This is Suki!

Creating job opportunities for a large and growing number of young people is a key development challenge for the government of Sierra Leone. Analyzing the supply and demand sides of the labor market, this book assesses the challenges and options for improving sustainable livelihood opportunities for youth in post-conflict Sierra Leone.

Ghana and the Rawlings Factor

Teaching would be easy if there were clear recipes you could follow every time. The Ingredients for Great Teaching explains why this is impossible and why a one-size-fits-all approach doesn't work. Instead of recipes, this book examines the basic ingredients of teaching and learning so you can use them wisely in your own classroom in order to become a better and more effective teacher. Taking an approach that is both evidence-based and practical, author Pedro de Bruyckere explores ten crucial aspects of teaching, the research behind them and why they work like they do, combined with everyday classroom examples describing both good and bad practice. Key topics include: Teacher subject knowledge Evaluation and feedback The importance of practice Metacognition Making students think This is essential reading for teachers everywhere.

Children and Sustainable Development

Building on Zoltán Dörnyei's authoritative work in the field of learner motivation, this book introduces a new conceptualization—Directed Motivational Currents (DMCs)—and sets out the defining aspects of what they are, what they are not, and how they are related to language learning motivation. Going beyond focused behavior in a single activity, DMCs concern intensive long-term motivation. The distinctive feature of the theory is that it views motivation not simply as a springboard for action but also as a uniquely self-renewing and sustainable process. It is this energizing capacity which distinguishes DMCs from almost every other motivational construct described in the research literature. *Motivational Currents in Language Learning* offers new insights, valuable both to motivation researchers and classroom practitioners. The accessible style, along with plentiful illustrations and practical suggestions for promoting sustained learning, invite readers to think about motivation in a different way. Highly relevant for language teachers, teachers-in-training, teacher educators, and researchers in TESOL and applied linguistics, the book explains how the DMC construct can be integrated into course structures and teaching methodologies, and encourages teachers to try out novel methods for harnessing motivational power in classroom settings.

Harvest of Corruption

Involuntary Resettlement in Africa

Constitution for National Integration and Development

Faceless

Nowhere in Africa has the question of access to university education reached such a crescendo of concern and posed such a challenge to the polity, as in Nigeria. By illuminating the history of massification of university education in Nigeria, Anyanwu makes a significant contribution to our understanding of the challenges of nation building in multi-ethnic and religious societies and demonstrates that the intractable issues in Africa's university education system.

The Bottled Leopard

The Waste Products of Agriculture

Bringing in the harvest. Watching for enemy aircraft. Rescuing survivors from the wreckage of bombed houses. Keeping the family business running when parents were enlisted into war-work. These are just a few examples of how children and young people made substantial contributions to the war effort during the Second World War. You Can Help Your Country: English children's work during the Second World War reveals the remarkable, hidden history of children as social agents who actively participated in a national effort during a period of crisis. This highly-illustrated volume draws on interviews with people who were school-age during the war, on archives and on school histories which recorded wartime activities as well as children's accounts of their experiences at the time. Children expressed both positive and negative views of their work: exhilaration and exhaustion, pride and resentment, delight in new freedoms and anger at deprivation. Applying a sociological approach, the authors outline the social history of childhood during the first half of the twentieth century, documenting heated debates about the 'proper' activities of children and analysing the thinking that questioned class-based childhoods and schooling and promoted better health and better educational opportunities. In this context, they examine how children responded to appeals to 'do their bit' as urged through government poster campaigns, BBC radio broadcast programmes for schools, propaganda films and children's fiction. This is a stimulating, entertaining and scholarly contribution to the history of childhood, which will enable the reader to think about ideas of childhood today and their rights, as citizens, to participate in the social and political life of their society. It will be essential reading for academics, researchers and students in the field of educational sociology and more widely, and will appeal to anyone with an interest in social history and war studies.

Nonformal Education in Ghana

A futuristic satire on the trade in live organs from the Third World to the West. Om, a young man is driven by unemployment to sell his body parts for cash. Guards arrive to make his home into a germ-free zone. When his brother Jeetu returns unexpectedly, he is taken away as the donor. Om can't accept this. Java, his wife, is left alone. Will she too be seduced into selling her body for use by the rich westerners? Harvest won first prize in the first Onassis Cultural Competition for Theatre and was premiered in Greek at the Teatro Texnis, Athens. It has also been performed by a youth theatre in the UK, broadcast by the BBC World Service and made into a feature film, directed by Govind Nihalani, titled Body, which was screened at the Regus London Film Festival. The play is also studied by many colleges and universities to explain how globalisation works. Manjula Padmanbhan Born in Delhi to a diplomat family in 1953, she went to boarding school in her teenage years. After college, her determination to make her own way in life led to works in publishing and media-related fields. She won the Greek Onassis Award for her play Harvest. An award-winning film Deham was made by Govind Nihalani based on the play. She has written one more powerful play, Lights Out! (1984), Hidden Fires is a series of monologues. The Artist's Model (1995) and Sextet are her other works.(1996). She has also authored a collection of short stories, called Kleptomania. Her most recent book, published in 2008, is Escape. Apart from writing newspaper columns she

created comic strips. She created Suki, an Indian comic character, which was serialized as a strip in the Sunday Observer. Before 1997 (the year her play Harvest was staged) she was better known as a cartoonist and had a daily cartoon strip in The Pioneer newspaper. As playwright 1984 - "Lights Out" 2003. Harvest. London: Aurora Metro Press. As Author and Illustrator 2013. Three Virgins and Other Stories New Delhi, India: Zubaan Books. 2015. Island of Lost Girls. Hachette. 2011. I am different! The Autonomy Approach

The Autonomy Approach presents an important departure from the theoretical discussions which underpin the majority of work on learner autonomy. It introduces a practical perspective to self-directed language learning (teachable-learnable activities rooted in principles of learning), which draws on aspects of study skills and strategies as well as a variety of approaches, namely differentiated, individualised, self-directed, self-access and open-access learning. With the Autonomy Approach, emphasis is placed on students being supported in class to learn at their own pace, away from the classroom - in other words, self-directing their own learning. The authors examine and explain the theory behind metacognitive knowledge and skills, and support this with an extensive sequence of activities for the teacher and the learner to use - to help learners take the development of their language learning into their own hands. The activities in this book aim not to teach a

language but, rather, to raise awareness of different aspects of language learning, to encourage learners (and teachers) to share, select and try out activities, and to reflect on the effectiveness of what they have tried. The activities are suitable for developing a self-directed learning course or for supplementing an existing course. This book is intended for:

- Language teachers and learning advisors.
- Trainers involved in professional development.
- Materials developers for self-access centres or distance education.

The Autonomy Approach contains three distinctive parts which focus in turn on theory, practice and development: Part A offers a detailed breakdown of the philosophy behind the Autonomy Approach. Clear rationales are established for promoting self-directed learning, and teachers are invited to reflect on the benefits of learners taking more responsibility for their own learning. Part B is packed with step-by-step activities to support learners through the development, implementation and modification of an emerging individualised learning plan. Part C promotes a deeper understanding of the Autonomy Approach, and includes strategies to develop professional practice for us, as language learning facilitators, to learn and grow from our own experience.

Ghana

Easing the transition from GCSE to AS level, this textbook meets the 2004 Edexcel specifications and provides numerous worked examples and solutions to aid understanding of key concepts.

Student Failure in National Examination

This comprehensive, up-to-date book describes and details the wide range of modern radar systems and methods currently in use today. From system fundamentals to functional descriptions of their subsystems, the reference covers radar principles, radar technology, and successful applications of that technology, and includes solved examples to illustrate critical principles. Appropriate for radar engineers, electrical engineers, flight test engineers, and those in related disciplines.

Hive Succinctly

The Nigerian Stock Exchange

Post-Colonial Drama is the first full-length study to address the ways in which performance has been instrumental in resisting the continuing effects of imperialism. It brings to bear the latest theoretical approaches from post-colonial and performance studies to a range of plays from Australia, Africa, Canada, New Zealand, the Caribbean and other former

colonial regions. Some of the major topics discussed in Post-Colonial Drama include: * the interactions of post-colonial and performance theories * the post-colonial re-stagings of language and history * the specific enactments of ritual and carnival * the theatrical citations of the post-colonial body Post-Colonial Drama combines a rich intersection of theoretical approaches with close attention to a wide range of performance texts.

New Perspectives in Forestry Education

Core Mathematics 2

In this book, the research study on student failure in national examination (causes and adopted solution in Nigeria-West Africa) is propounded. This technique is applied to solve and address; the causes of massive failure recorded in GCE, WASSCE, NECO, NABTEB, JAMB and other examination body in Nigeria from 2005 to 2011. The statistical data's analyzed are samples Collected from different examination rating at different location on the factors that contribute to student's poor performance in National examination in Nigeria. Also samples are collected from individual online, analyst rating, standard board rating and Local rating. The experimental procedure were analyzed and validated on Pentium IV, 2.5GB RAM, 40GB Hard disk and Microsoft Excel package, MATLAB software program and Microsoft window 10 operating system.

The Ingredients for Great Teaching

Science Education in Nigeria

This book addresses the changes in education practices, especially basic education, necessitated by the global challenges of climate change and sustainable development and in a context characterized by increasing poverty and inequality, migration and refugees. Written by a range of international scholars, scientists and grassroots practitioners from Africa, Latin America, Asia (India, China, Malaysia) and Europe, the individual contributions focus on education policies and child development in various social contexts. Case-based experiences from both developed and developing countries provide inspiration and shed new light on the fundamental changes needed to adapt existing school systems and teacher training to face the challenges of the future. In this regard, the need to empower children themselves is emphasized. All contributions are based on a Workshop hosted in November 2015 by the Pontifical Academy of Sciences at the Vatican entitled “Children and Sustainable Development: A Challenge for Education” and follow three other significant events on sustainable development in 2015, namely the publication of *Laudato Si'*, the Encyclical Letter from Pope Francis, the release of the United Nations Sustainable Development Goals, and the COP21 Conference in Paris.

Youth Employment in Sierra Leone

The Hewale children make a mind-blowing discovery and are whipped 50 years into the past to solve a mystery that has broken their family up for decades. Porting back and forth across dimensions and timelines, solving missions large and small, can they live up to the expectations of this phenomenon?

Radar

A man has lived on his own beside a wild, unforgiving coastline for many years. His companions are the birds, the land and the sea. From a choice made long ago, he keeps himself separate from the world of people and he gains a fierce pleasure from his environment. His solitude is broken by his discovery, one early morning on the flat sands of low tide, of a child washed up on the beach, but still alive. This is a novel of redemption, the story of a man experiencing the world as though for the first time.

Expo '77

This major study reflects the increasing significance of careful model formation and testing in those academic subjects that are struggling from intuitive and aesthetic obscurantism toward a more disciplined and integrated approach to their fields of study. The twenty-six original contributions represent the carefully selected work of progressive archaeologists around the world, covering the use of models on archaeological material of all kinds and from all periods from Palaeolithic to Medieval. Their common theme is archaeological generalisation by means of explicit model building, testing, modification and reapplication. The contributors seek to show that it is the use of certain models in particular ways that defines archaeology as the practice of one discipline, with a set of general tenets that are as applicable in Peru as in Persia, Australia as Alaska, Sweden as Scotland, on material from the second millennium B.C. to the second millennium A.D. They assert that careful model formulation within archaeology and the cautious exchange and testing of models within and beyond the discipline provides the only route to the formation of the common, internationally valid body of theory which defines a vigorous and coherent discipline and distinguishes it from being a collection of merely regionally applicable special cases.

You Can Help Your Country

Sir Albert Howard presents a summary of his life's work in this book. Howard states "This law is true for soil, plant, animal, and man: the health of these four is one connected chain. Any weakness or defect in the health of any earlier link in the chain is carried on to the next and succeeding links, until it reaches the last, namely, man." Howard's work, decades ahead of its time, provides an insight into how he realized the value of organic methods though he went to India intending to teach

The Children's War

Aquaculture and Biotechnology

One of the earliest scientific works on all aspects of compost and manure. Still of value today, especially to those interested in organic agriculture. Howard is the author of the very influential book "An Agricultural Testament."

Models in Archaeology

The Politics of Access

Street life in the slums of Accra is realistically portrayed in this socially-committed, subtle novel about four educated women who are inspired by the plight of a 14-year old girl, Fofo. As the main characters convert their library center into a practical street initiative, the novel invokes the squalor, health risks, and vicious cycles of poverty and violence that drive children to the streets and women to prostitution; and, from which, ultimately, no one in the society is free.

The Shimmer in the Photo Album

The Last Good Man

Post-Colonial Drama

British children were mobilised for total war in 1914-18. It dominated their school experience and they enjoyed it as a source of entertainment. Their support was believed to be vital for Britain's present and future but their participation was motivated by a desire to remain connected to their absent fathers and brothers.

African Music in Ghana

Hive allows you to take data in Hadoop, apply a fixed external schema, and query the data with an SQL-like language. With Hive, complex queries can yield simpler, more effectively visualized results. Author Elton Stoneman uses Hive Succinctly to introduce the core principles of Hive and guides readers through mapping Hadoop and HBase data in Hive, writing complex queries in HiveQL, and running custom code inside Hive queries using a variety of languages. With this e-book, getting the most out of big data and Hadoop has never been easier.

Basic Electricity 2

Motivational Currents in Language Learning

Developing Science, Mathematics and ICT (SMICT) in Secondary Education is based on country studies from ten Sub-Saharan African countries: Botswana, Burkina Faso, Ghana, Namibia, Nigeria, Senegal, South Africa, Uganda, Tanzania and Zimbabwe, and a literature review. It reveals a number of huge challenges in SMICT education in sub-Saharan Africa: poorly-

resourced schools; large classes; a curriculum hardly relevant to the daily lives of students; a lack of qualified teachers; and inadequate teacher education programs. Through examining country case studies, this paper discusses the lessons for improvement of SMICT in secondary education in Africa.

Developing Science, Mathematics, and ICT Education in Sub-Saharan Africa

Aquaculture and Biotechnology deals with biotechnological approaches to disease diagnosis, pathogen detection, antibacterial therapy, immunoprophylaxis of disease and sex manipulation of fish.
