would lead them into space. It had been John's idea to use the toast as a code word now. Dan didn't even take a deep

breath before executing the order. He'd practiced this with Majel enough times in the simulator - not the part about having a gunman in the bridge, but if that order was ever given, it would be a true crisis. He checked the screen again. Visual range in only fifteen seconds. No time for anything else. He rapidly initiated the program, said a quick prayer, and pressed the Enter button on his keyboard. Immediately, the ship began to shudder. This book is a heavily revised second edition of the original volume. The story length has been increased by about 60%, adding enormously more background to the characters and deepening of the personality of the world and crew. A compass is a very helpful tool-as long as its wielder knows the direction he wants to go. This wasn't often the case in the sixties in America, when many felt directionless, with an unpopular war that had the country's moral compass spinning. "Hope Points North" is a coming-of-age experience that takes place on Long Island during this turbulent period. Of the three boys, Chris McKellar is the conventional one of the group-the glue that binds the troubled Teddy and smart, introverted Charlie together. The story is Chris's adult recollection of the time when he, Teddy, and Charlie decide to travel on their own to Grumman Aerospace Company, the builders of the Lunar Excursion Model-the craft that will eventually deliver man to the moon. Just as the boys embark on their journey, the dark-hearted preacher Lovejoy ambushes them. Teddy's grandpa has amassed a secret fortune, but it's no secret to Lovejoy, who is seducing Teddy's mother and will do anything to get the money. But the boys resist the preacher's attack in a way that leaves him dead in the creek or so they think. In shock, they follow their compass, toward the fraternity of hopes, dreams and, unsuspectingly, manhood.

Ride the Stars

A never-before-published masterpiece from science fiction's greatest writer, rediscovered after more than half a century. When Joel Johnston first met Jinny Hamilton, it seemed like a dream come true. And when she finally agreed to marry him, he felt like the luckiest man in the universe. There was just one small

Get Free Time For The Stars Robert A Heinlein

problem. He was broke. His only goal in life was to become a composer, and he knew it would take years before he was earning enough to support a family. But Jinny wasn't willing to wait. And when Joel asked her what they were going to do for money, she gave him a most unexpected answer. She told him that her name wasn't really Jinny Hamilton---it was Jinny Conrad, and she was the granddaughter of Richard Conrad, the wealthiest man in the solar system. And now that she was sure that Joel loved her for herself, not for her wealth, she revealed her family's plans for him---he would be groomed for a place in the vast Conrad empire and sire a dynasty to carry on the family business. Most men would have jumped at the opportunity. But Joel Johnston wasn't most men. To Jinny's surprise, and even his own, he turned down her generous offer and then set off on the mother of all benders. And woke up on a colony ship heading out into space, torn between regret over his rash decision and his determination to forget Jinny and make a life for himself among the stars. He was on his way to succeeding when his plans--and the plans of billions of others--were shattered by a cosmic cataclysm so devastating it would take all of humanity's strength and ingenuity just to survive.
