Clinical Cases: Nursing care case studies - Inking

This comprehensive guide to managing pain and other symptoms for people with cancer has helped tens of thousands of patients and families. Designed for busy practicing clinicians, *A Physician's Guide to Pain and Symptom Management in Cancer Patients* provides primary care physicians, advanced practice nurses, internists, and oncologists with detailed information and advice for alleviating the stress and pain of patients and family members alike. Drawing on the work of experts who have developed revolutionary approaches to symptom management and palliative care, as well as on the lessons learned from patients and their families during her thirty years as a teacher and clinician, Dr. Janet L. Abrahm shows how physicians and other caregivers can help patients and families heal emotionally even as the disease progresses. The third edition includes updates to medications and clinical stories, and features two new chapters: "Working with Patients' Families" and "Sexuality, Intimacy, and Cancer." New lessons from palliative care and hospice care can help patients, their professional caregivers, and their families support each other every step of the way.

Summer Issues and Accidents, An Issue of Critical Care Nursing Clinics, E-Book

"This is an excellent resource for nurses practicing in critical care units, emergency departments, and trauma units, as well as for midlevel providers who manage these patients.--Doody's Medical Reviews "Compact Clinical Guide to Critical

Care, Trauma, and Emergency Pain Management is a concise, easy-to-read resource for nurses who want to reinforce their foundational knowledge in this area."--Critical Care Nurse This addition to Springer Publishing's Compact Clinical Guide to Pain Management Series presents evidence-based national guidelines and treatment algorithms for managing pain in patients in the critical care, trauma, and emergency room settings. Such patients often present with co-morbid and complex conditions which often make accurate pain assessment and treatment a challenge. In an easy-to-use, bulleted format, the book provides the most current information on assessing and managing pain in a variety of critical conditions. Both pharmacological management therapies and non-pharmacologic interventions are included along with information about pain assessment screening tools for special populations. Topics covered include the basics of pain physiology in critical, emergency, and operative care patients, assessing pain in the critically ill, medications and advanced pain management techniques useful with this population, and commonly occurring conditions in the various care environments. Also addressed are the management of particularly challenging patients (elderly, obese) and conditions (chronic pain, renal failure, chemically dependent patients, and burn patients). The book contains tables that efficiently summarize information and figures to illustrate key concepts. Pain rating scales and a helpful equi-analgesic conversion table are included in the Appendix. Key Features: Provides evidence-based information on treating pain in critical care, trauma, and emergency room patients for all practice levels Organized for quick access to pertinent clinical information on treatment options and pain types Provides cross-referenced indexing and easy-to-use assessment and screening tools Includes information for treating especially challenging and difficult to manage patient pain scenarios

Drain's PeriAnesthesia Nursing - E-Book

Essential Nursing Skills E-Book

The first book to encompass adult-gerontology practice guidelines for primary care, this comprehensive resource is designed as a text and reference for health care practitioners specializing as adultgerontology nurse practitioners (A-GNP). It provides current national practice guidelines for delivering high-quality primary health care to adult, older adult, and pregnant patients in the outpatient setting. The book delivers chapters that focus on the older adult person, including a chapter describing the major effects of aging on each body system. For quick and easy access, practice guidelines are organized primarily by body system, disorders listed alphabetically within each body system, and each disorder presented in a consistent format throughout. With an emphasis on history taking, the physical exam, and key features of the aging population, each of the more than 240 disorder guidelines include definition, incidence, pathogenesis, predisposing factors, common complaints, other signs and symptoms, subjective data, physical exam, diagnostic tests, differential diagnoses,

plan of care, health promotion including dietary recommendations, follow-up guidelines, and tips for consultation/referral. Particularly useful features include "Practice Pointers" highlighting crucial information for a disorder and bold-faced "Alerts" from experienced practitioners. The book also describes 19 procedures commonly used within the office or clinic setting. More than 140 Patient Teaching Guides are included (perforated for ease of use) as well as in digital format for customizing and printing. These include important information for patients about safety and medications. Appendices feature normal lab values and dietary guidelines. Key Features: Focuses specifically on the adult, older adult, and pregnant patient populations Delivers consistent presentation of more than 240 disorders by body system for ease of access Step-by-step review of 19 commonly used procedures "Practice Pointers" indicate highly important care points Includes more than 140 extensive Patient Teaching Guides for "take home" information Useful as a review text when preparing to take the A-GNP certification course and exam

The Care of Wounds

"This book is a user-friendly, real-world guide to assessing and managing any type of wound. The author presents vital information for nurses and nursing students who provide wound care in any setting a wonderful resource for nurses."--The AORN Journal (Association of Perioperative Registered Nurses) "Wound care is arguably the single most difficult topic in medicine. It has no defined solution like insulin for the diabetic no easy strategy that covers all wounds we are so tremendously blessed when [a wound care specialist] like Zelia carves out time to capture a career of experiences in text so that it can be shared with others. We are indebted to her for making this important contribution to the clinician's armament for dealing with [the] difficult-to-heal wounds of their patients." Bruce Gibbins, PhD Founder, Chief Technical Officer and Chairman of the Board of AcryMed, Inc. Former faculty at the University of Otago Medical School Using the concise, compact Fast Facts format, this guide encompasses the multitude of new healing technologies and presents important breakthroughs in understanding why some wounds don't heal.
