Indexes material from conference proceedings and hard-to-find documents, in addition to journal articles. Over 1,000 journals are indexed and literature published from 1981 to the present is covered. Topics in pollution and its management are extensively covered from the standpoints of atmosphere, emissions, mathematical models, effects on people and animals, and environmental action. Major areas of coverage include: air pollution, marine pollution, freshwater pollution, sewage and wastewater treatment, waste management, land pollution, toxicology and health, noise, and radiation.

### **Tests in Print**

An engineer's handbook of research and applications in industrial robotics. Stresses the practical uses rather than the mechanical, electrical or computer considerations. Discusses specific techniques for working with robots in various situations. Includes a forward by Isaac Asimov.
