"This colossal reference book documents the timeless urge to reshape the world, and the machines used to do so from the

1088's to today. From utility tractors and loaders up to the largest diggers and bulldozers, every piece of heavy equipment is listed here by model and manufacturer, making this the most exhaustive book on the world's most hard-working vehicles and machines"--Publisher's description.

The Road-maker

Now an industry giant and a legend among American manufacturers, Caterpillar first got its name from Holt Manufacturing Company's remarkable tractor creation of 1905. What followed was the Caterpillar century, an era of engineering revolutions and world-changing earthmovers. Eric Orlemann serves as tour guide through this time of American mechanical know-how and muscle, offering us a rare close-up look at the technology of Caterpillar's most important equipment innovations, then and now. Packed with contemporary photographs, archival images, and information on state-of-the-art equipment design, Caterpillar Century traces the evolution of this icon of industry from its emergence in 1905 to its making of modern day heavy-equipment marvels and development of future design prototypes.

The Lumberman

Roads and Streets

As the 20th century approached the 1990s, Dad mentioned that if he could live that long he would have lived in each decade of the century. He often commented on the vast changes he'd seen as they developed. He marveled at the first cars he saw about 1913. He experienced the progress of plowing, from teams to steam engine to tractors. He lived thru the Great Depression and two World Wars. He reveled in the development of power tools, from hand saw to chain saws, electric drills and such. He watched the advancement of airplanes, and witnessed the beginning of the space age and computers. This is his story, recorded on audio tapes as family history. It is told in his sometimes-blunt language (R-rated), including difficulties, mistakes, joys and accomplishments.
