Publication Manual of the American Psychological Association, 6th Edition

This book is written by the authors of the acclaimed "Introduction to Rubrics". It has sold over 3,000 in 12 months. There is a major growth of interest in keeping journals or diaries for personal reflection and growth; and as a teaching tool. It will appeal to college faculty, administrators and teachers. One of the most powerful ways to learn, reflect and make sense of our lives is through journal keeping. This book presents the potential uses and benefits of journals for personal and professional development - particularly for those in academic life; and demonstrates journals' potential to foster college students' learning, fluency and voice, and creative thinking. In professional life, a journal helps to organize,

prioritize and address the many expectations of a faculty member's or administrator's roles. Journals are effective for developing time management skills, building problem-solving skills, fostering insight, and decreasing stress. Both writing and rereading journal entries allow the journal keeper to document thinking; to track changes and review observations; and to examine assumptions and so gain fresh perspectives and insights over past events. The authors present the background to help readers make an informed decision about the value of journals and to determine whether journals will fit appropriately with their teaching objectives or help manage their personal and professional lives. They offer insights and advice on selecting the format or formats and techniques most appropriate for the reader's purposes.

Reflections of a Civil War Historian

Jerry D Young was born at home, in Senath, Missouri July 3, 1953. At age 5 the family rented a small farm house on an active farm 40 miles southwest of St. Louis. While the family weren't farmers, they lived something of a homestead type life, raising a milk cow, sometimes two, and calves, a pig or two, chickens, and the occasional goat. Along with the stock, a large garden helped to feed Jerry's three brothers and two sisters for several years. Fishing and hunting contributed to the pantry, as did foraging the wild edibles on the property. At the age of 14, the family, minus a brother and two sisters that were now adults and on their own, moved back to Senath. Having been encouraged from an early age to read, Jerry was a regular patron of the Senath Branch Library. A love of a good story was born within him, and shortly before graduating high school, for a lack of stories that he liked at the library, he began to write short vignettes, and started taking notes for stories that he wanted to tell. Well, a full life interceded, and the writing didn't resume for several years. But while working a job with a much free time, and the then newfangled home computer, Jerry began to write in earnest. With the occasional gap in the process, Jerry continued to research and write, never believing he could ever be published. But when he turned 50, he wanted a change in his life, left the job he was doing and began focusing on his writing. When he became ill, the writing stopped, but not the inspiration. When he started writing again, in 2004, after getting the medical problems under control, he began to read some on-line stories dealing with emergency preparedness, one of his other loves. The die was cast. Now with over a hundred of the vignettes and short stories about how to survive disasters written, along with his other novels, Jerry decided to go for broke, adding one of his previous works every few days to his list of stories now available, Jerry continues to write, both the Prep/PAW stories, as well as action

adventure with a little romance type stories that first got him started.

Writing to Teach, Writing to Learn in Secondary Schools

The Church sees Mary as the "earthside of the Incarnation." In an attempt to understand the critical role she played in this great event, this book looks at her life as a young girl who said "yes" to an angel and brought God into the world. It begins with a discussion of her obedience as the pivotal point in our salvation. It continues with an examination of five aspects of her maternity - giving birth, nurturing, relinquishing, sorrow and joy. Our own lives parallel these stages in our conversion (giving birth), spiritual growth (nurturing), surrender to God (relinquishing), bearing our cross (sorrow) and the new life through the Resurrection (joy). Thus Mary can become our guide as we make our journey toward Christ. Further, by a focus on the humanity of Mary, we not only come closer to the mystery of the Incarnation but begin to grasp how the Church declared May to be the "Mother of God. This reverence receives strong emphasis in Orthodox Christianity. Questions for study and reflection follow the end of each chapter. Though relevant throughout the year, this book is especially timely for Advent reading. Also, it would be especially appropriate for an individual or group retreat.

The original manuscript completed in 1992 that chronicles an attempt led by Oregon State provost Graham Spanier to fire a writing instructor for publishing a commentary on corruption at Oregon State University. The instructor, Barry Roberts Greer, a widely published writer, fought back for two years until both he was forced out of OSU and Spanier left to become the now disgraced former president of Pennsylvania State University. Strong parallels exist between Greer's experience at OSU and the experiences of the protagonist in "A New Life," Bernard Malamud's novel based on his own experience teaching at Oregon State.

Fractals are characterized by the repetition of similar patterns at ever-diminishing scales. Fractal geometry has emerged as one of the most exciting frontiers on the border between mathematics and information technology and can be seen in many of the swirling patterns produced by computer graphics. It has become a new tool for modeling in biology, geology, and other natural sciences. Anthropologists have observed that the patterns produced in different cultures can be characterized by specific design themes. In Europe and America, we often see cities laid out in a grid pattern of straight streets and right-angle corners. In contrast, traditional African settlements tend to use fractal structures-circles of circles of circular dwellings, rectangular walls enclosing ever-smaller rectangles, and streets in which broad avenues branch down to tiny footpaths with striking geometric repetition. These indigenous fractals are not limited to architecture; their recursive patterns echo throughout many disparate African designs and knowledge systems. Drawing on interviews with African designers, artists, and scientists, Ron Eglash investigates fractals in African architecture, traditional hairstyling, textiles, sculpture, painting, carving, metalwork, religion, games, practical craft, quantitative techniques, and symbolic systems. He also examines the political and

social implications of the existence of African fractal geometry. His book makes a unique contribution to the study of mathematics, African culture, anthropology, and computer simulations.
