Computer Vision - ECCV 2014 Workshops

When you've tried everything to get pregnant—from eating the right foods to spending thousands on medical treatments—and nothing's worked, it's hard to stay positive. But this book holds the key to success. The mind-body connection, a vastly under-acknowledged and under-studied area in fertility, has helped many women become pregnant. It can help you, too. Holistic fertility coach A'ndrea Reiter teaches you about the four areas that may be blocking your ability to conceive and offers concrete ways to navigate them. Her mind-body approach focuses on natural methods instead of invasive and expensive fertility procedures. A'ndrea also provides practical exercises, in-depth case studies, eye-opening information, and expert guidance on understanding the nuances of energy and mindset. Whether you have PCOS, endometriosis, male factor infertility, unexplained infertility, thyroid issues, or are over forty, A'ndrea can show you how to move through it and achieve your dream of motherhood.

iPad For Seniors For Dummies

The final entry in this all-you-need-to-know series summarizes the best points in the previous 12 books, updates many of them, and integrates must-have knowledge into a unified, indispensable whole. • Combines knowledge, expertise, and

personal experiences from a group of successful entrepreneurs • Delves into the nitty-gritty of actually starting and running a business, covering the full cycle of business ownership, not just the initial steps • Shares insights into personal growth necessary for success, including leadership and strategic management skills • Explores new ways of obtaining capital such as "crowdsourcing," soliciting for investors over the Internet

Understanding the Bigger Energy Picture

Step-by-step, this book details how to use uploaded resources to ensure a quality and complete online course. It brings together contemporary research and empirical evidence to explain why one can use the suggested practical, tried-and-

tested methods. With the help of an instructional designer, it is not necessary to be proficient with any Learning Management System (LMS). The simple three step plan outlined in this book involves identifying one's relevant learning outcomes, learning resources, and learning activities. Each step is clearly detailed, and the core material is supplemented with summaries and graphics throughout.

This book is open access under a CC BY 4.0 license. This book focuses on the global cycles of energy, water and carbon, which are not only the essentials of our main energy carriers, the fossil fuels, but are also the building blocks of life. The book offers an overview of the basic scientific facts and relationships that are needed to understand today's energy generation and use, how they relate to global climate, the water cycle and other resources, and the complexities of energy policy. Building on the work of the Desertec project, it presents the main technological options that we will have in a world after the "Energiewende" and presents the possible future solutions for a sustainable world. The book is written in an engaging, descriptive style that can be understood by those without specific knowledge of science or economics and allows

readers to form their own conclusions. Controversy rages over energy problems, climate change and their possible solutions. Expressions like “climate deniers”, “renaissance of nuclear energy”, “stop the war on coal”, and “Energiewende now” represent a diversity of opinions that divide our society and political leaders. This book shows the reader the whole energy picture and how it is part of the wider global problems of overpopulation and uncontrolled economies in a world of limited resources.

This book is devoted to all the aspects of pediatric minimally invasive surgery and is written under the patronage of the European Society of Pediatric Endoscopic Surgery (ESPE) with the participation of leading international experts on Pediatric MIS. Comprising more than 50 chapters, the book begins with an introductory section describing the general and technical aspects of MIS approaches including laparoscopy, thoracoscopy, retroperitoneoscopy and robotic surgery. The main part of the book is divided into five subsections, each of which focuses on a specific system: thorax, abdomen, urology, gynecology and varia. For each subsection, the book examines several pathologies, accurately describing their clinical and diagnostic aspects and providing detailed information on the operative techniques, tips and tricks used in their treatment. Further, the book addresses potential complications in MIS and better ways to manage and prevent them. The volume will be of interest for pediatric surgeons, pediatric urologists or other professionals that need to access accurate descriptions of the MIS approaches adopted for the different surgical pathologies. At the same time, it addresses the needs of novices, including trainees, looking for general information on the management of the various diseases encountered in the pediatric population.

When Rachel Bertsche first moves to Chicago, she’s thrilled to finally share a zip code, let alone an apartment, with her boyfriend. But shortly after getting married, Bertsche realizes that her new life is missing one thing: friends. Sure, she has

plenty of BFFs—in New York and San Francisco and Boston and Washington, D.C. Still, in her adopted hometown, there's no one to call at the last minute for girl talk over brunch or a reality-TV marathon over a bottle of wine. Taking matters into her own hands, Bertsche develops a plan: She'll go on fifty-two friend-dates, one per week for a year, in hopes of meeting her new Best Friend Forever. In her thought-provoking, uproarious memoir, Bertsche blends the story of her girl-dates (whom she meets everywhere from improv class to friend rental websites) with the latest social research to examine how difficult—and hilariously awkward—it is to make new friends as an adult. In a time when women will happily announce they need a man but are embarrassed to admit they need a BFF, Bertsche uncovers the reality that no matter how great your love life is, you've gotta have friends.

Now a Major Motion Picture starring Emma Watson and Tom Hanks. A bestselling dystopian novel that tackles surveillance, privacy and the frightening intrusions of technology in our lives. When Mae Holland is hired to work for the Circle, the world's most powerful internet company, she feels she's been given the opportunity of a lifetime. The Circle, run out of a sprawling California campus, links users' personal emails, social media, banking, and purchasing with their universal operating system, resulting in one online identity and a new age of civility and transparency. As Mae tours the open-plan office spaces, the towering glass dining facilities, the cozy dorms for those who spend nights at work, she is thrilled with the company's modernity and activity. There are parties that last through the night, there are famous musicians playing on the lawn, there are athletic activities and clubs and brunches, and even an aquarium of rare fish retrieved from the Marianas Trench by the CEO. Mae can't believe her luck, her great fortune to work for the most influential company in the world—even as life beyond the campus grows distant, even as a strange encounter with a colleague leaves her shaken, even as her role at the Circle becomes increasingly public. What begins as the captivating story of one woman's ambition and idealism soon becomes a heart-racing novel of suspense, raising questions about memory, history, privacy, democracy, and the limits of human knowledge.
