iPad For Seniors For Dummies

From Barack Obama (Harvard and Chicago) to Bill and
Hillary Clinton (Yale), many of our current national
leaders emerged from the rarefied air of the nation's
top law schools. The ideas taught there in one
generation often shape national policy in the next.
The trouble is, Walter Olson reveals in Schools for
Misrule, our elite law schools keep churning out ideas
that are catastrophically bad for America. From class
action lawsuits that promote the right to sue anyone
over anything, to court orders mandating the mass
release of prison inmates; from the movement for
slavery reparations, to court takeovers of school
funding—all of these appalling ideas were hatched in
legal academia. And the worst is yet to come. A fast-
rising movement in law schools demands that
sovereignty over U.S. legal disputes be handed over
to international law and transnational courts. It is not

by coincidence, Olson argues, that these bad ideas all tend to confer more power on the law schools' own graduates. In the overlawyered society that results, they are the ones who become the real rulers.

The Unauthorized Guide to IPhone, IPad, and IPod Repair

This innovative study opens up a new area in sociological and urban studies: the aural experience of the social, mediated through mobile technologies of communication. Whilst we live in a world dominated by visual epistemologies of urban experience, Michael Bull argues that it is not surprising that the Apple iPod, a sound based technology, is the first consumer cultural icon of the twenty-first century. This book, in using the example of the Apple iPod, investigates the way in which we use sound to construct key areas of our daily lives. The author argues that the Apple iPod acts as an urban Sherpa for many of its users and in doing so joins the mobile army of technologies that many of us habitually use to accompany our daily lives. Through our use of such mobile and largely sound based devices, the book demonstrates how and why the spaces of the city are being transformed right in front of our ears.
