Valuation for Arbitration

This book has a pedigree. It has developed from earlier publications by the author and from his experience over 50 years in reading, writing, thinking, and working with lipids and fatty acids. The earlier publications are: (i) An Introduction to the Chemistry of Fats and Fatty Acids, Chapman and Hall, 1958. (ii) An Introduction to the Chemistry and Biochemistry of Fatty Acids and their Glycerides, Chapman and Hall, 1967. (iii) Lipids in Foods: Chemistry, Biochemistry, and Technology (with F. A. Norris), Pergamon Press, 1983. (iv) The Lipid Handbook (with J. L. Harwood and F. B. Padley), Chapman and Hall, first edition 1986, second edition 1994. (v) A Lipid Glossary (with B. G. Herslof), The Oily Press, Dundee, 1992. (vi) Lecture notes for a course on Fatty Acids and Lipids designed for those entering the oil and fat industry and given on over 20 occasions since 1977. The book is dedicated to the next generation of lipid scientists. The study of lipids now involves many disciplines, all of which require a basic knowledge of the chemical nature and

properties of these molecules, which is what this book is about. It is written particularly for those who, with some knowledge of chemistry or biochemistry, need to know more about the nature of lipids and fatty acids.

From the world-famous author of THE NAME OF THE ROSE, an illuminating and humorous study on the pleasures and pitfalls of translation. 'Translation is always a shift, not between two languages but between two cultures. A translator must take into account rules that are not strictly linguistic but, broadly speaking, cultural.' Umberto Eco is of the world's most brilliant and entertaining writers on literature and language. In this accessible and dazzling study, he turns his eye on the subject of translations and the problems the differences between cultures can cause. The book is full of little gems about mistranslations and misunderstandings.For example when you put 'Studies in the logic of Charles Sanders Peirce' through an internet translation machine, it becomes 'Studies in the logic of the Charles of sandpaper grinding machines Peirce'. In Italian 'ratto' has no connotation of 'contemptible person' but denotes speed ('you dirty rat' could take on a whole new meaning!) What could be a weighty subject is never dull, fired by Eco's immense wit and erudition, providing an entertaining read that illuminates the process of negotiation that all translators must make.

If you can't make it to one of Bruce Block's legendary visual storytelling seminars, then you need his book! Now in full color for the first time, this best-seller offers a clear view of the relationship between the story/script structure and the visual structure of a film, video, animated piece, or video game. You'll learn how to structure your visuals as carefully as a writer structures a story or a composer structures music. Understanding visual structure allows you to communicate moods and emotions, and most importantly, reveals the critical relationship between story structure and visual structure. The concepts in this book will benefit writers, directors, photographers, production designers, art directors, and editors who are always confronted by the same visual problems that have faced every picture maker in the past, present, and future.

Forensic art may be defined as 'portrait art minus a tangible subject.' The main objective of this book is to present a series of practical indices interrelating the key features of the human face that will provide a foundation for any exercise in forensic art from composite sketch to post-mortem 're-facing.' These indices are illustrated with a survey of the numerous and often surprising geometric forms that permeate facial design. The various triangles and rectangles, rhomboids and trapezoids, parallelograms and circles that define the human face (the theme) and give it individuality (variations on the theme) are examined. The chapters provide necessary information to define the cephalometric points, planes, areas and lines that demarcate the human face, including the detailed surface anatomy of the eye, nose, mouth and ear. The underlying geometry of the human facial plan is revealed, illustrating a selection of triangles, rectangles, and other polygons. The graphic facial analysis (GFA) of the frontal face is covered, with sixteen indices and triangles defining and illustrating their means and ranges of variation. The GFA details the lateral face by means of eight angles and indices with special attention given to the nose and ear. With 45 illustrations and two tables in this clear and comprehensive text, this book leaves little to the imagination and is truly a unique treatise and source of information.

Annotation We're in the midst of a digital media-making revolution--and the Canon Vixia G10 and XA10 camcorders are at the forefront. Blurring the line between "pro-sumer" and professional, the G10 and XA10 are sharper, cleaner, more compact, more portable, and boast more professional features than any prior palm-sized camcorder in their price range. This book is a comprehensive field guide to the concepts, strategies, equipment, and procedures for achieving the best results possible with Canon's top-of-the-line palm-sized camcorders. The guide focuses on the specific features of the Canon Vixia HF G10 and XA10, but users of other camcorders in the Vixia series, the Legria series (shooting PAL), and other camcorders will find a wealth of relevant information. With a high-definition palm-sized camcorder such as the Canon Vixia G10 or XA10, your potential is limited only by your imagination and your resourcefulness.

A grammar of Kukama-Kukamiria

Just what are the most amazing spectacles that every wildlife enthusiast has to see during their lifetime? Top nature photographer and inveterate traveller William Burrard-Lucas has spent years visiting the far-flung corners of every continent, capturing thousands of breathtaking images along the way, and is therefore the perfect author for this title. Fifty sites are covered in this astounding book, each with a locator map, several photographs, a fact file of information such as 'best time to visit' and 'key species and spectacles' and a beautifully written evocative account of what it's like to go there. Destinations range from Kangaroo Island in Australia to Kamchatka in the far east of Russia, and from African hot-spots such as the Okavango and Masai Mara to American wildernesses such as the Amazon and Alaska. Familiar destinations including the Farne Islands and Yellowstone mingle with more esoteric experiences such as whale-watching in Tonga and watching millions of Monarch butterflies in Mexico. This beautifully illustrated book on the world's best sites for watching spectacular wildlife will be a valuable addition to the bookshelf of any wildlife enthusiast. It is also perfect as a gift book, a Christmas present, or just to delve into and be inspired by the best that nature has to offer. -- William Burrard-Lucas

Corporations, government offices, and academic institutions have long used video to educate and inform. The only thing that's changed is the people who are producing them: With low-priced equipment and easy-to-use software flooding the market, now you're the person behind the camera, not some high-priced video specialist! This is the guide for you, then-and all of the other nonprofessionals who've been called upon to produce top-quality videos. Long on essentials-like where to place the camera, how to connect microphones, and which font to use in titles-and short on theory, this guide focuses instead on the simple steps and best practices needed to produce great videos. Veteran author Jan Ozer gives you the lowdown on shooting, audio, and lighting before describing the workflow and procedures involved in converting raw DV footage to streaming video and DVDs, and distributing the final product. For software-specific guidance, you can purchase downloadable PDF workbooks that use the book's projects to walk you through the production process.

Camera Trapping Guide

Everybody begins their YouTube journey from zero. You have to start with no videos, views, or subscribers. Furthermore, more than 400 minutes of content is uploaded to YouTube each minute. To say that it's challenging to grow a channel is an understatement! In fact, less than 3% of YouTube channels ever gain more than 10,000 subscribers. Yet, in a one-year period, Brian G Johnson gained 10,623 subscribers and drove over half a million video views. Truly beginning from zero. Brian had no previous YouTube success to draw from and had to learn the myriad of camera settings, editing options, and technical details that often become a roadblock. Furthermore, he did it in a small and competitive niche, the YouTube video marketing niche. How, you ask? By researching, testing, and tweaking various video growth methods over a one-year period in order to identify why the YouTube algorithm promotes one video over another. Ultimately, this led to the creation of a video ritual based on his findings—a series of actions according to a prescribed order. More than a mere guide, Tube Ritual is a one-year case study with the goal being to drive more views and convert more viewers into subscribers. For those already creating videos or who want to in the future, Tube Ritual contains detailed, step-by-step information that plain works. From Branding to thumbnails, video structure, YouTube SEO, video calls to action, playlist strategies, channel strategies and more, Tube Ritual leaves no stone unturned.

This book provides a clear understanding of the nuts and bolts of valuation approaches for business investments, including market, income and asset-based methods. It reviews tools that arbitrators may employ to reach their final compensation assessment on a principled basis. The bookand☐s many practical recommendations explore the decision making processes entailed in three central aspects of the arbitratorand☐s role: and☐ advance planning to enhance understanding of expert valuation evidence; and☐ identification of and☐apples-to-orangesand☐ miscomparisons; and and☐ recognition of the true comparability between the business at issue and other examples offered in the expert evidence. The presentation focuses not only on the legal standards applicable to the valuation (full or adequate compensation, reparations, restitution, actual loss, fair market value, fair or reasonably equivalent value, lost profits, etc.), but also on the informed judgment and reasonableness that must enter into the process of weighing the facts of each case and determining its aggregate significance. The book considers common valuation methods like discounted cash flows, adjusted present values, capitalized cash flows, adjusted book values and comparable sales and transactions. Additionally, it addresses means for arbitrators to assess expert valuation evidence in complex business investment disputes. andquot;Best book 2008 of the OGEMID awards!andquot;
